Should she lose her races with the Columbia, it is doubtful if Mr. Lawson will again start her this year. The fu ture of the boat depends entirely on her performance today and Saturday, and everything possible has been done durng the last two weeks to put her in

It was intended to take the Independence out for another trial spin yesterday, but there was no wind and she did not leave her moorings. She has an entirely new set of headsails, and her trim has been slightly changed.

It is expected that, according to her new measurement, her allowance to the Columbia will be less than in the former ices. It has been 43 seconds heretolent in pure and high grade foods. ore. NEW PARTY LAUNCHED Less Than a Dozen Delegates Held Convention In a Bedroom

QUINCY DAILY LEDGER.

Columbus, O., Aug. 1.-The "Progres sive Democratic party" was organized | Preserved by Officials Interhere yesterday. The attendance was so small that many doubted at first whether any attempt would be made to hold a state convention. The week following the recent Demo-

cratic state convention, a conference was held at Cleveland, protesting against the present Democratic platform, ignoring Bryan, free silver and other issues, and in not reaffirming either of the national platforms on which Bryan made his runs for the presidency. At that conference a call was issued for a state convention of "Bryan Democrats" and others opposed to the Democratic and the Republican state platforms, to meet here yesterday. But less than a dozen men responded and attended the christening of the new party.

George A. Groot as both temporary and permanent chairman yesterday, and was made chairman of the state committee of the new party. The convention was held in his room at the Great Southern hotel, and in that small room he made his keynote speech of a half hour in length. The reporters, who were perched on and about the bed, outnumbered the delegates by 2 to 1. A few spectators stood at the open door. The total attendance did not exceed

Even the promoters of the movement did not disguise their disappointment at the small attendance. They enjoyed the participation by the reporters, who were allowed to take part in the proeedings with suggestions. A full ticket was nominated, the lead-

ers being: Governor, Rudolph Reemling, and lieutenant governor, Henry C.

Amalgamated sociation Officers Leave the Conference, Giving Rise to Various Rumors Regarding Their Location-Another Meeting Today

Pittsburg, Aug. 1.-"Hope deferred maketh the heart sick." This is expressive of the feelings of the majority of Pittsburgers outside of the inner circles of the Amalgamated association executive board, who have been considering the proposals for a settlement of the steel strike for two days, without agreement. How the members of the board feel is known to no man on the

board's deliberations was notable for the many rumors in circulation, and for the conspicuous dearth of results. The absence of three of the principal members of the board from the association's sessions yesterday gave rise to the story ideas of the peace proposals, and that OUR SPECIAL TIES that the members were divided in their in order to satisfy all, Secretary Williams has been sent to New York to seek modifications at the hands of Messrs Morgan and Schwab, while Assistant Secretary Tighe and Trustee Morgan had received a commission to visit Sena tor Hanna to secure his aid in bringing about an amicable arrangement. Nothing tangible could be learned concern ing these supposed trips, however, and all talk in relation to them must remain merely conjecture until the return of these members and their lips are unsealed.

The conditions of affairs may be summed up in this paragraph: The steel workers' strike against the United States Steel corporation is still unset tled. The status of the contest is unchanged. The men are fighting for every advantage, while the companies involved are strengthening their position as much as possible. The conference of the members of the general executive board of the Amalgamated association, which was expected to settle the trouble one way or the other yes terday, adjourned at 6 o'clock last night without accomplishing its purpose.

It was subsequently learned that the three absentees were out of the city, and had taken their departure on early trains. After elusive answers regarding their location, it was said that they were not very far away, and were expected to be present when the board was called together today.

When President Shaffer started to go home he was asked for some state ence and the probability of a settlement In reply he said: "There will be no ax collector of Floyd county, was in- statement given out today. I expect to call another meeting of the board to charges of embezzling. It is alleged in morrow. I will be present at this meeting, and will not be out of the city to

All of the other officials who were at the meeting during the afternoon declined to talk of the strike.

Confidence is felt in some circles that the strike will eventually be settled on the proposition made by Mr. Morgan. The officials of the steel companies who have been acting for the United States Steel corporation in this matter are apparently hopeful and light-hearted. The delays in the settlement are fully understood by the Morgan representatives, and, while all maintain the sternest silence regarding the matter, they are not able to conceal their feelings of contentment and satisfaction over the way things are going. One of these officials remarked to a friend yesterday that if the strike was not settled he would be more than surprised.

TAKING HIS ADVICE.

How a Man Applied a Rule He Intended For His Neighbor to Himself.

"That's the secret of success in life, Harry," he said one day to his favorite clerk. "Sharp's the motto if you wish to rise. I don't mean you should cheat. That of course is both wrong and ungentleman and above all little meannesses. "But always be wide awake and never let anybody cheat you. I've noticed, by the bye, that you've seemed rather downhearted lately. If it's because you've your fortune yet to make, don't despair, but follow my advice. An opening will come at some time for something better than a clerkship, and, though I shall be sorry to lose you, yet I'll give you up if it's for your in-

The next morning Mr. Shelden came down to breakfast in high glee, for a note had reached him just as he was shaving which ran as follows:

Dear Sir-I have, with much difficulty, persuad ed her to elope. It was not, however, till I showed her your check that she would consent to showed her your check that she would consent to do so. She said that she was sure you would not recommend anything that was wrong; that you would advise her as if you were her own father, and she hopes you will stand by us. We shall be married tomorrow, before Mr. Meadows is up Very thankfully, HARRY CONRAD. Very thankfully, The old gentleman brought the note with him to the table, opened it out be-

fore him, adjusted his spectacles and read it over and over again.

"I'd give \$100," he said, chuckling, "to see the old fellow's face when he hears how Harry has done him." It was the custom of Mr. Sheldon to

read his newspaper at breakfast while waiting for his only child and daughter, who a little spoiled by overindulgence, was generally late. But this morning Matty was later

than ever. The banker had read all the foreign as well as the home news and even perused Harry's note, and still she had not made her appearance. "The lazy puss!" he said at last. Then

he looked up at the clock. "Half an hour late! Now, this is really too bad. John," he cried, addressing the manservant at the sideboard, "send and see why Miss Sheldon doesn't come down. Tell her," with a severe air, "I'm tired of waiting.' John came back in about five min-

utes, looking very much flustered. "If you please, sir," he stammered, "Miss Sheldon's not in her room, and the maid says that the bed looks as if it hadn't been slept in all night."

The rich merchant's jaw fell. He started up, with a cry of agony, to

"A telegram!" cried the merchant, unfolding it with trembling hands. "What can it mean? Has she been found dead anywhere?" This was the telegram:

Dear Father-Harry and I were married at 8 o'clock this morning. I would not consent to an elopement till Harry assured me you had advised it and had shown me your check as proof. He falo, N. Y. gentlemanly." Mr. Sheldon prided himself also on being what he called a gentleman and above all little mean. We wait for your blessing.

"Well, I never!" ejaculated Mr. Shelden when he had recovered his breath. "The impudent, disobe"-

But here he stopped-stopped and mopped his bald head, which, in his excitement, had broken out into great drops of perspiration. He remembered that he had himself advised Harry to elope and that if the story got wind he would be the laughing stock of the town, including-the hardest cut of all -Mr. Meadows. He remembered, too, that he had but one child and that she was all in all to him.

The executive board of the associaion is in fact waiting for a word from J. P. Morgan. After the board had heard from President Shaffer concerning his trip to New York last week, it ter, according to young Patrick's story, was decided to request a change in the propositions of Mr. Morgan, and sent a the young man personal injury, where message to him in New York on Tuesthis matter. In explanation of this one of the bullets taking effect. The nessage The Amalgamated Journal, the younger Patrick is said to be a hardorgan of the Amalgamated association.

while not so stated, is believed to be an ultimatum to the head of the United States Steel corporation. It is viewed as such by the labor leaders about Pittsburg. If the steel workers do not get their demand for this conference he strike will go on indefinitely. None of the officials of the organization will liscuss this point. They still maintain their silence, and say they have nothing to give out.

At noon, after the executive board had been in session all morning, and in a formal manner waited for a reply from Mr. Morgan, the members decided to make an official denial of the report that there was lack of harmony in their ranks. To the reporters present they gave out a statement to that effect.

Whatever differences might have exsatisfactorily, and the board stands as a unit for its demand for the renewal of the conference with the manufacturers' representatives. Much depends on this. Routed Snakes With Chloroform. Dr. George Kent Sterling of Ubet, Mon., was sent for and used his carriage for several miles and then was obliged to strike off across country to reach his destination, says a St. Paul dispatch to the St. Louis Globe-Democrat. On the journey Dr. Sterling was startled by the sharp and unmistakable sound of a snake rattle at his feet. He found himself practically hemmed in by snakes. For a moment the physician was almost paralyzed with fear. Then a bright thought struck him. Lying within his reach was a piece of bark about three feet long. Wrapping his handkerchief about one end of the bark, he saturated the cloth with chloroform from his medicine case. According to the accounts of reputable observers, the crow courts are conducted something after this fashion: A solemn conclave of old crokers is held on a tree. A crestfallen prisoner is among them. Three or four old fellows, probably crow lawyers, will jabber away for awhile, and then there will be an apparent consultation of the whole flock sitting as a jury. If the verdict be against the prisoner, he is sentenced to death and turned over to the executioners, who peck the life out of him.—

He strode up the mountain, over the gray grass and the golden beaded furze that was filling the darkening air with the scent of honey. Pure and high and lonely was the evening star in that misty blue heaven from which the rosy angels had flown after the sun. There was a beaten path up the hill to that cabin they had smiled upon in love, and leyes. But no one was paying any attention to her, for Noreen had run away to hide her face on her mother's bosom, and the young man was trying to coax her out of her shyness that would not let her say yea, though she was very fain to speak the word.

"followers of form." And that is saying much, for the difficulty with which racegoers-and especially the bettorsare pleased has become proverbial.

Early in the season, when many jeckeys signed to ride abroad, racing followers in America had fears that but few good pilots would be left. A busy on the home courses, however, shows how groundless this misgiving

With such jockeys as Winnie O'Connor, Tommy Burns, Bullman, Shaw, Slack, Mounce, L. Smith, Willie Brennan, Spencer, Dominick, Knight, Rausch, McCue, Odom, Cochran, Wedderstrand, Coburn, H. Michaels and others remaining on this side we have little need to worry about the management of the equine competitors

Winnie O'Connor is a youngster whose recent work on the eastern tracks has placed him in a prominent niche before the public. O'Connor is riding for James R. Keene. He is a western boy who invaded the east early in the spring. One of his first feats was to capture the Brooklyn Handicap game 3-year-old Conroy. O'Connor rides like a demon when hard pressed, but he has the faculty of reserving a few ounces of his steed's "go" for the last few yards. The boy has a great future before him.

Shaw has been riding in magnificent form of late. In fact, he appears to have taken Tod Sloane's place on American tracks. George E. Smith, better known as "Pittsburg Phil," the weil known plunger, makes a practice of backing nearly every horse that Shaw rides. Some idea of "Phil's" prosperous condition may be had when it is remembered that the able jockey has on various occasions ridden two or three winners in a single day.

An interesting figure on eastern tracks is Philly McGovern, a younger brother of Terry, the "Brooklyn whirlwind," BOOKS, whose pugilistic accomplishments have given him widespread reputation. The younger McGovern donned the jockey's cap and jacket and has been riding for the Harris-Sullivan-McGovern stable. He is a veritable "chip of the old block" and intends to "stick to the ponies" for his livelihood.

American jockeys not only have met with success in England, but they have acquitted themselves creditably in France, Germany, Austria and Australia as well. After Lester Reiff won the English Derby Milton Henry went over to Paris and rode three winners at Longchamps. Before leaving for the continent Henry, mounted on Cap and Bells II, captured the Oak Stakes at Epsom. Fred Taral then added his share to the international victories by riding four winners in a single day at the Austrian capital. Taral says the American style of riding is very popular in Austria and that most of the native jockeys have adopted it.

Johnny Reiff, Skeets Martin, Clem Jenkins, Danny Maher, Willie Simms and Ben Rigby have come in for their quota of foreign turf glory. Maher is making large winnings. He is popular abroad because of his consistent form, "Bedad, it's not," whispered Noreen water. It also serves as a buffer for although he did not always do his best on American courses. Maher was formerly a bootblack in Hartford. At Quincy Patriot, Aqueduct, N. Y., two years ago he rode "My dear," said Growells, "you are repeated the trick several times since. #### THE GREAT CRESCEUS

Still Further Reduces the World's Trotting Record

MADE A MILE IN 2:02 1-4

Passed Half Mile Pole In 59 3-4 Seconds, a Record Never Before Atbut For Facing Wind on Stretch

Columbus, O., Aug. 3.--Cresceus, the champion of the trotting turf, added more laurels to his fame yesterday by trotting a mile in 2:02 1-4, reducing by half a second his week-old record of 2:02 3-4, made at Cleveland a week ago. In the over-night pool selling a great deal of money went into the box at odds of \$25 to \$17 on time against the trutter. At the track, owing to the fierce wind, the odds against the horse increased to \$25 to \$8, but the backers of Cresceus were game, and took the short end as ong as pools were sold.

George Ketcham appeared on the track with Cresceus a little before 3 o'clock. The champion jogged three miles slower than three minutes, and one in 2:22. An hour later, he came out again, and, after scoring several times, stepped a mile in 2:25. Still later he worked out for the last time in 2:15 1-2. He evidently had great power in reserve, the great test.

not decrease before dark, and at 5:40 the stallion was brought out for the last ime. On the fifth score Ketcham nodded for the word, but Cresceus was not in his stride, and he pulled up at the first turn to try it again. Down to the wire he rushed, the runner two lengths behind, and this time it was a go.

Gamely facing the breeze, the champion started on his journey, moving with The runner caught him at the quarter and a shout went up as the time was shown to be a quarter of a second less than 30. Now the wind was at his back, and, realizing the advantage, Ketcham kept him at his great clip. The half-mile pole was passed in 59 3-4 seconds, a record never before attained, and here the second runner caught him up. The three-quarter pole was reached in 1:30 1-4.

Cresceus turned into the stretch, the bitter wind beat him in the face and held him back. For the fraction of a plunged in toward the finish with unweakened stride, and, in spite of weariness and the buffeting of the breeze, he 2:02 1-4 against time.

But for the wind it is believed his time would have been a second faster. It was the most wonderful mile ever trotted on any track. Enthusiasm broke loose as soon as the horse passed the wire. The crowd rushed on the track to greet the champion, and a huge wreath of flowers was hung around his

Mr. Ketcham, owner and driver, was carried to the judges' stand, and in a few words he expressed his appreciation of the interest taken in the attempt his trust in Ohio's horses, and his confidence in his own great trotter. Cresceus was not unduly fatigued by his effort, and half an hour later seemed ready for another trial.

They have had a good clue to Blondin's wheerabouts and it will be several days before the result of the search is known.

The special further says that officer Letteney has been on the trail of the suspect since July 6, when High Sheriff Gale of Quebec secured word that Blondin had been in Levis. He took a steamer for the Saugen river, and was later heard from at Tadousac.

The officers could not catch up with him, for Blondin was next heard from at Bergerennes, leaving there in a sail boat during a big storm. He reached the opposite bank of the river all right, tained-Might Have Done Better, and plunged into the woods and headed for the Gaspee peninsular.

ACKNOWLEDGE DEFEAT

What England Thinks of Vast Majority of Boers

WOULD GLADLY SURRENDER

But For Handful of Irreconciliables-Chamberlain Says Kitchener Will Adequately Deal With What Has Developed Into Absolute Murder

London, Aug. 3.-A discussion arose the colonial office appropriation, and it ample opportunity to bait Mr. Chamberlain, while making a motion pro forma to reduce by \$500 the appropriation out of which the colonial secretary's salary will be paid.

21 months endured Mr. Chamberlain's pportune to secure a statement from the cololnal secretary as to the war situation. He went on to point out that Cape Colony was now invaded, and over-run with Boers; and he asked what prospect there was of repelling the in- report in a dull and weak position. vaders; what the condition of Cape Colony would be after the war; what was the prospect of famine as a result of the government "policy of devastation."

Mr. Chamberlain replied that farm burning had been entirely abandoned and replaced by the policy of concentration camps. He contended that these tions, as had been shown by the fact that thousands of Boers came into them veluntarily.

"The government has the best reasons to believe," continued the colonial secrewould gladly surrender and resume peaceful pursuits, but for the comparaive handful of irreconciliables, who are degenerating into brigandage and abolute murder. Lord Kitchener is adequately dealing with the problem by stablishing blockhouse cordons within which the peacefully inclined can safely settle and be protected."

Regarding the announcement by Lord Kitchener that Commandant Kritzinger had declared his intention to shoot all natives in British employ, whether armed or unarmed, Mr. Chamberlain said the government had telegraphed Lord Kitchener to inform the Boer leader that such acts were contrary to civflized usage, and that all guilty persons of this class, if captured, would be courtmartialled and executed.

"There seems to be an impression that we have come to some sort of an agreement with the Boers," said Mr. Chamberlain in another portion of his speech, "that natives are not to be emagreement.

Will Never Renounce Boer Flag

Paris, Aug. 3.-The Figaro publishes a long interview today with Mr. Kruger, denying the cruelties charged against the Boers in Lord Kitchener's report. Mr. Kruger declares that the atrocities of the consentration camps were twenty times worse than had been stated by Miss Hobhouse in Great Britain, and that, when fully known, they would cause the world to shudder with horror and move the nations to intervene. "We are defending our liberty," continues Jobbing Prompt!y Attended to. Mr. Kruger, "and when it is granted we will lay down our arms. Great Britain knows our conditions. It is not for me to repeat them. We will never renounce our flag and we cannot accept any protectorate. I am convinced that the hour will come when Great Britain will grant what is our right. Moreover, I am confident that God is with us, and will not abandon us."

His wealth of dark brown curly hair, the style of his beard and his frontal development recalled to me the pictures of Charles Dickens when the great novelist was in his best estate, only the Texan was cast in a larger mold. He stood 6 feet 2 inches and weighed 240 pounds and was a splendid type of physical and intellectual manhood in its rich and golden autumn. Judge Culberson was a big bodied, large headed and warm hearted man.

To us younger members he was a sort of congressional father. We went to him when in doubt, especially on any legal proposition, and he generously gave us from his inexhaustible store of wisdom and law learning. He didn't make as much noise and get into the papers as often as Reed, Burrows, Crisp and many others, but when he did speak it was an event in the His colleagues always heard him gladly. He was willing to unselfishly furnish ammunition for "the boys" and delighted to see them winindorsed and amended by Cleveland ning honors and golden opinions.

There was a massiveness about him very suggestive of reserve power, of which he had more than any other man find out. Carlisle could not be found, in congress. I had for years heard much of his prodigious ability, but after sitting by his side for three months and not remember or know anything about seeing him take absolutely no part in it, and Cleveland has never answered the fierce parliamentary contests rag- to this day. When the Sherman law was repealed, Judge Culberson summed up his disgust in the sententious and enigmatical remark:

But all the bright young Faber slashers exercised their wits for weeks to discover why he said "free niggers" and not simply "niggers."

Jumbo and His Stake.

The day that Speaker Crisp peremptorily ordered Mr. Reed to take his seat and, when the ex-speaker refused, commanded the sergeant-at-arms to arrest him, as "the man from Maine" wended his sulky way to his desk Judge Culberson said sotto voce:

"See Jumbo return to his stake!" The southwesterners say the judge was a great stumper. In the famous prohibition fight he sided with the cold water crowd. Athletic clubs are a prolific source for supplying able competitors for the arena of sport. Their representatives, however, do not maintain the same degree of perfection in training as that of college men, and a consequent lack of form is usually in evidence. CHRISTIAN ENDEAVOR.

Topic For the Week Beginning Aug. 4-Comment by Rev. S. H. Doyle.

Topic.-Caining by losing.-Mark x, 28-80. It seems paradoxical to say that we gain by losing, yet it is true, and that it is true can be seen in all phases of life. Gaining by losing is a law of the natural world. "Except a corn of wheat fall into the ground and die," says Chaist, "it abideth alone, but if it die it bringeth forth much fruit." This principle is illustrated also in the temporal world. If a man places wealth before perior In Physical Prowess to Club him as the goal of his ambition, he must sacrifice many things in order to attain to it. He must die to a great extent to the social world, the world of his time, all his energies, must be concentrated upon this one object, and if with this as his one aim he is willing to die unto all other things he can usually become rich. So it is in all the other walks of life. Much must be lost in order to gain what we most desire to be or have. The same principle holds equally good in the spiritual world.

Spiritual life itself is gained by loss. "Whosoever will save his life," says Christ, "shall lose it, and whosoever will lose his life for My sake shall find it." The life that must be lost is the present life. It must be lost if we are to gain the eternal life of the soul in heaven. Two lives are placed before us. We cannot in a sense have both. We may have either. If we prefer this life, we may sacrifice the future life and live for this life only and get it; if we prefer the higher, eternal life, we can sacrifice this life and get it. To gain eternal life we must lose this present life. But surely we should not hesitate to suffer such a loss for such a gain. "For what is a man profited if he shall gain the whole world and lose his life, or what shall a man give in exchange for his life?"

But many blessings of the Christian life also come from loss. It not only costs something to become a Christian, but something to live a Christian life. We may lose friends, home, loved ones, but we have Christ's word for it that our loss shall prove to be our gain. "There is no man that hath left house or brethren or sisters or father or mother or wife or children or lands for My sake and the gospel's but he shall receive an hundredfold, now in this time, houses and brethren and sisters and mothers and children and lands, with persecutions and in the world to come eternal life." If we lose temporal riches for Christ's sake, we gain eternal riches; if we lose an earthly home, we gain a heavenly home; if we lose worldly friends, we gain all the people of God as our friends; if we lose earthly parents, we gain God, our Heavenly Father; if we lose brothers or sisters, we gain as brothers and sisters all the children of God. It is no loss, therefore, to lose for Christ, but a gain. Therefore no sacrifice that may need to be made should deter us in deciding for Christ or in living Christian lives.

> salist Leader. Without God's Presence. God punishes sin by the withdrawal of His presence. The hardest punishment a sensitive and loving child can have is the withdrawal of the parent's face. The hiding of God's face is harder to bear than the heaviness of his hand. Sin clouds the soul and hides the face of God. To see God's face forever is heaven's glory; to lose God's face forever is hell's unutterable woe. Keep a clear vision of God by keeping a pure heart. If your sins have caused God's face to become dim, heed the warning. Any punishment is preferable to being left without God's presence.-Rev. Isaac W. Gowen.

LEADING FEATURES IN THE MODES OF THE SEASON.

The Forward Tilt or an Ascending being repaired at the shop of Thayer. Line From Front to Back-Smart Yachting Dress-Gossamer Material The Braintree Veteran firemen, with For the Daytime.

Perhaps the most striking line of the near future in dress will be the upward tendency from front to back. That the corset is at the root of this will readily be surmised. The corset, or, rather, the corset maker, is at the root of most modistic matters nowadays. Dressmakers and tailors, too, are amiably agreeing to the disposal of flounces and crossway folds, these tapering off in front to fully half the depth reached behind.

To put the matter somewhat differently, a better explanation may be that a downward tendency from back to

Weymouth have voted not to accept front is the aim of the up to date corset the challenge of the Union Veterans of makers, who are shortening their latest models a good three-quarters of an inch at the back of the waist.

Thus the "altogether," taken in one comprehensive glance from head to foot and from the side, will be a pronounced tilt forward, slightly reminiscent, perchance, of the one time acquired "Grecian bend."

The first sketch, besides exemplifying to some extent this favorite line of fashion, shows a gown which is a perfect poem in itself. It is of ivory embroidered point d'esprit, almost covered with graduating applique tucks of of tuckings. The bodice pouches over a wide girdle or basque of deep cream waistcoat. A mixture of lace and chiffon is introduced into the sleeves, with

It lives in a burrow in the ground and cheerfully sings, or at least chirps. But the Makays call everything that at 11.45 A. M. creeps a worm, and the beast which they really mean is a large kind of cricket with a voice.

In the very same part of the world, however, is a real earthworm, a huge monster three or four feet in length, which was discovered not long ago and which really has a voice, or at least of musicus has been given to it on that account.

Wet Wedding Days Preferred. The adage "Happy is the bride that

the sun shines on" is one that is unknown in many lands. A Breton bride takes it unhappily when the day of her wedding dawns bright and sunny. Rain on her marriage morn is held to signify that all her tears are shed and that she will therefore have a happy married life.

It is said that the Erza of Simbrisk call the day before the wedding the weeping day, and the bride and her girl friends weep as much as possible with the idea of getting the mourning of life over, so that only what is joyful may remain. In some countries this result is attained by sousing the bride with water. The Greeks think that a thorough drenching of the bride will bring her Mrs. Beekman Street, Leonora Bradley; Ber-

Keith's Theatre.

One of the strongest bills yet given at Keith's is announced for next week, and this notwithstanding the fact that this week one of the best programmes of straight vaudeville ever seen has been drawing large houses. Among the best of those announced are the great Nevarros, three startling acrobats and handbalancers, who have a most sensational act; George Felix, anothe A little lemon juice in the water in clever acrobat, appears with Lydia Barry in popular favor.

Castle Square Theatre.

The laughable farce comedy, "My Friend Walter Perkins is to remain with the company to play his original character of the barber who has fame thrown at him under such ridiculous circumstances. The audience at this theatre last summer, during the series of performances of this comedy, gave unmistakable evidence of a hearty appreciation of its merry scenes, and its revival will undoubly be a source of pleasant experiences to the patrons of the coming week. Mr. Perkins has appeared as the barber in many hundred performances of the comedy and has made the character one of the prominent dramatic creations of recent years. Some changes have been made in the cast of last season, and the distribution of parts for next week is as follows: A. Keene Shaver, Walter E. Perkins; Erastus Underholt, J. L. Seeley; Charles Underholt, James A. Keane; Tom Valentine Stanley Kent; Rev. James Tweedle, Lindsay Morison; Jennings, William J. Hasson; Bil Finn erty, Edward Wade; Ed. Watson, John J. nice Underholt, Mabel Spencer; Gertrude Underholt, Caroline Frances Cooke; Tilly Mary Saunders.

The expenses of the poor department in Quincy is a very small one on ac-count of the city having been kept in the no-license column for so many years. It is but a few hundred dollars more than is spent in Abington, yet the population of Quincy is more than 23,-000. The per capita tax for Quincy is but 36 cents, while that for Abington is \$1.77. -Whitman Times.

Newport, R. I., Aug. 5 .- The Independence on Saturday sailed the greatest race in her career. In a stiff southwester, which raised a rather heavy York. sea, she was beaten over a triangular ute and 11 seconds, corrected time. This is a better showing than the Con- It is expected that he will make addiunder similar conditions of wind and case comes up.

In the first leg of the triangle, which was a beat to windward, the Columbia gained more than 3 minutes. No official time was taken at either the first or second mark, so these figures are only approximately correct. The regatta committee estimate that on the second leg of the course, which was a broad reach with the wind abaft the starboard beam, the Independence gained 1 minute and 15 seconds on her opponent, while on the last leg of the rse, which was sailed with the wind on the port beam, she gained 35 seconds The last leg was the most exciting. The breeze was puffy and at times had great weight in it. Being about abeam the yachts felt its full strength. Occupants of Five Buildings Buried In Debris

DEATH LIST WILL BE LONG

Explosion of Barrel of Gasolene Believed to Have Been the Cause of a Debris Adds to the Horror

Philadelphia, Aug. 6.-A terrific explosion in a block of six buildings on Locust street last night completely wrecked five of the structures and caused the death of from 10 to 20 or more persons. Over two score of others Some of those taken to the hospitals will up with the pace. die. It is estimated that at least 35 persons were in the five buildings when the explosion occurred, and the exact number of dead will probably not be known for 24 hours.

The buildings were occupied as follows: No. 1008, Houseman's pool and billiard rooms; 1010, Morris Rosenthal's second-hand clothing store, occupied by Rosenthal, his wife and five children; 1012, William Jones, colored, restaurant, occupied by Jones and about 15 boarders; 1014, Gorgee McClemmy's grocery store, occupied by McClemmy, clerk and servant girl; 1016, Patrick Quigley's grocery store, occupied by Quigley, his wife, three children and his uncle; 1018, Albert Mountain's grocery and meat store, occupied by Mountain, mother,

The explosion occurred about 9:30 clock. What exploded and how it happened is not known at this time, but it is believed to have been a barrel four minutes ahead of her other two of gasolene in one of the grocery stores. With the exception of 1008, the front walls of the buildings were blown outward into the street, while the roofs and floors were blown upward and fell long see-saw race with the Virginia straight to the ground. Almost every finelly around the fine 55 s condi-building in a radius of two blocks about BREAD, PIES, CAKES OF ALL KINDS, the scene of the explosion had windows shattered and were otherwise damaged. Every building on the opposite side of Locust street was more or less wrecked,

but none of them fell. A terrible cry went up from the ruins cupants of the wrecked houses could be the agonizing cries of others were heard in the wreckage. From all the surrounding buildings injured people came running and fell in the street unconcious. Fire broke out in the debris the moment it settled to the ground, and in less than five minutes the great pile was burning from end to end. Here and there a person was dragged from the ruins before the fire could reach the victim, several lives being saved by this prompt work.

When the firemen arrived the flames were igniting the buildings across the street. The fire, however, with the exception of a small blaze here and there, was extinguished in a few min-

The work of digging away the ruins was then begun in earnest. While the work of rescue was going on in the exploded block, hospital attendants and others made a search of all the damaged houses on the opposite side of the street, and almost a score of persons were taken from these places to the various hospitals, which were soon crowded with patients.

The buildings containing the pool rooms, clothing store and the restaurant were three-story brick structures, while the other three buildings were 2 1-2

At 2 o'clock this morning the rescurs came across the inanimate body of a colored woman, but the woman was alive and asked for water. She was placed in an ambulance and sent to a hospital. She had been in the ruins 4 1-2 hours.

THE LIFE OF WATCHES.

Influences and Conditions That Affect Behavior of All Timepieces.

"Watches," said the jeweler as he screwed a little glass into one eye and squinted into a case of wheels, "are like human beings in many ways. They are delicate, they run well only when in perfect order, and they require attention once so often, whether they stop or not. They become sick, in a mainspring breaks they are not necessarily done for unless in another world. They can have new mainsprings. We can't.

"Watches, all jokes aside, are really almost human sometimes. They take cold readily. Never lay a watch on a cold marble table or near an open window all night after you have worn it next to your warm body all day. It will contract a sort of pneumonia, and ten to one it will stop before long if the practice is continued. The cold contracts the metal pivots, which, small as they are, must not be smaller, and they shrink. Thus the wheels cannot move. "Watches are magnetized, too, by the

persons who wear them. I have seen the statement that watches vary in time keeping with the health of the wearer and that if changed from one person to another they will also show slight variations. All of that is true. The static electricity of a person may affect a watch. All of us throw this off-some more than others. Dark persons give off more than light ones do and a dark woman more than any one else. Dark women should have rubber cases for their watches if they wish to have them keep perfect time.

"Never lay a watch flat at night after it has been worn in a vertical position all day. It throws it off its base, so to speak. If the pivots be worn, the wheels will not run level.

"A sudden jar will often stop a watch. which runs regularly at that-such a jar as getting on or off a car suddenly The hairspring's catching does this. The jolt comes at the exact fraction of a second when the spring is in a position to catch. This occurs at infre quent intervals, as may be readily imagined. A watch should be fed or oiled every 18 months, even if running in the best of time. The oil dries in that time, and the wheels are likely to wear one another.

"All jewelers examine watches in the same way. It seems to be a tradition of the craft. First, a man will look at the hands, as I have been doing. If they are not caught, they will take out the balance wheel and examine the pin and the pivots, which you see here Sometimes I do not find the trouble for days. The hardest thing to detect is a slight 'bur' on one of the wheels This may throw the entire watch out of gear. "Now, I will wind this watch of

yours and show you that all the trouble with it is that it is run down. Unusual? Oh, no. That frequently happens. Some one is in here every day with an unwound watch, thinking that it is out of kelter because it will not run. They forget to wind it and are afraid to do it over again. Women are our best customers in that line. Of course I could 10 a. m. Fare-Plymouth Excursion, \$1.00; get \$1 for this, but the talk will an- Provincetown, Daily Excursion, \$1.00; stopswer.

"Now, when you go home wind your watch in the morning; no, not at bedtime, but when you get up. That gives it the full spring to work on during the day, when the jars and jolts are more numerous, and hold your watch still when you wind it and wind the key. That's all; try that."

And the jeweler handed back the watch, running beautifully. - Kansas City Journal.

Chinese Uses of Flour.

Throughout central and southern China very little baked bread is used, and the flour is consumed in the form of dough, vermicelli or dumplings filled with chopped meat or meat and vegetables or fruit.

The flour is made into dough and worked into a leathery form by a man operating a bamboo fastened at one end. The worker sits on the other end of the bamboo and presses and works the dough until it is quite tough. It is then pressed into thin sheets and cut into strings, boiled and thus eaten or made into dumplings and then steamed and eaten. In nearly every case it is eaten while hot. This flour is also used quite extensively in cakes and Chinese confections of various kinds. In a great many of the restaurants the native flour made from native wheat is used for the inside of the dumpling and dough bread, and the

finer and whiter flour is used as a covering. The Chinese appetite seems to de mand boiled or steamed food rather than baked. Hence very little foreign flour is baked into bread for Chinese consumption.

Cooking Your Goose. The phrase, "I'll cook your goose for

you," originated in this manner: Eric, king of Sweden, coming to a certain town, besieged it, but, having few soldiers, was obliged to desist. The inhabitants in derision hung out from the walls a goose on a pole. Later Eric returned with re-enforcements and in reply to the challenge of the heralds observed that he had come "to cook their goose for them" and proceeded to storm the town and make it hot for the inhabitants.

Shaffer's Strike Order Will Go Into Effect

Includes "All Union Men in being from bushes cultivated with her Name and Heart"

Great Suffering and Even Bloodshed Are Anticipated

Pittsburg, Aug. 7.-Up to last evening it has been merely a skirmish between the steel combination and its employes, each side trying to find the vulnerable spot in each other's armor. Now it is different, brought about by the actual issuance by President Shaffer of the longtalked-of general strike order. This order was promulgated last evening, to take effect after the last turn of the mills

What the result will be no man can foretell, but, judging by the expressed determination of both parties to the controversy, the battle will be fast and furious. > Refined and Crude Metal Valued at \$280,000 Secured by Skilful Tunneling From Outside the Building In Which Treasure Was Located

San Francisco, Aug. 7 .- The Selby Smelting and Lead company has been robbed of \$280,000 worth of gold bulion. The theft occurred some time Monday night, and was not discovered until morning. The thieves tunneled from outside the building under the vault at the Selby works, which are located on the bay shore, about 30 miles from San Francisco. They secured nearly 1200 pounds of fine gold, worth \$20 an ounce, and escaped without leavng a trace of their identity behind. The robbery is the most successful and remarkable ever accomplished on the

Pacific coast, and was evidently the work of skilled mechanics. It is sup posed that when the robbers secured their loot they loaded it into a boat that was waiting and disappeared in the fog that had arisen over San Francisco bay In their haste to get away they left two old bars worth nearly \$50,000 lying or he bank at the water's edge. The police of all the bay cities were

nmediately notified of the crime, but all they could discover was a few of th tools that the robbers had used.

The Selby Smelting and Lead company is the largest concern of its kind on the Pacific coast. Ores are sent from all over the west country to be smelted and The following official announcement refined, and the gold is then turned over regarding the funeral arrangements has to the mint. A steamer makes special been made: "On Thursday the royal trips between the smelter and the mint at San Francisco, carrying the ores one day and bringing back the refined gold. The thieves had taken the estant church in Cronberg by a torchprecaution of fastening the door of the vault from the inside, so that it would be difficult to open from the outside in case they were interrupted in their work Preparatory engineering, extending

over several weeks, was probably done before the robbery could be acconplished. Close to the wall of the build ing in which the vault is located a shaft was sunk below the foundation. Then a tunnel was run to the vault, and holes were bored in the iron floor until an aperture sufficiently large to admit a man was made. It was then easy work to pass the treasure down into the tun-

nel and load into a boat. The robbers even took the precaution sprinkle red pepper in the tunnel in or contracts, but you never agreed to sur- the United States authorities bond in der to make it uncomfortable for anyone who might attempt to pursue them. There were four fine gold bricks in the vault which the robbers looted. Each was 10 inches long, 5 inches wide and 4 there was stolen from the bullion vault crude gold in all shapes and sizes, and some of it is in bars of different lengths. "It is the boldest robbery in the history of the state," said Chief of Detectives Seymour, "and from all the information that can be obtained at this time

there is absolutely no clue to the rob bers. In fact we don't know whether the crime was committed by one man or five. The probabilities are, however, that more than one man was concerned

"We have taken all precautions to capture the robbers. Telegrams have been sent to every sheriff in the central part of the state, ordering him to search for the missing gold, to overhaul every boat and steamer within his jurisdiction, to search every railroad train and stage coach passing through his country, and to examine everyone taking passage at the different railroad stations throughout the strike. On the whole, I believe the chances are good for capturing the robbers."

Nine Tailors Make a Man.

"Nine tailors make a man" grew out of the old custom of bell ringing. The Hat boxes-or trunks, as you prefer ringing of bells was formerly practiced 32 of chapter 113 of the Public to designate them—one of the comforts from a belief in their efficacy to drive Statutes, which provided that a street of the times, may be bought at from \$6 away evil spirits. The "tailors" in the railway company should keep in repair up, they being so planned as to carry above phrase is a corruption of the end of a knell. In some places the departure of an adult was announced by nine strokes in succession. Six were rung for a woman and three for a child. Hence it came to be said by those listening for the announcement, "Nine tellers make a man." As this custom is the shaft leading from the second became less general and the allusion less generally understood there was an easy transition from the word "tellers" to the more familiar one "tailors."

That inevitable joker, Curran, took advantage of this popular saying to poke fun in a good natured way at his hosts on the occasion of his being entertained at dinner by 18 of the Guild of Tailors. Curran on leaving rose and said, "Gentlemen, I wish you both good evening."

McLaurin Appeals to "Patriotism and Common Sense"

TILLMAN IS DENOUNCED

As a Buffoon and Bully Who Repre sents Ballot Box Stuffers and Murderers-Says His Character Is Debased and His Record Shameful

Columbia, S. C., Aug. 7.-The state Democratic executive committee yesterday received Senator McLaurin's reply to their action of July 25, condemning his course in the senate, and demand ing his resignation. In the course of his letter Senator McLaurin writes:

JOHN LOWNDES M'LAURIN.

"I hold my commission from the Democratic voters of South Carolina. I recognize no authority but theirs. "Personally, I am indifferent to your

action because nobody has made you my master or censor, and I regard what you have done as merely expressing the malice and the fears of one individthis always evil and indecent influence ordinary respect for the proprieties would probably have prevented the four of your committee who are my declared competitors for the seat I now have the honor to occupy from attempting to use the power entrusted to vou by your party to remove a rival from your path.

"I shall ask the people to decide be tween the man who has tried to help cotton factories, open highways of commerce and to so commend the Democratic party as to command for it the confidence and respect of the business and laboring elements, north and south, and that man whose conduct and record has been to sink the party to disrepute and impotence and has postured as buffoon and bully, and who proclaimed on the floor of the senate that he represented a constituency of ballot-box

South Carolina, and to you and Sena master, and never shall be; that he shall not escape the vengeance that must surely fall upon him when the people have been made to understand his motives, his methods, his debased ment, the reserved patriotism and common sense of the people, I make appeal, against partisan intolerance and tyranny."

GORMAN IS "ROASTED" In Platform and Speeches of Republi-

HOWISON IS CHOSEN To Serve on Schley Court of Inquiry In Place of Kimberly

Washington, Aug. 7 .- The vacancy in the Schley court of inquiry, caused by the inability of Rear Admiral Kimberley to serve on account of ill health, has been filled by the selection of Rear Admiral Howison, whose appointment is announced by Assistant Secretary Hackett.

The department, before taking action, had submitted a list of names to Admiral Schley, which included that of Rear Admiral Howison, and Admiral Schley had indicated his entire willingness to accept any officer on the list. The department also communicated the selection to Captain Parker, before making it public. Assistant Secretary Hackett, before issuing the order, communicated with Admiral Howison, and ascertained from him that he had given utterance to no expression of opinion regarding the merits of the Sampson-Schley controversy.

Not the slightest trouble has occurred at any point in the Pittsburg territory, and the Amalgamated men are correspondingly happy because this condition would seem to be the carrying out of the association's new departure in the handling of strikes. The quiet waiting of the strikers may be one of the sur prises hinted at by the national officers. From one or two points the strikers are reported as restiess and eager for action but, so far, have kept faith with their leaders and refrained from committing any breach of the peace.

The United States Steel corporation, i s learned from an official source, will t once proceed in a systematic manner to start its closed sheet mills, making he non-union plants of the Kiskim inetas valley the cradle where strike breakers will be trained and then sen out to the mills that are closed.

The places left vacan at the mills mentioned will be filled with men deserving of promotion, and they will be given better positions. The plan further contemplates that after a time many of the strikers will return when they see one after another of the closed mills resuming.

Should be outside of City Hall. The city owns the buildings on School street, which are unoccupied and at present as eyesore. It may not be an ideal location, and it may be impossible for \$4,500 to convert the old stone building into a model police station, but it would make a very good station—both commodious, strong, healthy and comfortable.

When a patrol wagon is established, which seems to be needed now, an adjoining building, owned by the city, can be utilized for the wagon and also as a stable.

Further, it will postpone the building of an expensive new City Hall and any police station.

### ODD LOOKING TREES.

TWISTED AND DISTORTED BY GALES FROM THE OCEAN.

A Grove on the Jersey Coast Which tastic Confusion - Trees Tortured Into the Form of Letters.

In Japan large salaries are paid to skilled gardeners who can twist and of growth into the likeness of animals. boats, houses and other designs. Of late years the custom has been imported to this country and with it the oriental tree twisters. Not the most skillful of them, however, can beat nature's distorters of vegetation, the persistent winds, and the Japanese experts could learn lessons in the surprising and fantastic form of a grove of trees on the Jersey coast.

The place is aptly called Wildwood. It forms a part of an island cut "T from the mainland by a narrow arm the ocean. For centuries the gales have wrought their fierce will upon the vegetation. Although the soil seems to be largely composed of white sand, it is fertile; otherwise there would not be on the island, in the face of the almost constant winds, the luxuriant growth both of trees and lower forms of vegetable life with which it is covered.

Wild grapes are abundant and vines John Pierce has returned from are seen which are fully 8 to 12 inches thick and have in some cases so completely covered the trees that the arboreal foliage can scarcely be seen Extending along the ground and up the The City Council has reduced its trunks into the branches some of the by coming into contact with their swaying sinuosities in the shady nooks of the place.

The trees themselves have assumed some very odd forms. For instance, there are two which are very similar to the letter "W" and have been called "W" trees by the natives.

In the middle of this curious grove is a lagoon or pond, on the banks of which is one of the oddest formations is still growing, in spite of disadvantages. The trunk has been twisted around so as to form the figure 8 from of the branches or arms at the left forms the head of a snake, including the curve in the neck. The front view of the snake is startlingly realistic, the head being of the true flat topped, venomous type and the posture characteristically viperine. The tree is evidently very old, as indicated by the trunk, and per \$1,000 for the borough of New as its foliage is scant and confined to mystery is why it did not die before,

In the center of Wildwood is a pavilion where refreshments are served to visitors. The principal support of this pavilion is formed by a tree which passes through the center and out of the roof. Its branches form an excellent protection from the sun in summer, while the roof girders are fastened into it in place of the usual posts. All these freak trees are located about a mile from the highway on the banks They form a grove about a mile long and a half mile in width. THE SMART WOMAN. Her Secret Lies Not In Clothes; but In Carriage.

Good carriage is essential to style. No matter what a woman wears, if she does not carry herself alertly and gracefully her appearance is slipshod, Presents a Curious Scene of Fan- but let her learn to stand, walk and breathe properly, and the simplest cos-tume has an air of richness and smartness. There is no skirt made that will appear stylish on the woman who stands with the abdomen protruding. and the smartest shirt waists become a mockery over the hollow chest. These, then, are two of the most common faults in the carriage of the average woman, both the result of ignorance or carelessness, which can only be overcome by regular systematic exercise. To learn to walk and to stand correctly are duties every woman owes to herself, and they should form a part of every girl's early training, for a careless habit once formed is hard to break. Stand well and walk well, and the rest will follow, says The New Idea Woman's Magazine, which discourses of the

'smart" girl as follows: The "smart" girl takes herself seriously, as though she were a poet, and starts out with the determination to perfect herself, body and clothes.

Here, then, is her secret. She knows now to stand correctly, and she has found out that no woman who poises her body properly at the waist line can ever appear commonplace, no matter how simple her attire.

The minute a woman stands lightly on her feet, with

Every full, deep breath she draws strengthens the muscles of her sides and abdomen. She is bound not to grow into a fat, ungainly woman, who can never catch her breath or a train, for a proper poise of the body means good digestion and good health.

It is probably going too far to say that a girl sets about being "smart" in order to be healthy, but it is absolutely true that she is quite likely to grow stronger because of her correct way

of carrying her body.

How many women sink into a little heap the minute they sit down—shoulders drooping, chest sunken, the whole words to the heap the minute they sit down—shoulders drooping, chest sunken, the whole words to the heap the minute they sit down—shoulders drooping, chest sunken, the whole words to the heap the weight of the body thrown on the end the same erect, alort way that she stands, and if she wishes to rest she leans back against her shoulders and Apply to L. #### JURISDICTION IS DENIED

Action of Keyless Lock Company In Neely Case

WILL NOT GIVE TESTIMONY

Raised Points of Law Which May Be the Means of Securing Test of Insuand Cuba-Evidence at Muncie

Indianapolis, Aug. 8.—The denial of dence in the Neely case, as made by the believed, of securing a general test tween this country and Cuba. Commissioner Moors will submit the ques tion to District Judge Baker, and with it the formal refusal of the company's officers to testify.

Arthur Jordan, president, and Arthur R. Baxter, treasurer of the Keyless Lock company, accompanied by their attorney, Mr. Denny, went before States Commissioner Moors and declined to testify as to the contracts which the Indianapolis concern had with the department of posts in Cuba. the same to be used in the prosecution of Neely. Formal declination in written form was filed. In substance the refusal to answer the interrogatories forwarded from the Cuban court under the counter signature of Governor General Wood was based upon this:

They urged that the island of Cuba is question was pending in a foreign jurisdiction to which they owed no allegiance. They claimed that the Cuban court had never acquired any jurisdiction over citizens of the United States and that no law passed by the American congress had conferred upon the Cuban judge the power to vest in a United States commissioner the power to compel citizens of this country to testify against their wish in any case.

Several days ago Commissioner Moors received written authority to take the testimony of the Keyless Lock company officials, from Raymond Barnega y Urbaneja, district judge of the northspecial judge to try the case of "the United States for the island of Cuba against Charles W. Neely, a criminal prosecution.

Assistant District Attorney La Follette had no difficulty whatever in securing evidence at Muncie in the Neely case when he went there recently. No subpoenaes were issued, and witnesses appeared promptly and told all they knew, without reservation.

La Follette's investigation disclosed bad puncture. I just heard an old \$40,000 on deposit in Muncie. Of this \$21,000 was wired to him when he was arrested, for bond. After his release on bond he returned to Muncie and drew \$12,000. He did not have this when

was ever found. Ross Cowan of company testified that his company, of which Neely was a stockholder, had furnished about \$9000 worth of supplies to the Cuban postoffice. It is said this was probably a larger amount than the supplies might have been secured for in the open market, though how much profit the company made on them is not disclosed.

A Crank on Clothes.

Sir Harry Poland, a British magistrate noted for his brilliancy, was always careless in his dress. Once his family persuaded him to go to Poole and order a fashionably cut suit. To the chagrin of the household Sir Harry looked more outlandish in the new clothes than in his old ones. His brother-in-law went to see Poole about it.

"It is not my fault, sir," the tailor assured him. "Every care was taken, but how could we fit a gentleman who would insist upon being measured sitting down?" And the only satisfaction that could

be obtained from Sir Harry l'oland | " himself later on was the dry comment: 'Well, it's my business and not yours. I like to be comfortable. I spend three parts of my life sitting down, and I preferred to be measured so."

GOING TO SCRAP-HEAP Fate of the Independence In Case of

Boston, Aug. 9.-If no yacht can be found to race against the Independence by Sept. 3, Mr. Lawson, the owner, will order her broken up as old metal. This was his instruction yesterday when the only chance for a race against either the Constitution or Columbia slipped by because the managers of those yachts would not enter a regatta in which there was to be a class for 90-footers. The particulars are contained in the following statement, issued by Mr. Clapp, who is Mr. Lawson's secretary:

"The only pending engagement of the Independence was a race under the au spices of the Indian Harbor Yacht club to take place Aug. 24, and Mr. Lawson before leaving on an eastern cruise which he intends to extend until Sept 10, gave instructions to have the In dependence put in the best possible rac ing condition, and to remain at Newpor tuning up. I today received this tele gram from the Indian Harbor Yach club:

" 'Exceedingly regret that, owing to inability to secure entry of either Con stitution or Columbia, we are compelle to call off race scheduled for 24th in stant.

Seven young men of Northamp on have been convicted of disturbing the passengers of an electric car and the total amount of fines they paid was \$100. It served them right. The electric car nuisance is one to be sup pressed and the chief instigators of suppression should be the managers of the roads, who owe this course o action to their patrons. -- Newburyport

Property what its antecedents may property what its antecedents may have thought have been, but as you have thought t of sufficient interest to your readers to allude to it, perhaps I might give a little different version of it.

That house was once a dwelling louse standing nearly opposite Sumner street, within a few feet of where the arge square house was built three or Quarries, Shipyard, and City Plants ur years ago. I cannot say when it was built, but think not far from Copy for changes of advertisements in the 1790 or 1795. My father was born in it Jan. 13, 1800, and was said to be the first babe christened by Rev. Peter Whitney, when he became pastor of the old church, and I well remember the many hours in my boyhood days, in long winter evenings spent in playing checkers with grandpa, and eating greening apples, beside the blazing wood fire, and grandpa's caution when I, boylike, was laughing at some successful trick I had worked, "Don't make such a noise, -folks going by will think we keep tavern here, and all got drunk.

Well, when the place went into ther hands the house was sold at auction, Dr. Underwood bought it, moved it, fixed it up for tenants and finally Miss Vining bought it. Such is my story of the old house.

#### To New York for \$1.

It is perhaps not generally known that it is possible to go from Quincy to New York for less than one dollar and by a route that will prove very enjoyade. The way to make this trip is to go to Providence, R. I., by electric treet cars and from Providence to New York by one of the steamers of the Joy ine. The fare from Quincy to Providence by the electric cars, via Brockton, Whitman and Taunton, with the vstem of transfers now in use is less o New York on the Joy line steamers ifty cents more. The running time between Quincy and Providence is a ittle less than five hours. The route s through a charming country offering an ever changing scene, so that the ime consumed in the trip seems much shorter than it is.

#### Thirty Days.

Unless the Old Colony street railway ompany accept the location for a secand track on Hancock street on or befere Aug. 19, it will become null and oid. The order was approved by the Mayor July 19, and thirty days are allowed in which to accept it. The City Council will not hold another meeting until Aug. 26, so they cannot amend it if they would.

The steel officials are inclined to minimize the sympathetic assistance which the Amalgamated association will get. One official stated the matter this way 'What can the machinists do? Have they not just been beaten? And the

President Shaffer and his associates, on the other hand, insist that the strike order will be generally obeyed, and that they will obtain more than enough support to cripple the steel corporation. "We have those people licked to a standstill, already," was the way that Vice President-elect Gibson voiced the feelings of the Amalgamated people.

With both sides arming for the con fliet and a general strike so near a hand, many ordinarily well-informed persons hold the belief that there wil yet be a settlement of the strike. Some f the men who predict settlement be ieve there will be outside intervention from powerful interests and a submis ion of the dispute to arbitration. The strikers insist that there are not enough men at the Lindsay & McCutcheon establishment to operate the one mill started, and predicted that it would close down during the day. It was kept going, however, until night.

The steel corporation is evidently putting forth its greatest effort at Pittsburg, the headquarters of the strike for the moral effect elsewhere.

Abutters May Defeat Street Improvements.

### Orders Require Releases Before the Start.

Vetoes of Mayor May Also Hold Them Up.

After the season's work of the City Council Committee on Streets, preparing street improvement orders. followed by the action of the City Council in passing them by a small majority, the vetoes by the Mayor and the final passing of the orders over the Mayor's veto, it looks as though the abutters on some of these streets were coming to the aid of His Honor and that it would perhaps be one of those cases when he who laughs last, laughs

In all of the street improvement orders passed this year, the order after stating that public necessity and convenience demand such and such things be done, and making awards for The town of Hull enjoys, if it may land takings and fixing the amount to clause which in substance reads "Providing that all the abutters agee to accept the awards made and sign releases to the city from all further damage. ''

The last clause is a sticker and abutters cannot be blamed if they refuse to sign a release before the street is improved because they cannot tell until the improvement is completed now much the change of grade will effect their property.

On the Howard street order all abutters have signed but one, and he absolutely refuses to sign until the street is completed. On Rogers street, West Quincy the

### The Way to Kill Business.

An Indiana dealer writes to the Monumental News. It is very strangeto see what ignorant fools there are in -In Chinese cities, streets are never the monumental business as wholesalers built straight, from superstious fear and retailers. One of our local dealers that processions of evil spirits might sold a large Quincy job for \$250, and it cost at quarry \$208, freight \$32 and. a \$2 man two weeks to letter it. Add to this his board at \$1 per day and the dealer's time and cost of hauling twomiles and foundation and extra helpwould make actual cost run over \$300. You see what kills the business. Where are they gone, those galleys fair, The treasure ships that sailed the main With snowy sails that caught the air, Sun gilded as a golden stain On ocean's limit? Not again Will they o'er rolling waters sweep,

With seaweed wrapped; they long have kin In darkened caverns of the deep.

What matters now the quick despair, They went the way that all must fare, And brief the struggle, dull the pain, A blurring of the sense and brain, As the engulfing waves upleap, And now they rest on ocean's plain In darkened caverns of the deep.

They lie in halls of ocean, where Forever, with a murmuring strain, The softly swaying waters bear With myriad tongues a low refrain. These light dissolved depths contain What hopes and quests and so shall keep, While sun shall shine and moon shall wane. In darkened caverns of the deep.

There is just a small, round orifice at the end of the snout, through which about two feet of wormlike tongue can wriggle out, and, as this CHRISTIAN ENDEAVOR.

Topic For the Week Beginning Aug. 11-Comment by Rev. S. H. Doyle, Topic.-Enemies and arms.-Eph. vi, 10-18.

In this familiar passage Paul represents the Christian life as a warfare. His residence as a prisoner at Rome may have suggested this figure. The equipment and discipline of soldiers were a daily spectacle in Rome and would naturally suggest such a parallel. The figure, moreover, is an exand cakes were in the closet. About 8 is a struggle, a warfare. It is a fight o'cleck she heard Miss Martha come for God, for truth, for righteousness, and call the cat. After she had gone for justice against the opposites of the old woman took in the milk and these things. It is a constant struggle

"There is no discharge in this war." It continues so long as life itself con-

The enemies and the arms of the Christian warfare are the especial subjects of our study. 1. The enemies. (1) These enemies

are not physical, but spiritual. "We wrestle not against flesh and blood. but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places." (2) Being spiritual, these enemies are invisible. The enemy of the human soul and his hosts are shrewd and cunning and all the more powerful because invisible. 'Their battles are the rush of a sudden ambuscade. They fight not on a pitched field, but by sudden assault and secret and cunning onslaught." (3) The enemies of the Christian are powerful. Just how much power satan has over man we do not know, but we do know that his power is great and is not to be despised, but constantly guarded against. 2. The arms. To meet such enemies

both defensive and offensive arms are necessary, and they have been provided. The Christian soldier has an armor. Paul calls it the "whole armor of God" and specifies its separate pieces. (1) The girdle. The girdle in the ancient armor was the military belt. which held the rest of the armor in its place, and hence was very important The spiritual girdle is truth. (2) The breastplate. The Roman breastplate covered and protected the heart. The Christian's breastplate is righteous ness-not his own righteousness, but Christ's righteousness. (3) Sandals. The legs of the Roman soldier were covered with greaves, a kind of military leggings, and the feet with sandals, a kind of light, spiked shoe. To give swiftness of movement was the purpose of the sandal. The Christian needs to be prompt and swift, and the sandals which assist him are the effects of the gospel of peace. The gospel brings peace. It scatters doubts. fear and inspires courage and promptness in obedience to all orders. (4) The shield. Roman soldiers used two kinds of shields-a small shield, called a buckler or target, which was held in the left hand during a hand to hand strugand protected the armor of the soldier from being pierced. The Christian's shield is faith, unwavering confidence in God, which guards the mind against doubt or unbelief. (5) The helmet. The Roman helmet protected the head and erect without fear. The Christian's helmet is salvation-not merely the hope of salvation, but the assurance The sword. This is the only offensive Christian's sword is the "sword of the weapon Christ beat off satan, and with it we can do the same. Let us put on and keep on the armor of God that we may withstand the wiles of the devil.

He Loves Me.

If God be my Father, He loves me. That means everything to me. It means provision for my necessities, protection in all my vicissitudes, guidance in all my perplexities, friendship in my loneliness, comfort in my sorrows, success in Christian work, victory over my temptations, triumph over sin and at the last an abundant entrance into His heavenly kingdom .-American Friend.

Identify Yourself With the Church. For the sake of others, as well as for your own, identify yourself with the Christian church; be not a visitor, but a member. Example is more potent than word. They simply said position of the Amalgamated association. Some strike leaders said that the order was a bluff that had been worked unsuccessfully before, and declined to take it seriously.

The Dewees Wood plant was founded about 40 years ago, and is one of the best known works in Pennsylvania. Its yards and buildings cover between 12 and 14 acres; it has employed 1200 men at its busiest times, and its cost is placed at \$5,000,000 by officials of the steel corporation.

President Compers of the American Federation of Labor was at the strike headquarters again yesterday afternoon with Secretary Morrison, and was closeted with the advisory board of the Amalgamated association for more than three hours. Before he left the meeting he gave his promise to support the strike, but it was not until 8 o'clock that he gave out a statement, in which he says:

"Since the arrival of Secretary Morrison of the American Federation of Labor and myself, we have been in almost continual conference with the advisory board of the Amalgamated association of Iron, Steel and Tin Workers. We made a thorough investigation of the present strike, of its members formerly in the employ of the United States Steel corporation, and its constituent branches; the causes which led to the strike; the present situation of the controversy; and we unhesitatingly declare our judgment that the position of the Amalgamated association is absolutely justified and essential to its continuance and effectiveness as a as the protector of the rights and interests of its members.

It therefore follows that if the trust, by its great wealth, can prevent the extension and growth of the Amalgamated association it encompasses its disintegration and destruction. The only power, then, standing between the trust and workers as a protector are the tender mercies of its directors. Against such a calamity the sense of justice and humanity organization, are equally aware that

"We shall stand by the Amalgamated association in the present conflict to the full extent of our power, both morally lawful way the men on strike, or who may come out on strike, to maintain the workers in their right to organize, and the extension of their organization so that the only power which stands for their protection and advancement against the avarice of concentrated wealth may be perfected and perpetnated.

"When the overweening rich combine for avariee, power and tyranny, is it not the duty of the workers to unite for home, justice, right and humanity? "If the trust should succeed in its purpose to crush the Amalgamated as sociation the victory would be dearly bought.

"The fight of the brave Boers may end in their undoing, but the spirit of justice, the love of freedom and right suddenly looms up in another part of our world. These principals find lodgement in the hearts of other men who will carry on the battle until they are enthroned in the conscience and every day life of all peoples; so with the Amalgamated association, an organiza tion may be defeated in a contest, but it will not be conquered.

"The Amalgamated association will not be crushed; she will not be conquered; she must not even be defeated. Laving at Boston Watertown, Mass., Aug. 10.-The and financially; we shall aid in every Is Again Brought Prominently Watertown police, with the assistance of Boston officers, succeeded last night in locating a man wanted for two alleged attempts to wreck a train on the Fitchburg railroad at East Watertown. As the result of their investigation, Thomas Maloog, 25 years old, an Armenian, residing at Boston, was arrested last evening by officers from Boston and turned over to Railroad Officer Bradley.

The first attempt to derail a train, it is alleged, was made on Thursday of last week, when a heavy log was placed across the rails, at a point in East Watertown. The obstruction was discovered in time by two boys, who removed it, and later reported the matter to the police.

The second attempt was made a week ago yesterday, near the same point and by a similar method. This time an accident was avoided only by prompt action on the part of the engineer of a train from Boston. He discovered the log on the track and brought his train to a standstill with difficulty. On reaching Watertown the engineer reported the attempt to derail the train. The police commenced an investigation, and suspicion was attached to Maloog.

There is no doubt that the battle of the unions against the steel trust will be the greatest of the kind in the OFFICE HOURS-Until 9 A. M., 2 to 4 and world, as their leaders boast. But there is this about it that makes it an equal fight, the unions are not fighting one firm, but an aggregation which is far more able to fight than any combination the world has ever seen. > The Boston Transcript tells the story of a man who recently purchased an abandoned farm in the town of Paxton, and this year planted 37 acres of it to potatoes. He is now figuring on getting about 400 bushels of the tubers, the early part of which he is now selling in the Worcester market from \$4.50 to \$5 a barrel, and figures out a return of about \$200 an acre from his abandoned farm. If present prices for this vegetable could only be assured as a regular thing, what a rush there might be for abandoned farms, and the name of Pingree and his potato patch would win fame. - Haverhill Gazette.

A Career Ending Joke.

This is a true story about one of the mayors of Kansas City. He was mayor when the incident occurred, not so very many years ago. Two newspaper men, both very good friends of the mayor, were about to leave town, and they sked Mr. Mayor to help them celebrate their departure.

The Legend of the Snowdrop. An old legend gives the following as the origin of the snowdrop: After Adam and Eve had been driven from the garden of Eden Eve was disconsolate. One day as she sat silently grieving an angel appeared and sought means to 10 Cakes Napiha Soap, comfort her. She longed for the flowers, but the fast descending snow was wrapping the barren earth in a robe of white

As the angel stood and spoke words of hope to the weeping, repentant woman he caught a snowflake, breathed gently upon it and said:

"Take form, pure snowflake, bud and blossom and be a comfort to humanity, now and forever."

In a twinkling the snowflake changed into a beautiful flower, as white and pure as the snow itself, and when Eve beheld the newborn blossom gladness and hope came to her heart, and she smiled through her tears.

Having fulfilled his mission of love, the angel departed, but where he had stood there immediately sprung up a circle of perfect snowdrops.

An Æolian Harp.

To make an æolian harp construct a box of very thin pine, cedar or other wood, five or six inches deep, seven or eight inches wide, with a length equal to that of the window in which it is to be placed. Across the top, near each end, glue a strip of wood half an inch high and a quarter of an inch thick insert wooden pins, like those of a violin, to wind the strings around, two pins in each end. Make a sound hole in the middle of the top and string the box with small catgut or first fiddle strings. Fastening one end of each string to a metallic pin in one end of the box and carrying it over the bridges, wind it around the turning pin in the opposite end of the box. Tune the strings in unison and place the box in the window. It is better to have four strings, but a harp with a single keep free from rust a long time, even string produces an exceedingly sweet

HOW THE GREEN HIDE IS PREPARED FOR THE MARKET.

The Operation Is a Strange One From Beginning to End and Comprehends a Number of Different

Manipulations by Expert Workers. The making of leather is an art of which most people understand little. It can safely be said that this trade is one of the greatest and yet most obscure of all our industries. During the past few

The preliminary steps in tanning are by no means what you would call of an æsthetic nature. The hide as received in the rough state is covered with hair and bristles, which must be first removed. In order to do this properly the hide is thrown into a vat of warm soap water and left there for at least three days. At the end of that period, if found to be in a suitable condition, it is drawn out and run through a queer looking machine. This apparatus consists principally of three rollers. The largest one, a massive affair, revolves rapidly from right to left. The next one in size moves in the opposite direction is covered with small knives. These knives are not visible owing to the great velocity of the roller, it making over 1,800 revolutions a minute.

It takes but a second to run a hide through this press. The operator, a strong, determined looking individual, seizes the skin firmly with both hands, swings it around once or twice and then slips it dexterously between the great rollers. There is a muffled sound, and, presto, the skin falls out devoid of all flesh. The hide is then placed in a vat of limewater, where, under the action of the lime, the hair becomes soft and loose. In a day or so it is again taken out and sent to the press. This time the third and last rolled, which is covered with small round stones, is the same way as the knives did the

The hide is then given a thorough washing or sopping out. For this purpose a huge wooden, barrel shaped apparatus called a "bater" is used. Within this bater are long projections made of hard wood. The skin rests upon these while the wheel revolves. As seon as a proper angle is reached the hide slides off and falls with great force to the bottom. Here it is once continued until the hide becomes per- tien at Middleboro. feetly clean and spotless. It is then ready to be tanned. Great vats of dull, deep colored liquid are now utilized.

The making of this liquid is a process by itself. The bark, either oak or hemlock, is first broken up and ground into fine bits and then conveyed into huge tanks called "leeches." These tanks contain about three-fourths bark and owing to long usage. The mixture the biggest string of her party. steeps for a number of days, long erough at any rate for the liquid to regain its strength. It is then strained The old liquid in turn flows back to the leeches. In this manner the old is

made new and the new old. The next step is called "shaving." of the hide and making the surface Downs church on Sunday. smooth. A small, knife covered wheel having a great velocity does the work quickly, but not satisfactorily. Each hide must be gone over again by hand. This is called "currying" and is one of the most difficult operations in the act of tanning. The "currier," in fact, must have been raised in the business. A long, fierce looking knife is used. Taking this in both hands, he bends over the skin, which lies before him on a thick board, and with skillful strokes removes what the machine has left, besides giving the surface a most beautiful grain. To do this rapidly and still keep the razorlike edge on the blade requires years of practice.

The hides are then washed, weighed, a mammoth wooden tank about 10 feet by 20 feet, with a capacity of from 200 to 300 pounds. It is here where the grease and fatty substances which have been removed from the hide in the various processes are restored. As the tanner says, "Life is given in." Were it not for this grease the hide Nantasket. would be dry, hard and easily torn. It is here also where profit and loss figure the most. The tanner depends entirely upon his judgment as to the amount of fat to be added; too much or too little, and untold damage would result.

The skin now passes through the to the "finishing" room, where it is made ready for the market. This last step consists in blacking and glossing one side and imparting a fine grain to the other. The process is then completed. Thus a fleshy, hair covered hide is two weeks. made into a beautiful piece of leather. The operation is a strange one from beginning to end. If you ever have the time, visit a tannery and see for yourself.-Kansas City Times.

#### Food and Force.

The best nourished individual, other things being equal, is the strongest and most useful, and the best fed nations, other things being equal, are those which lead the progress of the

world. An abundance of food is to be regarded as the essential foundation for all individual, social, economic and national aggrandizement.-Dr. Wiley in Everybody's Magazine.

attached to the contests because of the absence of Malcolm P. Whitman of Harvard, the present holder of the title. Whitman stated last year that he would not enter the lists in 1901, and in following out that policy has given the lesser lights in the arena an opportunity to come within striking distance of the premiership. Whitman so clearly outclasses the field of singles experts that another victory would have been his if he had chosen to participate.

Whitman's withdrawal leaves the "balance of power" unmistakably with Dwight F. Davis of St. Louis, the millionaire donor of the international challenge trophy; William A. Larned, winner of the all comers' tournament at Newport last year, and Beals C. Wright of Harvard. These three men will put up a master fight for the victor's wreath. Davis will probably win the ed, and his endurance is remarkable. Davis, with Holcombe Ward, his partner in doubles, gave a splendid exhibition of tennis at the English championship contests at Wimbledon. Davis it was who originated the "twist" service which has caused much comment

of late on both sides of the Atlantic. Davis has a style of play that is unique. He is left handed and always hits the ball with the greatest amount of power that he can muster. He knows no medium stroke and hazards everything on his ability to "kill" the ball. Many opponents find it impossible to return a ball after one of his swashes. In his recent matches at Longwood, Mass., the St. Louisan has evidenced championship form, and his twist service showed all the vicious "side breaking" that proved a source of terror to the Englishmen. The wonderful physique of Davis and his amazing ability to slug the ball for hours at a time at top speed are traceable to his love of outdoor sport. At his St. Louis home he plays golf, polo and rides to the hounds in addition to his play at

The peculiarities of the twist service are not widely known, and a few words of explanation are seasonable. This service causes the ball the instant it touches the ground to fly at almost right angles to the course of the service. The reason for this is the downwith a side motion at the moment the

the far famed Crichton. The first candidate for governor that I ever saw was General Thomas E. Bramlette of Kentucky. He was also the first person I ever saw who used the now fashionable eyeglasses which are hooked over the nose and have no pieces extending back of the ears to hold them on. Bramlette was a widower, and a handsome one at that. When he wanted to read something, he put his eyeglasses on his shapely nose and, with an arch look and graceful ladies will not deem my heart as old as my eyes are." I have always considered that a very neat remark. I was only a "chunk of a boy" when I heard him say it, but after 35 years I still rank it among the brightest sayings bounded and contagious. That great Bramlette's idea fits Senator Depew's country and secured for Horace the case and character. His heart is still Democratic indorsement. Depew on Humorous Oratory.

On a Christmas excursion of the famous Gridiron club to Charleston Senator Depew, Senator Tillman and myself were the guests of the club. I asked him how it happened that, while people manifested a tendency to depreciate humorous statesmen, the fact that Abraham Lincoln was one of Amer ica's half dozen greatest humorists in no way detracted from his reputation for wisdom. The senator replied:

"While the American people will not elect a man president who has much reputation for humor, if a president develops that faculty after election they appear to think that that is clear gain rifle of Civil war times, died at Wash-Lincoln's humorous gift was well known to his Illinois neighbors, his reputation prior to his election to the presidency was bottomed on his debates with Douglas, and in the campaign of 1860 the issues were so grave and the contest so absorbing that the personality of the candidates was lost sight of."

Then the senator told this curious story of General James A. Garfield: "In the fall of 1880 I was booked for some speeches in Ohio. Garfield had written me to visit him at his home. It so happened that I reached Chio the next day after Maine had gone against the Republicans at the September state election. Things were several degrees pluer than indigo. Arrived at the station, I inquired if I could get a carriage to convey me to General Garfield's residence. A fellow with a broad grin on

For years there has been no trace of humor in my speeches. More than that, I never am tempted to use it, and really I have lost the power of enjoying humor in other men's speeches.'

Some one asked the senator what he thought of Garfield's remarks. "I hardly know," replied Mr. Depew, "but I wouldn't exchange the fun I have had in this life for the presidency."

Depew's Pathetic Story. Mr. Depew then told this pathetic

"Shortly after Horace Greeley was nominated by the Liberal Republicans he sent for me to visit his office, and I went. He solicited me to go into the movement, and I refused, explaining to him gently as I could that his election was impossible because the Democrats would not support him. The leaders might and probably would do so as a matter of good politics, but the rank and file of the Democrats, upon whom he had been pouring vitriol for 40 years, could not be brought to stand by him with anything like unanimity, and the sequel showed that my first impression was correct. But Mr. Greeley

"'Chauncey, I am in the crisis of my fate. The opportunity of a lifetime has come to me. If the Democrats nominate me, I will be president. Democratic leaders all over the country have given assurances that they will nominate me if proofs are forthcoming that enough New York Republicans will support me to carry the state. To test this a meeting of Republicans friendly to me is soon to be held at Buffalo. I want you to attend that meeting, for my success in November depends upon the showing made there. You are personally known to more people than any other man in the state. Your active participation in that meeting may and probably will turn the scales in my favor. Since you first entered politics, a mere youth. I have been your friend and The Tribune has been your stanch advocate, always ready to advance your fortunes. You must go; really you must.'

"He kept on in that strain. I yielded my judgment to the call of personal bow to the audience, said, "I hope the friendship and attended the Buffalo meeting. It was a monster affair. Most of the prominent Republicans in the state were in attendance, hundreds of them upon the stage. 'Greeley!' was the cry, and the enthusiasm was unwhich my memory retains. Governor demonstration stirred the heart of the the nomination for lieutenant governor. Things went on swimmingly until the is past 66. Everybody was anxious greater still as a conversationalist. to get to cover. The result in North Carolina demonstrated to all the world what I told Mr. Greeley in the beginning, that the body of plain Democrats, men who expected no office and wantrichest and most marvelous store of cause of the associations of a lifetime reminiscences contained in any human or because of love of the party name or party principles, would have none of him, but I believed then and believe now that had North Carolina gone Democratic at the October election Greeley would have carried New York by 500,000 majority and would have received every electoral vote south and

west of New York. When Greeley's Mighty Heart Broke.

"A few days before the presidential election I visited Mr. Greeley at his country place at Chappaqua, where he had spent the happiest hours of his busy and useful life. He was in his library, which was strewn with papers, illustrated and unillustrated. The bottom had dropped out of his canvass, and he at last realized it. He was in deepest distress, haggard, wan, nervous, excited. He read me several bitter and brutal articles about himself and showed me many cartoons belittling and ridiculing him, and he bemoaned his fate in a most pitiful manner. I tried my best to soothe, console and sustain him, but without avail. After a good deal of pathetic talk he

"'Chauncey, I am ruined, utterly ruined. The Tribune, the idol of my heart, to which I have devoted my best erergies and which I hoped would be my monument to coming generations, will be destroyed. I have done right because I loved the right. I advocated prohibition because I deemed it right. I fought slavery because I thought it wrong. But these papers represent me as a drunkard and the most brutal slave driver in the land, and the worst of it is that thousands of negroes whom I helped to free will believe these monstrous lies.' With that he placed his arms upon a desk, his face upon his arms, and cried and sobbed like a little child. He refused to be comforted, and his mighty heart broke in my presence in his library at Chappaqua. In a few days he was in CHAMP CLARK.

Castle Square Theatre.

The charming play, by Henry Arthur Jones 'The Bauble Shop" makes the Castle Square Theatre attraction next week. It was seen some five years ago at the Hollis Street Theatre and enjoyed great tavor with Boston audiences The story of the play is largely identified with scenes in the life of a prominent member of the English Parliament and its name originated in a remark by Oliver Cromwell, in the dissolution of the Parliament of his day, "take away that bauble." The plot is cleverly worked out and the characters represent interesting and amusing types of many walks in English social life. Shaffer's Strike Order Ignored by Westerners

MASTERS APPEAR SATISFIED

While Strike Leaders Say They Will Show Their Strength Later-Counting Upon Strong Aid From Federation of Labor and Others

Pittsburg, Aug. 12.—The iron masters are claiming victory in the great steel strike. They base their claim upon the refusal of the Amalgamated men at South Chicago, Joliet and Bay View to obey the general strike order of President Shaffer and their success in main taining operations in other plants where it was anticipated that there would be serious trouble.

The strike leaders meet the claims of victory with the assertion that their cause is making satisfactory progress and that they will show themselves masters of the situation before the contest has progressed much farther. They do not conceal their disappoint ment at the refusal of their western brethren to join with them in the strike but none of the leaders would discuss the deflection.

President Shaffer refused to meet the newspaper men who sought him, and kept within the seclusion of his home. The other leaders who were seen in timated that there would be no developments today and throughout the week that would materially change the sit uation. They would not say, however what they had in mind, or how their cause was to gain in strength. It was strong aid from the American Federation of Labor and other organizations of union labor, but those bodies have not yet given any public indication of what they will do.

A STRANGER ON THE BLOCK

And How She Showed the Spirit of True Neighborliness.

True neighborliness is lacking in city life. The essence of it is wanting in that woman who calls on the newcomer in the block whose child is taken for its airing by an English nurse in a uniform of black gown, white cuffs, collar and cap and whose door is opened by a man in livery, but who leaves uncalled upon the modest lady who so far steps cleaned by a small colored girl

with her hair done up in pigtails.

True neighborliness makes no such nvidious distinctions. It doesn't depend upon servants at all nor upon the presence of marble statues in drawing room windows, and therefore it is not to be found in the mercenary city. Its real home is in the rural town, when the one curtain stretcher on a street is looked upon as public property and is just as often to be found in the hom street have gone to Hingham for the Smith, though the latter, simply be cause it was paid for with her money sometimes selfishly tries to delude her self into believing it belongs to her.

A woman visiting in Baltimore tells this story to illustrate the feeling that exists between neighbors in her native town in a county of western Maryland The woman is looked upon as an authority in most matters by those who surround her, and so one morning, when the maid awakened her at 7:30 o'clock to tell her that a young person wished to see her in the library, the woman jumped up hastily and donned the things she could get into quickest, wondering meanwhile whether Mrs. Allen's baby had another spasm or it

> Watchman Saved Four Lives Jersey City, Aug. 12 .- Mrs. Olga Mich aelkof, who has had insane attacks, took her three children, 8 and 3 years and 18 months, to a bridge over the Morris canal, and attempted to drown herself and the little ones. She first threw the two older ones into the canal and then, with the infant clasped in her arms, leaped in herself. A watchman jumped in and dragged the woman and infant out, and then the other two.

Sampson's Retirement Anticipated Washington, Aug. 12.-Having in view the possibility of the early application of Admiral Sampson for relief from duty as commandant of the Boston navy yard, pending his retirement, the navy department officials have selected an officer for assignment to that duty. The admiral has been in delicate health for some time. The name of the officer selected to succeed him has not been announced.

Gold Worth \$20,000 Missing Seattle, Aug. 12.-A telegham from the Apollo Mining company of San Francisco states that a gold brick, valued at \$20,000, which was shipped from Unga, Alaska, via the steamer Newport, July 20, has not arrived in that city. The treasure should have reached San Francisco several days ago.

3 O'CLOCK. A SHOW OF STRENGTH

Balance Apparently In Favor of Steel Trust

MORE MILLS ARE CLOSED Gomez Does Not Want It and Favors

But the Number of Men Out Is a Disappointment to Strike Leadersof Western Amalgamated Men

Pittsburg, Aug. 13.—The struggle for part as follows; mastery between manufacturers and men in the steel industry is now fairly launched, and on the first show of strength advantage is with the former. The general strike order issued by President Shaffer of the Amalgamated association has so far been obeyed by only about 14,000 men, according to the best figures obtainable. The first two preliminary calls were answered by about 45,000 men, so that the total number now out is in the neighborhood of 60,000.

The strikers made- gains yesterday over the showing of Sunday night, and their prospects for further accessions at both McKeesport and Wheeling dur ing the week are very favorable. The action of the Amalgamated men a Chicago, Joliet and Bay View in re fusing to come out, and their failure t secure any recruits in the Carnegi group throughout the Kiskimeta valley and the big plants at Youngs town and Columbus. O., have been markedly disappointing to them. They are keeping up a spirited fight, how ever, and claim that they have strength in reserve which will surprise their op-

The men who are directing the figh in the field for the steel corporation and its constituent companies would give no indication of their plans for the future, and would only discuss the sit uation generally. Their reports showed that the Carnegie group, Chicago, South Bay View, Joliet, Youngstown, Columbia, the Kiskimetas valley group, Wellsville and Monessen wer going along full handed. Bellaire their advices showed, was badly crip pled, but had held on until 5 o'clock in the afternoon and would be started up again today. They admitted the los yesterday of the National Rolling mil at McKeesport, which they had expect ed to hold, and that the Boston mill and Monongaliela Steel works at McKees port, and the Republic and Elba, Pitts burg, were tied up. Their tube works at McKeesport and Pittsburg were still at work, but menaced by a possible short age of material. Their tube men a Wheeling were out, but the furnac and coke men there were at work, and their steel men there showed an inclination to stay on unless intimidated.

It was stated by the steel officials that Clark's mill was moving along, with its non-union crews engaged last week, and that another mill manned by old Amalgamated men had started up at Wellsville, representing a gain of one there since Saturday.

Two hundred and fifty butt welding helpers came out last night and crippled the great butt-welding plant of the National Tube Works at McKeesport The strikers are nearly all boys under 18. Fully 2000 men will be forced to quit work, and the entire department, consisting of 4800, is expected to be idle.

San Francisco, Aug. 13.—A force of divers, under the management of the Pinkertons, yesterday took \$65,000 worth of gold from the spot where it was hidden by Winters, making \$200,-000 already recovered. It is expected that the remainder of the stolen treasure, amounting to \$80,000, will be recovered inside of 24 hours. The fact that Winters has not been charged with any crime leads to the belief that he will be leniently dealt with for confessing the crime and pointing out the spot where he secreted the bullion.

SHAMROCK "SIZED UP"

Most Graceful Yacht That Ever Challenged For Cup

BOW'S PENETRATING POWER

And Whole Construction Above the Water Line a Wonder of Naval Architecture-What Her Underbody Is Like Remains a Secret

New York, Aug. 13.-Shamrock II, as she lay at her anchorage off Stapleton yesterday, had many visitors. She was examined by the critics and nautical experts, and the general verdict was that she looked handsome. More than that it would be undiplomatic to admit. The easy, graceful lines of a racing yacht above the water line are not the factors that produce the speed that wins prizes. It is the form of the craft below the waterline-the shape of the underbody, in fact, that does successful work in the way of "lifting"

That Shamrock II is by far the handsomest and most graceful yacht that has ever challenged for the America's cup must be conceded. The bow of Shamrock II reminds one of the Columbia. It has vast penetrating power and divides the water with ease. The whole forebody of the challenger, in fact, shows a clever adaptation and skillful modification of the forward sections of all the good parts of the Watson and Fife and Herreshoff creations. The stern, too, tapers beautifully. The graceful way in which Mr. Watson has disposed of the great beam of the challenger-the factor which, in combination with her 90 tons of lead, gives her immense sail carrying power-is, indeed, a wonder of naval architecture The sweetness of the lines and the facility of the curves lead one to believe that the underbody has some surprises in store.

From the waterline to the covering board Shamrock II has all the attributes of a racing yacht. She will cut the water clearly and she will leave little fuss behind. That is all that can be predicted of a boat whose mysteries

There are a few things, however, that cannot be hidden. She has the some powerful bowsprit fittings that characterized the two Valkyries, the same the same turnbuckles for setting up the standing rigging that have been features of the Watson boats. She steer with a tiller, and from all that can be gathered from the conservative men aboard, she is an excellently well balanced boat, always under her helmsman's control, and never showing a tendency to take charge of herself in a

When the tug Lawrence towed Shan rock II into the Erie basin, at a little after 4 o'clock yesterday afternoon, a big crowd welcomed the Irish yacht Arrangements were made for taking out the jurymast of the Shamrock to day. Then the racing mast will be stepped-that gigantic spar, lower mas and topmast combined-the like of which never before has been seen or a single masted craft. After this the yacht will be put into dry dock and the accumulation of seaweed and bar nacles removed.

Columbia Won on Time Allowance Newport, R. I., Aug. 13 .- The Constitution yesterday covered the course of 30 miles in 33 seconds less time than the Columbia. The champion of '99, how ever, won the race on time allowance by about 30 seconds. No corrected time can be given, as the boats have not yet been remeasured as requested. In previous races the Constitution had al lowed the Columbia 1 minute and 17 seconds. What change in measure ment the new rig of the Constitution the captures were made in Orange River has made is not known, but it is estimated that she now allows the old boat only a few seconds less time, if any.

HULTMAN'S HOBBY.

That Trublesome Clause in Street Improvement Orders.

Some of the members of the City Council have done a great deal of hard talkers. thinking since Saturday, when they read in the Ledger that after all their season's work and deliberation over the special street improvement orders, that it will probably be impossible for the Commissioner of Public Works to carry out their wishes because of the failure and accept the award made by the City Council.

The clause, which is proving a stumbling block in carrying out the 12 25 45 12 30 02 provisions of the orders, was tacked 2 08 (0 2 14 22 onto all of the street improvement 3 08 00 3 14 22 orders had its birth in the Committee voted in the negative on the larger part of these orders when they came up for final passage, is said to to have been the father of the clause which in the Committee room was known as "Hultman's hobby," and the seven wise men when they voted to add that clause had little idea that it would work as it is apparently doing.

Whether Councilman Hultman made his motions with malice aforethought, or whether he simply had the welfare of the city in mind, is a question, but there are grave suspicions in view of later events that he knew what the outcome would be.

But the deed has been done, and the orders are now beyond the control of the Council and they remain unexecuted.

Commissioner Knowlton has been waited upon by a number of the of the United States, and the second Councilmen to learn if the Ledger's statement was based upon facts, and upon learning that it was, they have Quincy as follows: gone away with long faces.

It is said that when the Counci what entertainment they had for the railroad during the month of July were meets again that the City Solicitor will be asked to render an opinion as to whether the clause in question is legal. As is it against the rule of lawyers to give an opinion off-hand it will be almost too late to do anything Mr. and Mrs. N. O. Parker and Mrs. this year if he should rule the clause illegal.

Should he rule the clause legal, the orders must remain inactive unless the Councilmen intrusted take off their coats and persuade the abutters to sign

the releases. Councilman Hultman when seen about the clause, acknowledged that he was the instigator in having it attached to the orders, and furthermore inti in the future "Hultman's hobby" will not be tacked onto street improvement

Unique American Families.

The Harrison family, like the Adams d, Neponset. family of Massachusetts, on its illustrious genealogical tree carries the names of one signer of the Declaration of Independence and two presidents of the United States, and in this record the Adamses and the Harrisons stand apart in a class by themselves. These distinctions in one family, it can be noted, will never again be equaled. It remains unique in the history of the country .- National Magazine.

Strike Situation Shows No Material Change

STRIKERS' HOPES RAISED

By Desertion of Ten Men From Carto Have Filled Their Places-Both Sides Confident of Victory

Pittsburg, Aug. 14.-Neither side moved decisively yesterday in the ployers and employes in the steel trade. and the result is still in the balance. McKeesport, Wheeling and Bellaire, but in the main, the advantage is still with the mill owners. Both sides claim to be preparing moves that will bring confusion to their opponents, but neither side had shown its hand. The general situation can be briefly summarized as follows:

Ten men, five of them skilled, quit work at the Lower Union mill of the Carnegie company in Pittsburg, and joined the strikers. Their defection represents the first break in the Carnegie forces of more than 15,000 men. The strikers were jubilant over the incident, but the company claims to have filled the strikers' places at once, and that there will be no more desertions at any of the plants. The Beliaire plant, at which the men struck on Sunday, was finally closed down vesterday after working short handed until Monday afternoon. When another start will be made is problematical.

Several hundred boys, employed at the National Tube Works at McKeesport, went out, and their action materially aided the effort of the strikers to finally tie the plant up. The works are going ahead short-handed, but the ranks of the workers are thinning, and the supply of material is limited.

The strikers made gains at Wheeling, and the steel officials admitted that Benwood would be closed down. Clark's mill, at Pittsburg, is moving along full handed. A break in the ranks of the men who struck at Painter's is expected, but the strike man-

agers deny that one will occur. Another break is reported as possible at Newcastle, but there are as yet no positive indications of it. The Amer ican Tin Plate company has a small force at the Crescent plant in Cleveland, and is also planning resumption both points with non-union men. The steel corporation has ordered that the Chartier's plant at Carnegie be dis-

mantled and removed to Leechburg. So far good order has prevailed, although the steel officials assert that there has been intimidation at Wheel ing, McKeesport and Pittsburg, Both sides express their confidence in ultimate victory, and are actively carrying forward their respective campaigns. The number of men out as a result

of the general order is now roughly estimated at 16,000, and on the three orders at 62,000. Many strikers have found work in independent mills, or at other occupations, and many are idle merely because the skilled men are out. The steel corporation held its ground at Chicago, Joliet, Bay View, Youngstown, Columbus, the Kiskiminetas valley and the Carnegie group, with the exception of the instance named.

The strikers are considering plans for breaking the decision of Chicago, Joliet and Bay View to stand with the steel company, but what they Man to do has not yet been made clear. They with both dishonesty and disloyalty.

Tighe Will Investigate

Chicago, Aug. 14.-Without notification to the officers or members of the Amalgamated association in South Chicago, Assistant Secretary Tighe of the national body has arrived in Chicago. He at once set out for the scene of the meeting of last Sunday, which has stirred the national officers of the union. The purpose of the meeting has not been announced, but Secretary Tighe does not deny that messages from Mr. Shafter to the lodges will be read, and that an attempt will be made to have the vote of last Sunday reconsidered.

Solons May Aid Strikers

Austin, Aug. 14.-A resolution was offered in the state legislature yesterday pledging moral and financial support to the steel strikers and requiring members to contribute \$1 per day of their salaries to aid the strikers. The resolution went over until today.

Thousand Cloakmakers Idle New York, Aug. 14 .- About 1000 cloak-

makers went out on strike yesterday. The union decided, instead of ordering a general strike of the trade, to order individual strikes against the manufacturers who refuse to pay the scale asked for. The demand is practically for the wages of last year.

The Revolutionists Take Alcalde and Policemen and Retire to Mountains, Taking With Them What Arms and Provisions They Could Find

Washington, Aug. 14.-The state department yesterday received mail advices from three different quarters in Colombia, all showing revolutionary movements in progress and a rather serious condition of affairs. Although these letters have taken some time to come forward yet they give the state department about the best and only definite infor mation which is at hand as to the con dition of affairs.

Mr. Gudger's letter says that on July 26 and 27 about 75 revolutionists entered the towns of Gatun, Bohol, and San Pablo, on the line of the Panama railroad, midway between Panama and Colon, made prisoners of the alcalde and several policemen, and retired to the mountains, taking with them what arms and provisions they could find. He says that reports were current of revolutionary gatherings at other points and an attack on the Panama railroad was feared. A general uprising seemed imminent, and the government was becoming alarmed at the situation. This letter is dated July 29, and does not refer to the holding up of the train at Matachin, reported by him by cable, as that happened later, and did not result

in any looting. The attention of public officials has been attracted to the manifesto issued by General Uribe Uribe, leader of the Colombian revolutionists, declaring for a "greater Colombia," and, although nothing of an official nature has been received on the subject, it appears to bear out the ideas held for some time Thomas Lipton, in the course of which as to the scope of the present trouble. he expresses himself as confident of the According to the mainfesto Uribe Uribe

are required there. Reported Killing of Uribe-Uribe New York, Aug. 14.-The Times says: According to El Conservador, a semiofficial newspaper published at Barranquilla, Colombia, General Rafael Uribe-Uribe was killed at San Cristobal, Venezuela, on July 27, while fighting with the Venzuelan troops against the

Colombian invaders. El Conservador's authority for this report is a message sent by General Iguaran, in charge of the Colombian government forces at Rio Hocha, to the commander-in-chief at Barranquilla. The Colombians engaged in the fight at San Cristobal were led by Rangel

Carbiras. Much excitement was caused among Colombians here by the report. The friends of General Uribe-Uribe consider it significant that the Colombian gov ernment has not sent the news by cable to its representatives, for the Colombian consulate here has not been officially notified. While there is nothing definite on which to base a denial of the report, the general's friends discredit it on the ground that several times during the rebellion, a year ago, General Uribe-Uribe was declared killed in bat-

No direct news has been received from General Uribe-Uribe since June 15, when it is said he sailed from this city for Venezuela. Colombian officials said that he went there to secure aid from President Castro in the shape of arms and ammunition to continue the rebellion. Since then A. J. Restrepo the diplomatic representative of the insurgents, has received indirect information that General Uribe-Uribe reached Colombia safely, and is fighting at the head of 15,000 men.

Drift of Opinion.

Two grievous mistakes ar requently made. The first one is to say that ours is the best country in the world, therefore it has no defect, and the man who says it has, is no patriot and no better than he ought to be. The second is to say there are many defects in the organized life of eet, and at Freight Office, Quincy Adams the American people: ergo, the country pot; James C. Gillespie's barber shop, is going to the dogs and he who does the American people: ergo, the country not see it is, a timeserver and a demagogue. - Christian Register.

After the house-to-house canvass of assessors in the cities and towns of the state comes that important announcement to the taxpayers, the rate per thousand on their property. Several such announcements have already been made, and some conspicuous increases in rates are noted. The question uppermost among those directly affected is the reason for the rise, and where it is attributable to municipal extravagance there are justifiable murmurs of discontent. In this era of higher wages, shorter hours and more costly materials, due allowance, of course, must be made for the natural increase in the expense of carrying on governmental, as well as commercial affairs of every nature. Fortunate indeed is the city or town with officials possessing the business foresight to postpone public undertakings that can wait until a cycle of lower values returns. It is the height of folly for a city or town to indulge in work that is not urgent in prosperous times, if it can just as well be done at a time when values are lower and when citizens will be benefited

Extent and Industries of Quincy a Surprise to

Members of the Highway Association,

The Quarries, Ship Yard and the Shore Visited

The annual field day of the Massachusetts Highway Association was held in Quincy Tuesday and according to the expression by several of the visitors, it was one of the best outings the association ever had.

Everything possible was done to make the visitors feel at home and enjoy themselves, and the program of the day was so arranged that there was not an idle moment, and therefore the visitors had but little time to think about building streets. Some of them, nowever, could not entirely forget their profession and there was a little shop talk, but very little.

The out of town men appeared deeply nterested in all they saw, and were omewhat surprised at the extent of he city, its granite resources and its ndustries, and it is safe to say that hereafter the mention of Quincy to them will recall to mind pleasant thoughts of the day spent within her orders. The Lord was kind and gave them good weather, and Mayor Hall and Commissioner Knowlton did the

Much interest was manifested in the work at the quarries and many would have liked to have remained longer, but time would not permit. The party arrived at the Water Works shop on time, and after an examination of the shop, a lunch was served by Lee.

The party arrived at the Fore River ship plant a few minutes before 1 loss of a part of the crop, because of o'clock, and was divided into squads, their inability to get hands enough a guide being furnished to each, who explained everything as they went along. All of the buildings in the plant were visited and the modern application of electricity and compressed air were revelations to many. Wonderful machinery, were the words heard during a temporary stop of the oneumatic steel cutting machine or

They were not permitted to go upon the torpedo boat destroyers but were allowed to climb the long steep run to the deck of the cruiser DeMoines, and look down deep into her hole; to feel the rush of heat that came up, and hear the almost deafening rattle of the riveters that work below. Work on the cruiser is progressing rapidly, and according to the guide was fifty per cent. completed.

The squads all came together in the forge shop around the twenty-ton trip hammer about 2 o'clock. A massive steel crank was being heated in the number of the citizens have gone in for blast furnace and word was passed a nautical training, in shoving schooners around that the trip hammer would be over the bar. The saying "going to Canossa" refers

to the humiliating pilgrimage made by the Emperor Henry IV to Italy in the year 1077. Henry had objected to the claims advanced by Gregory Hildebrand and, refusing to submit, was excommunicated by that pontiff. The emperor at first laughed at the sentence, but took a more serious view when he found himself deserted even by his personal attendants and resolved on a journey to Italy to make his peace with the pope. The latter was then at the Castle of Canossa, a fortress of the Countess Mathilda and situated in the mountains of Modens. Thither the emperor hastened, but the pope refused to see him save under the most degrading conditions.

The desperate situation of Henry compelled him to submit, and for three days and nights, barefooted and bareheaded, clad only in a hair shirt, the raiment of a penitent, he waited at the gate. At the end of this fearful penance, which was undergone in the month of January, he was admitted to the panal presence, was absolved and the panal presence, was absolved and the panal presence was absolved and presence and good address who can organize and successfully bandle a large corps of men. "From all we have heard, we believe that the outlook for peace among the great powers and for the gradual. but unmistakable development of the intent of the peace conference could hardly be better. No European power wants war any more than the Americans. Notwithstanding all appearances to the contrary, public opinion is today the greatest European power. Of course it would be folly to say there is no longer danger of war, for popular excitement in any one quarter may upset all calculations. Still the existence of a permanent tribunal to decide in-ternational disputes, the well recognized economic break-down which war now means for all belligerents, the lessons of the Boer war, and the frightful fiasco in China, all the ele-

"The present feeling in Europe regarding the United States cannot be characterized in one phrase. That it s not everywhere friendly, must, I fear, be admitted. But this is not strange. The strength and prosperity of the great, peaceful, 'un-military' republic is not pleasing to its opponents and critics of our institutions. Then there is natural jealousy in commercial and ndustrial circles of our economic progress. But it should be remembered that governments of all forms are averse to having their foreign policy dictated by theorists, or even by ex-Native-Sure! Why, dere ain't three porters and manufacturers. VICTORIES ON BOTH SIDES

The Corporation's Largest Individual Plant Forced to Close Down, but They Succeed In Starting Painter Plant-No Settlement In Sight

Pittsburg, Aug. 15.-There were victories on both sides of the great steel Works at McKeesport, probably the largest individual plant in the United States Steel corporation, to finally close down. On the other hand the steel corin Pittsburg, and also resumed operations with non-union men at the Crescent plant of the American Tin Plate company at Cleveland.

Two mills were on at the Painter plant, although one of them broke down during the day, and, according to the statement of the officials, half the mills in the Crescent plant were moving. The forces at both the plants named are to be increased, and the managers claim that they will soon have them working in full. They make the fifth and sixth plants which the steel corporation has succeeded in starting with non-union men, the others being Wellsville, Hyde Park, Clark's and Lindsay & McCutch-

There was a great labor demonstration at Wheeling yesterday, and President Shaffer made a stirring appeal to his followers to fight on. In an interview before he spoke, he said that if the western lodges did not heed the final appeal of Assistant Secretary Tighe, and come out, they would be expelled from the Amalgamated association, and their offers of financial assistance spurned.

There were few other developments either for recreation of have gone away gave unit will sund were towed back

strike. It was related that President | the two yachts. Shaffer had acknowledged that he could not win; that the steel corporation feared that its rival would profit by an extended strike, and were going to settle. No shadow of confirmation of

the story was obtainable. The spread of the strike at McKeesport and Wheeling has brought the umber of men who answered the final strike order to something over 20,000, and increases the total number of men rendered idle by the three orders to about 65,000. Many of the men drawn nto the movement continue to accept other employment, and the exact number Lw idle is a guess. The strikers are full, in control at McKeesport, Wheeling, Newcastle, Bellaire, Mingo Junction, and show some strength in is of somewhat heavier texture duck Pittsburg. The manufacturers hold than the old sail, and will be bent on the South Chicago, 'ay View, Joliet, Youngstown, Columbia, the Kiskiminetas valley, the tin plant at Manager

sen and the Carnegie group. Desertions from the ranks of the strikers are reported from Painte,'s mill, Pittsburg, and from the Crescent in Cleveland, and the managers say that it is only a question of time before there is a general break. The manufacturers have made no effort to break the strike at McKeesport or Wheeling with non-union men, and have given no forc. indication of their plans in those districts. Both sides express their satisfaction with the progress of the strike.

Encouraged by success in keeping Monessen going, and in opening their plant in Cleveland, the officers of the American Tin Plate company are planning resumption with non-union men at other points. They will not say where their next move will be made but say that it will be made quickly.

Won't Violate Contracts

Chicago, Aug. 15.—There will be no strike of the employes at the steel mills n South Chicago. This point was set tled last night when the men refused to reconsider the action taken Saturday night, at which time they decided to stand by their contracts with the mills and refused to join the strikers. After they had declined to reconsider, Secretary Tighe of the Amalgamated association, who had come to Chicago with the intention of securing a revocation of the action of Saturday night, if possible, revoked the charters of both lodges of the Amalgamated associa tion in the South Chicago mills, and declared the men outside of the organization. The men greeted his announcement with laughter and cheers.

Drift of Opinion.

The lawyer's self-fixed fees will on be a subject for legislation, if any other class of persons except lawyers and syndicates are to have a chance in the world. Within my recollection the customary fee of the lawyer has oubled, often quadrupled; while the other sources of income, except for large operators and their employes (and not for most of the latter, as we see by the strikes,) have either increased but little, or actually fallen off, in comparison with prices of living. The fixed income goes down, as rates of interest fall, and the wages of labor cannot rise as do the prices of needful food and clothing. But the lawyer charges what he pleases, and has and have

Factions Preparing For Battle

Harrisburg, Aug. 15.-The contest between the rival factions of the Philadelday's Democratic state convention is attracting more than usual attention to the gathering. Attempts were made yesterday by prominent party leaders outside of Philadelphia to restore peace between the discordant elements, but all these efforts were in vain.

The list of delegates certified by the regular city committee, and known as the Donnelly-Ryan men, has been placed on the roll by Chairman Creasy. This places the delegates certified by the young Democracy of Philadelphia in the position of contestants and forces them to take the initiative in the convention for recognition.

National Committeeman Guffey has reached Harrisburg, and will remain until after the convention. He is anxious to restore harmony in Philadelphia, and is hopeful that his efforts in that direction will prove successful.

THE ABBOT DEFEATED

Gelding Made a Bad Break In Second

New York, Aug. 16 .- Forty-five thousand people were present at the Brighton Beach track yesterday when, under the auspices of the New York Trotting ssociation, the champion stallion and hampion gelding, Cresceus and The Abbot, came together for a purse of \$12,000. The Abbot, with his record of 2:03 1-4 of last season, and Crescens with his mark of 2:02 1-4, made at Coumbus, were to decide the question of which was the one to go down in history s the fastest trotting horse.

The weather was simply perfect for the great trial, and the track was like velvet. It was about 3:30 o'clock when the drivers, Ketcham and Geers, ob tained their positions for a start by the flip of a coin. Luck was with the driver of Cresceus, as he secured the pole. Each horse was driven up and when they reached the starter Cresceus was slightly in the lead, and they were called back. The next time down they

were nose and nose. Cresceus rushed to the front and had a in 1:01 1-4, and he was a very close secand at the three-quarter pole, in 1:32 1-4. Coming down the stretch it was a battle royal, with The Abbot very close up. out Cresceus managed to beat his op

onent by half a length, in 2:03 1-4, the orld's trotting record in a race. A little over an half hour had expired when the two horses came out for their second trial, and were started under the same conditions that existed in the first heat. They were sent away beautifully, but The Abbot had not travelled a hundred yards before he made a disastrous break, and before he could recover his gait Cresceus was in front. The Abbot made a grand effort to overtake his opponent, but Cresceus was out for victory and kept on, passing the quarter in 31 3-4, the half in 1:02 1-2 and the three quarters in 1:35. He ame rushing home, the last quarter in 31 1-4 seconds, doing the mile in

2:06 1-4, with The Abbot back of the As the race was best three in five, Ketcham consented that Cresceus go another heat. This he did shortly before 5 o'clock, accompanied by a runner for the first half, where he was

joined by another runner, and he did the mile in 2:05, the quarter in 30 1-2, the half in 1:01 1-2, and the three-querters in 1:34.

To the credit of The Abbot it should be said that, not only was this his first race of the season, but that he has also recovery was in the vicinity of 2:09.

It is stated that the owner of Cresceus received \$7000 of the \$12,000 purse, while The Abbot's owner received

Mr. Ketcham was all smiles after he nad finished. "I would have won," said he, "in any event. Cresceus is the better horse. I could not in justice to good trotting pull Cresceus in order to let The Abbot inside the distance flag.'

Belief That Contending Sides May Yet Reach an Amicable Agreement-Employes of Illinois Steel Company at Joliet Vote to Obey Strike Order

Pittsburg, Aug. 16.-Once more there are efforts afoot to settle the strike being waged against the United States Steel corporation by the Amalgamated and ex-Judge Gordon, the leader of the Association of Iron, Steel and Tin Workers, but their success is problematical. Neither side will admit that there has been a single step toward bringing about a reapproachment, or that there is any prospect of any exchange of peace proposals.

B. M. Caldwell, formerly a mill owner of Mingo Junction, is known to have conferred with the strike leaders with a view to sketching a basis of settlement which he plans to place before the officials of the steel corporation. He is believed to be the mysterious man who conferred with President Shaffer for more than two hours at the strike headquarters yesterday, although the latter said later that he had not seen Mr. Caldwell for months.

Both sides vigorously denied that they had either made overtures or received proposals, but it is known positively that the plan is under consideration. Mr. Caldwell is acting independently, and does not represent either the manufacturers or the men. No statement from him was obtainable, and no outline of the terms that have been considered can be had. It is believed that under certain circumstances the contending sides could be brought together and a settlement effected, but whether such will come to pass remains to be

President Shaffer, in a statement made at noon yesterday, said that personally he was for peace, and that he was fighting only because he was on the defensive and forced to light.

Meantime the contest between the two great interests is being waged with vigor and slightly varying fortune. The steel corporation seems to be some what stronger at the Lower Union mill of the Carnegie company in Pittsburg, although the strikers are still working hard to cripple or close it. The corporation also added to the force at Wellsville and announced that at last it had the plant running to its full capacity. It had been anticipated that the day would show some move on the part of the American Tin Plate company toward opening one or more of its plants with non-union men, but nothing was done and there were no attempts hundred men, employed at the seamless tube plant at McKeesport, an auxiliary of the National Tube company, threy down their tools and joined the strikers. throughout the strike districts.

Joliet Mills Closed Joliet, Ills., Aug. 16.—The four lodges of the Amalgamated association, employes of the Illinois Steel company, at the Joliet mills, by a unanimous vote, decided last night to obey the strike order of President Shaffer. The conference was in session six hours, and listened to an urgent appeal by Assistant Secretary Tighe before the decision was reached. This action will close the entire steel plant here, throwing out of employment nearly 3000 men. The Joliet men had the same contract with the Illinois Steel company as the South Chicago workers, who on Wednesday night refused to listen to the arguments of Secretary Tighe.

Chicago, Aug. 16.-Force, and not parliamentary agitation as the means of securing Ireland her liberty, was advocated by O'Donovan, Rossa and other speakers at the Irish National demonstration last night. Setting fire to the principal cities of England as the means of weakening British power, and so creating a favorable opportunity for the Irish to rise and assert their rights by arms was the most loudly applauded sentiment expressed during the evening.

Good Afternoon,

Quincy people will have to wait a few days longer for their tax rate, but they can begin to save up to meet the bills, for they will be large enough.

If they convict and imprison all the will be destroyed, and he may have to go to work. Horrible thought!

That proposed Cherry avenue turnout, so called; might more properly be called the Revere road or Canal street that the strikers will fail to recognize turnout. It extends across these important streets.

China isn't afraid of being drained by the payment of the big indemn ity. She is looking for a suitable site in Washington to erect a legation building, which Minister Wu says will be one of the most palatial and ornate buildings of its kind in the world.

Dan Lamont would be the champion silent candidate for any old office. He

Newton and some other cities in the Metropolitan district have not made provisions this year to meet the Park tax if the assessment stands. There seems an unnecessary delay in deciding this apportionment, which is unfortunate for the cities and taxpayers concerned. Unless assessed previous to the making of the tax rate, it is questionable if the Assessors can legally make provisions for the payment. They must comply with the laws.

Badger obtain the Republican nomination, he is sure of a large Democratic vote in his ward and in the city, as was shown when he was a candidate at large for the City Council. Norfolk The ONLY DAILY in Norfolk County county will be fortunate if she secures Mr. Badger as one of her commissioners as he is a practical man of affairs, and stands high among his neighbors and townspeople for honest dealings and business capacity. He is assured considerable support in neighboring towns, and with the solid seventeen votes of Quincy, should receive the nomination on the first ballot at the convention.

Drift of Opinion.

Marriage has become a purely commercial transaction. Its success as a venture is measured solely by the extent of the advantage derivable by the contracting parties. Outside of the Catholic church it is generally viewed simply as a business affair, to be wound up when either of the contracting persons grows tired of his or her partner. -The Republic, Boston.

If a policeman is found inoxicated on duty, there is no sort of fault on any pretext whatever. The responsiblity of a police officer is such that slips are not to be tolerated because the public safety is endangered every time they occur. Lapses which might be forgiven in men who have other duties cannot be safely overlooked in nen whose work is to care for the public peace and the public safety. The tenderness with which such offenders are treated is not a sign of good-heartedness. It is simply mawkish sentimentality. - New Bedford

Both sides appear to be conident of winning in the present struggle between the Steel Trust and the Amalgamated Association, but we believe in the end the workingmen will be beaten and lose all they hitherto have gained. The public is with them in every reasonable demand and against dangerous combinations of capital, but New York officials who have been if the Association demands unionizabribed, Dick Croker's source of income tion of all mills, or indeed, of any mill so that a man must belong to a union or starve, they are trying to force conditions against the rights God has given to every man. The serious part of the present struggle, however, is the inalienable right of other men to work and of the Trust to employ other men if it can find them, and it is reasonably sure the hot-headed ones among them will commit acts of violence that will turn the tide of public sympathy. On such issues as the men have a right to demand and so

USE OF NATIVE TROOPS

Reverts to a Practice Which Has Left Dark Stain on War History-Chamberlain Says American Policy In Philippines Will Be Followed

London, Aug. 16.—The waning session of the house of commons was enlivened yesterday by a vigorous tilt between Sir William Vernon Harcourt, Liberal, and Mr. Chamberlain, over Lord Kitchener's proclamation. Sir William characterized it as "a mischievous docu-Kitchener nor Lord Milner, but of the ministry of Natal."

He declared that the government, in arming the natives, was reverting to a practice which had left the darkest stain on the history of the war between England and America. The new policy of the government promised to be neither creditable nor effective, and was in contravention of all the fundamental principles of the St. Petersburg convention. The country would welcome an ante-adjournment statement on the status of the war, on which they were still spending \$25,000,000 a month, although it was declared ended at the close of the last session.

An instance of the way in which the NOW IS acting of a play grows may be taken from Ellen Terry's playing in "Mme. Fall River, Mass., Aug. 16.-The de- Sans-Gene." In the play in question lightfully awkward. She has put on a long riding habit in order to become accustomed to manipulate her court train in the dance and is so much trou bled with it that finally she tucks it over her arm while she is learning to take the steps. The train keeps slipping off her arm and has to be perpetually replaced, and the episode is a cause of much boisterous amusement.

A Bit of Realism,

One night in a great English manufacturing city she was playing the part with even more than her usual verve. She was lost in the assumed character so thoroughly that it was real to her, and the ex-washerwoman, with her mind harassed and worried by the trying conditions of her artificial court life, instinctively returned to the habits of her youth. In a moment of abstraction, finding the fat coil of stuff across her arm, she instinctively began to wring it out. The response of the audience was electrical. Every womanand man-who had ever seen a washtub recognized the sincerity of the aeand clubs, his helmet broken and his tion. This moment of creative instinct was recorded in the actress mind and

As long as you give nothing nothing is expected, and no one is offended, but the moment you attempt the smallest and simplest kind of a function you get yourself in hot water because there are so many that you ought to ask and so few that you are able to have.

"I shall never forget the winter when I tried to have a few informal dinners. I offended any number of old friends and pleased no one, for upon those who were invited and came my little twopenny dinners made no impression whatever, while to those whom I was obliged to leave out they assumed large proportions entirely out of keeping with their modest pretensions, so that I found at the end of the season that I had distinctly injured instead of helped my social position. The dinners themselves were a great effort, as I was obliged to attend to every detail myself and at an expense that I could ill afford, while they were, as I said, not in the least appreciated by those who were invited and came, so now I have learned wisdom by experience. I always have a hot cup of tea ready for any friend who happens to drop in, but beyond that I do nothing. I am asked about more than ever, and I have the satisfaction of knowing that it is entirely for myself that I give."-New York Tribune.

A Girl's Allowance. Modern life that helps to make a

Pittsburg, Aug. 17.-The center of shifted to the west, where Joliet finally swung into line with the strikers, and Milwaukee appointed today as the time for a final vote on the question.

The news that came from the west cheered the strikers throughout the districts in this vicinity as no other development since the labor war was declared. In their enthusiasm they count upon favorable action at Milwaukee, and, carrying their hopes still farther. say that they will yet win Chicago over These successes, they declare with apparent confidence, will make them

They assert that popular sentiment has never been behind the strikers, and that the general interest which was once aroused by the contest is quickly waning. They claim that they are more than holding were affected, or have been started dies out and their safety is assured.

Two hundred men, employed in the of the prisoner. National Calvanizing works of the National Tube company, at McKeesport, struck yesterday. They were the last remaining workmen in the affiliated trades in that city, and the fie-up is now as complete as possible there. Many of the tube workers, although on strike, have refused to join any union, and the opinion is expressed that there will soon be a break among the strikers.

The recent gains at Pittsburg and at Joliet will bring the total number of men brought out by the third and final call of President Shaffer to about 30. 000, and press the grand total to some-

thing over 70,000.

Thousands of the men out have found other work, and the exact number now idle is unknown. The Amalgamated association is organizing a series of employment bureaus, and plans to place many more of the idle men. President Shaffer announces that after Sept. 1 the idle Amalgamated men will receive strike benefits of \$4 a week each, and that some provision will be made for men outside the organization.

Wellsville, Hyde Park, Painter's, Clark's, Lindsay & McCutcheon and the Crescent Tin works, the six properties open partly or in full with nonunion men since the strike began, moved along yesterday as usual. Another crew has been secured for the States Steel properties unaffected by the strike were also running without interruption.

No Prospect of Settlement San Francisco, Aug. 17.-The efforts of the conservative persons to bring about a settlement of the strike appear to be ineffective. It has been announced by the employers that no concessions will be made to men who left their employment, and the strikers themselves have come to the conclusion that they cannot consistently concede anything more. Both factions are preparing to carry on the struggle indefinitely. At this time there are 15,000 men unemployed in this city, on account of the strike.

#### Death of Embezzler McKean In a South American City

Nashua, N. H., Aug. 17.-The last chapter in the somewhat celebrated Indian Head National bank embezzlement

case, which disturbed the city of Nashua in 1893, closed with the announcement yesterday of the death in a foreign country of ex-Mayor Frank A. McKean, the former eashier of the inrtitution. Mail advices from Ascuncion, Paraguay, state that McKean died on July 11. He had been in failing health for several months.

Frank A. McKean was about 60 years of age. Before his downfall he was one of the most prominent and popular men in New Hampshire. He had filled the mayor's chair in Nashua with credit and had been honored with a seat in the legislature. He held other important offices. McKean was well-known in Boston, where for several years, unknown to his family here, he maintained a comfortable residence.

It was said that for nearly 20 years before the discoveries made eight years interest in the steel strike yesterday ago by the national bank examiners he was appropriating funds from the In dian Head National bank to meet his heavy expenses. Paper held by the bank was manipulated in such a way that the shortage was not easily de tected, and to this day the exact amount thus appropriated is not known, al though it is placed at something like \$100,000.

When McKean saw, in 1893, that the bank was being inspected carefully by the government officials, who had found certain irregularities, he fled the city. A warrant was issued for his arrest, and, although his flight was not alto masters of the situation, and win the gether unexpected, he was never ap prehended.

Young Man Tempted to Steal From a Bank

SAID TO BE \$13,000 SHORT

Teller of a Philadelphia Institution Who Fled From That City Is Captured by Boston Police-Admits Identity and Two Years Thieving'

Boston, Aug. 17.-William E. Douglas, aged 26, who is wanted by the Philadelphia police for the alleged embezzlement of \$13,000 from the Guarantee Trust and Safe Deposit company of that city, was arrested yesterday in Roslindale. Until May 1 Douglas was assistant teller of the company. On that date his resignation was asked for, and he tendered it. An examination of his books revealed the fact that he was \$13,000 short in his accounts, and a warrant was issued for his arrest. His whereabouts, however, were unknown.

Douglas does not deny his identity. He says that for two years he had been in the habit of confiscating sums from the trust company, and insists that it was necessary that he should, in order to live up to his reputation.

He was first tempted to steal, he said, when he found he had contracted debts which had to be met with cash. From that day on his living expenses increased, and the high life he led necessitated the stealing of more funds. He was bonded by the United States Fidelity and Guaranty company.

Douglas, who was unmarried, lived with his mother and sisters. At first his salary of \$1000 easily defrayed his living expenses. But that was five years ago. It was not until two years ago, however, that Douglas says he became desperate and stole from the bank. #### CONTEST OF SPEED

Was Lacking In the Race Between Constitution and Columbia

New York, Aug. 17 .- The Constitution drifted across the finish line late yesterday afternoon, a winner over Columbia by 31 minutes and 23 seconds. This difference in time, however, does not represent the difference in speed between the two yachts, for a very large part of the big margin was entirely due to a fluke in the light airs, while the boats were sailing the second round of the triangular course of 15 miles. It occurred just as the Constitution was

rounding the first mark.

Both yachts had come up from the home mark on a broad reach with a southwest wind, the Constitution leading by about two minutes. As they approached the stake boat black clouds brought with them a small rain squall and sudden change of wind. The Constitution was able to turn on the southwest wind and immediately after take the northwester, which lifted her out into the middle of the sound, while the Columbia was making for the mark, close hauled on the port tack. This gave the Constitution an opportunity to take advantage of the westerly wind which followed out in the sound, while the Columbia lay almost becalmed as the mark. This settled the race, for thereafter the Columbia was hopelessly out of it. The contest of speed was altogether in the first, while the wind, which was at all times light, held true: On every leg the new boat gained and maintained her reputation as a wonderfully fast yacht in soft airs. But the Columbia, with her perfect sails, was also going fast, and in the first 15 miles the new boat only made up 27 sec-

onds over her time allowance. The most noteworthy spectator of the race was Captain Sycamore of the Shamrock II, who came down from New York on the Lipton tug Lawrence and followed the racers over the course. It was his first view of the American boats, and he got a very valuable line on the light weather qualities of his

To say that the launch of a big vessel on the great lakes is a more picturesque spectacle than a similar event at a shipyard on the seaboard would be, perhaps, rather a rash assertion, but it is more suggestive of the immensity of the work. First one sees the broad, high wall of steel slipping with accelerating speed downward, then comes the crash of splintering timbers as the ponderous mass tumbles from the easy incline, followed by the tremendous splash of the water divid-

> No person who has ever witnessed a lake launching at close range will be at all surprised at these precautions. The performance of the individual on board a lake carrier as she takes her maiden plunge very much resembles that of the man tossed by the catapult in the circus, except that instead of being thrown forward into the air, the man clinging to a post on the vessel's deck must hang on her for dear life while the vast mass beneath him jerks and bucks and rolls. Battleship and Cruiser Going to Panama

#### PERHAPS NEEDLESS ALARM

Over What May Not Be Much Worse Than Chronie Conditions-Ambitious South American Countries Bradley, Grand Rapids, Mich. Seek Claim on Panama

Washington, Aug. 17.-A telegram has been prepared at the navy department to go forward to the Iowa immediately upon her arrival at San once to go to sea. When she advises der will follow for her to proceed at once to Panama.

The little cruiser Ranger, which is at San Diego, was ordered to sail yesterbe any delay in her departure, as she Francisco. has had several days' notice. She is very slow, however, making not more than 6 knots, and as the distance to Panama is about 2700 miles, it will require many days for her to reach her destination. The department, therefore, decided to dispatch the Iowa as soon as the battleship arrives at San Francisco and can prepare for the trip All these plans are precautionary in their nature. The impression prevails in Washington that the newspaper reports from the isthmus have been some what exaggerated, and that the situation is not so much worse than chronic conditions as to justify the alarm that has been raised.

As the time for the construction of the isthmian canal draws near, it is evident that the northern countries of the South American continent are eager to acquire some sort of claim on Panama. They think that, if made the site of the new canal, it will be the key to great future developments. Panama itself, or at least a revolutionary party then ascendant there, asked the United States about two years ago to annex it but of course no attention was paid to such a request.

### GOWNS OF THE DAY. Old Colony Street R.R. Co. Other Smart Notions.

A very noticeable feature of summer dress is the simplicity of color, or, rather, the predominating use of neutral colors in delicate shades of gray and beige, besides every possible tint of white. Even the foulards are delicate in coloring and are toned down still more by the use of stitched bands of cloth or taffeta in the predominating color of the silk.

In all the summer gowns, whether they are of silk, muslin or linen, the collar bands and the chemisettes are as transparent as it is possible to make same as week days. them and have them keep in place at cept men who are great from purity of all. Stiff neck fixings of any sort are 25 and 55 minutes past each ho entirely out of it this season, and many gowns have no choker collar at all, being cut out just below the collar line in a round neck, a mode so becoming to the exceptional style of beauty and so unbecoming to the average woman. However, this is an inevitable mode with the latest style of hairdressing, the low coil in the nape of the neck, one being a pretty accompaniment for the other.

This low neck and elbow sleeves are shown in the illustration from the New York Sun, which is authority also for these items of fashion. The gown is a white organdie with a latticework design in black lace insertion. A flower design in applique lace is added in the front of the skirt and bodice.

Another feature which is a natural outcome of the low dressed hair is the

bow of ribbon or fall of lace at the back of the hat, filling in the space which otherwise would make an ugly line. The brims droop somewhat, of course, but the bow is necessary to

soften the effect. The Louis XV period in dress is more and more in evidence all the time. Flowered effects, generally in silks muslins and trimmings, are convincing proof that this one page of time has been turned back for inspiration. Brocaded silk insertions and motifs are set into lace gowns, and striped and plain muslins are trimmed with medallions of cretonne flowers set inside shaped

designs of lace. All the dressy very fluffy, with gauzy ruffles around 7.50, 8.20, 8.50, 9.50, 10.50 P.M. the feet. The one idea in the finish at the hem is to give as much of the diaphanous effect as possible, and we see a series of chiffon ruffles around

the hem of a foulard gown. A new and very smart idea in trimming is the use of taffeta bands on white batiste. They may be straight or waved on the edges and dotted over with French dots of embroidered polka The only salvation of American dots. The silk may be white or some pale color, as you fancy, but in either case the effect is stunning.

This idea of using silk on thin musinches wide on a white organdie. Three rows of this, with spaces between, are sewed around the skirt, and the yoke is of alternate bands of ribbon and lace insertion, with tiny bows at the end of each band.

#### Men's Styles.

Light homespun suits are good looking, besides being cool and comfortable for summer, but there is one objection to the material: it is liable to get out of shape unless very carefully worn and looked after.

Dark blue serge is a light and cool material for summer wear, and it seems to be again coming into vogue among the larger number of well dressed men. Though made both single and through which all the past is better, to double breasted, the latter cut goes extremely well with white or light flannel trousers and carries with it a suggestion of the sea, blue serge and white flannel being pre-eminently yachting materials.

If one does not care for the double breasted or ordinary type of single breasted coat, that cut with only one row of buttons, but straight and square in front, is a good style for blue serge. trades and tripartite agreement to ab- though we have somehow dodged his coat shape or broader and peaked as men and Bookbinders' unions, and the badly and spoiled the beauty and the either patched or of the ordinary type one desires, and the pockets may be with flaps .- Vogue.

BATTLE NEAR THE BORDER

Declared to Be Imminent-Minister Silva Unwilling to Believe That It Is Other Than a Part of the Revolutionary Movement

Washington, Aug. 19.—Captain Perry of the battleship Iowa, now at San Francisco, has telegraphed to the navy department an acknowledgement of his instructions to proceed to the west coast of Panama in connection with the revolutionary troubles, but reports that some parts of the vessel need immediate attention. It is hoped by the department, however, that she will be able to sail some time today.

The most interesting development yesterday was the news contained in a press dispatch from Quito that Ecuaorean troops were ready to invade Colombia, and that a battle was imminent near Pasto, just beyond the Colombian frontier, and about 150 miles northeast of Quito. Mr. Silva, while without advices from his government, expressed the belief that this new expedition was a part of the revolutionary movement, and that it was in no sense organized by the Ecuadorean government. He said that many years ago there had been friction between the two governments, but that in recent years no important controversial issues had been raised between them.

Minister Silva is in receipt of a letter from Emiliano Isza, the Colombian minister at Quito, referring to the cordial treatment he had received from the Ecuador government, and the courte sies generally extended to him in his journey through that country. Minister Silva, consequently, is of the opinion that the new movement is in connection with the internal revolutiin in Colombia, unless something unforeseen has occurred of which he has not been advised.

Many Colombian revolutionists have equired arms and other equipment from people in Ecuador, and started expeditions, three of these having been organized last year, mostly composed of Colombians, aided by the sympathies and resources of some of the Ecuador ians. All these expeditions have failed. Mr. Silva says that the government of Ecuador always has protested that it had made the utmost effort to observe fluid, and the fumes ignited from the the neutrality laws, and sought to pre-

nine dropped their game on Saturday Quincy, at Hingham to the Hinghams, by a Aug. 19.

Saturday was a great day for base ball and those that journeyed to South Quincy Park went home satisfied that we have a team in this city to be proud of. The South Quincys defeated the Waverleys by a score of 5 to 4.

Waverleys began the game with three runs and it looked as though it was going to be an easy victory for Ledger should be in the office on the afternoon them; but after that inning Dunn, the previous to publication to guarantee insertion. local twirler, steadied down and in the last eight innings allowed but four hits. It was a game of brilliant plays. The fielding on both sides being almost perfect, It is a "toss up" as to who won the game, either Pirovano or Welch. With a man on second in the ninth Waverleys felt confident of winning; but their hopes went down when Pirovano made a grand circus catch of a line ball. He then threw the ball to Duffy, effecting a double play, retiring the visitors.

Smith was the first man up for the home team in the ninth, and he was presented with a base on balls. Welch was next up and everyone begged for a hit, and it came. Welch lifted the ball out to deep right, making three bases on it. A mighty roar greeted the players. Everyone was happy over the victory, as the Waverleys defeated the West Quincys with a much weaker team than they had at South Quincy.

The features were Flynn's heavy hitting and the fine work of the whole Saturday afternoon, probably by three local nine. Mr. Devitt excelled for

Hostess and Vitesse Among the Winners.

# Tender Race Won by the Splash.

Interesting Water Sports Held During the Races.

The fourth annual open regatta of the Wollaston Yacht club was sailed Saturday afternoon off the club house. The distance was eight miles, a double · cicruit about the regular triangular course. The sun was shining brightly at noon and a fair westerly breeze gave promise of a good race, but unfortunately the wind from the occident gradually died away into an almost breathless calm.

At 1.45 the preparatory gun was fired and shortly after the yachts of the first class passed by the commodore's foot.

In Class D, the "Early Dawn" had no trouble in winning out.

When the gun for Class C. was fired the Hostess was at the pier, but sbe started and crossed the line badly handicapped. There came on board as the yacht left the pier a valuable bull dog, who sailed the course, and growled at all boats which came near; in fact was a regular mascot.

The Hustler and the Marvel had it out nip and tuck for last place in their class. In Class S the yachts were very even-

ly matched throughout the entire Although the Toss had considerable start on the Vitesse on the run out

the latter won out easily while the former was caught in a calm. The Lobster was all alone in her

A Cure for Cholera Infantum. "Last May," says Mrs. Curtis Baker, of Bookwalter, Ohio, "an infant child of our neighbor's was suffering from cholera infan, tum. The doctor had given up all hopes of recovery. I took a bottle of Chamberlain's Colic, Cholera and Diarrhœa Remedy to the house, telling them I felt sure it would do good if used according to directions. In two days' time the child had fully recovered, and is now (nearly a year since) a vigorous healthy girl. I have recommended this Remedy frequently and have never known 1 to 8 P.M. it to fail in any single instance." For sale by all druggists.

## A JOINT PICNIC.

Base Ball and Other Sports at Mosquito Woods.

The members of the City Band and the "Clan McGregor Bicycle club, with their families, etc., held a joint picnic in the "Mosquito woods" on Saturday afternoon.

The forethought and preparations by a tree? the committee of arrangements made the outing a success to all present. Various forms of amusements were

njoyed, besides racing for prizes. Among the ladies who carried off the nonors for sprinting were Mrs. Alex. Russell, who won the race for married

Among the men who gained honor and profit for their fleet-footedness were: Robert Craig, Frank Morrison, Tom Raleigh and Alex. Russell. In the more youthful class the suc

cessful competitors were, in one race: Nellie Craig and Maggie Hall; in another, Bella Craig and Maggie Raleigh.

SOME PRESENT STYLES THAT CARRY AUTUMN INTIMATIONS.

Ribbons In Rosettes and Quaint Devices Are Chief Trimmings - The Smart Little Loose Sack - Garden Party and Other Gowns.

Ribbons will doubtless constitute the chief trimmings in autumn gowns, for the old fashioned ruches and quillings are coming in again, and these are mostly formed of ribbon.

Quaint devices of ribbon arabesques are discernible on some of the summer dresses, and on some appear the old ribbon or lace rosettes, with narrow ribbon ends or tassels depending from

Many of the linen gowns are made with three shaped flounces narrowing in the front and widening considerably at the back, and large sailor collars figure on the bodices. The painted nuslins are simply exquisite and show tiny roses and marguerites. They are opularly made with shaped flounces at the hem and pretty, soft falling fichus, which are often united on the

First is a frou frou gown strewn with pompadour wreaths, either painted or embroidered, to which one of the new sacks gives additional chic. This sack is in pink crepe de chine, enhanced with ruches and plaitings in silk muslin, with black velvet rosettes down the fronts.

Will Encourage Boers to Continue Fighting-Against Their Principle to Use Black Man Against White-Must Have Full Independence

London, Aug. 19.-The Freeman's Journal of Dublin publishes an inter-Redmond, in Hilversum, Holland, in the course of which Mr. Kruger, expressing gratitude for Irish support, said he regarded the Irish as "brothers in oppression," and urged the Nationalist members of the British parliament to continue their "efforts in the cause of justice and truth." When asked concerning the effect of

and of Mr. Chamberlain's speeches, Mr.

Kruger replied: "My people are not to be frightened by such proclamations or speeches, which will only encourage them to continue fighting. The British have used armed natives against the burghers from the beginning, but we have not used armed kaffirs. It has always been against our principles to use the black man against the white." Mr. Kruger emphatically denied the existence of a Dutch conspiracy against British influence in South Africa. When asked regarding Great Britain's PLUMBING,

Judge Jere Wilson and Isador Ray nor, counsel for Rear Admiral Schle in the coming court of inquiry, called o Acting Secretary Hackett yesterda, and made inquiries regarding the de partment's 1st of witnesses. They were informed that the preparation o this list is in the hands of Captain Lemly, the judge advocate of the court. A letter will be addressed to the department by Admiral Schley's counsel asking for a list of the witnesses.

While the request of the couns I of Admiral Schley for a list of witnesses will be submitted to Judge Advocate Lemly as a matter of form, it has already been determined at the depart ment that the request will be complied with, and the list furnished Admira Schley's lawyers. Possibly this wil not be done until after the return of Captain Lemly to Washington.

During their conference with Acting Secretary Hackett, Messrs, Raynor and Wilson advised him that a communi cation would be sent him relative to certain statements reported to have twon made by Boar Admiral How son gard to the Schley-Sampson contro versy. The letter to Secretary Hackett will enclose copies of interviews pur porting to have come from Admiral Howison, stating, among other things that the battle of Santiago was wor by Sampson; that the lafter's presence was unnecessary at that fight; that Schley deserved no credit for the vic

### CAPSIZED IN A SQUALL Boat Goes Down on Ohio River and Sixteen Are Drowned

Paducah, Ky., Aug. 20 .- The steamer

### city of Elizabethtown, Ills., was struck by a squall during a storm last night, as she was en route to Paducah. She turned over in 10 feet of water, as she was going into Crowell's Landing. Sixteen persons were drowned.

The disaster occurred as supper was being served, and many of the 75 pas sengers were in the cabin. The wind struck the beat without warning, and there was no time for those on the inside to escape.

Captain J. Bauer and Pilot Peck were the last to leave the boat, and swan ashore. They saved several people who were struggling in the water, and eft the survivors in a house near the bank of the river and came to the city. Captain Bauer, who arrived here two hours after the catastrophe, said:

"The boat was getting ready to land when the squall struck her, and she listed. Several passengers who were inside jumped overboard and were caught by the boat. The ladies, all of whom were in the cabin, could not be eached. The boat settled down in 10 feet of water, over a reef, and two of he men who were in the cabin broke brough the glass and were saved. Three colored deck hands saved a woman and child, and I think slie was the only woman saved. A vawl that had broken loose was caught by some of those struggling in the water and taken to the bank. We returned to the boat on this, but could find no signs of life and returned to shore."

PASSENGERS ALL IN BED

Thrown From Their Berths When Vessel Collided With Iceberg-Sixty-Seven Known to Have Been Lost-Thrilling Stories of Survivors

Port Townsend, Wash., Aug. 20.- The steamer Queen has just arrived from the north, bringing news of one of the most appalling marine disasters on the Pacific coast.

The steamer Islander, sailing from Skagway, Aug. 14, when nearing the southwest end of Douglass island, at 2 a. m., Aug. 15, and running at full 000. speed, struck a doating iceberg, and in less than 20 minutes went to the bottom of the deep channel, carrying men, women and children to watery graves. The Islander had 108 passengers, and

all were in bed when the vessel struck. The shock was so severe that many were thrown out of their berths, and the wildest excitement prevailed. Word was soon passed that the vessel was doomed, and a general seramble for the lifeboats ensued, many jumping overboard, and attempting to swim to the shore, the distance being short. In the scramble to get into the boats many were hurled headlong into the chill, water, which seemed alive with he man beings. Before all the pass nger had left the vessel, she gave a lunge and went down, bow first.

It is known that 67 lives were lost. It will be some time before their names can be definitely learned, as the purse lost his passenger list.

The death of Captain Foote was very pathetic. He remained on the bridge until the steamer was foundering When the vessel commenced to sink, and it was seen that no expedient could avail, the captain jumped into the life raft, which was already taxed. Realizing that his weight would work havoc there, he exclaimed: "I see there are too many here, so good-bye, boys," and he swam away. He was shortly afterward seen to sink.

Chief Engineer Brownlee had a miraculous escape He was asleep and was awakened by Third Engineer Allen ringing his bell. He ran to the engine room. There two firemen died like heroes soon after he arrived. They were ordered to close the "top wheel" and shut off the water water ing from the forward part of the vesse They tried to do so but were drowned slid down by the head. He rose from

### A Snub For Britishers

Brussels, Aug. 20.—It is asserted here that Emperor Nicholas specially in vited Mr. Kruger to send a representa tive to attend the recent wedding of his youngest sister, Grand Duchess Olga, to Duke Peter of Oldenbourg. It was the presence of this representative, M. Van Der Hoeven, that prevented any member of the British embassy in St. Petersburg attending, the czar having ignored the British ambassador's protest against the presence of Van Der Hoeven.

### DETAILS OF DISASTER BENZINE TANK EXPLODED Firemen Killed by Bfazing Oil and Flying Pieces of Iron

Philadelphia, Aug. 20.-While a large force of firemen were endeavoring to check the fire in a nest of burning oil tanks at the Atlantic Oil Refining company's plant at Point Breeze, early this morning, an immense tank of benzine suddenly exploded. Many firemen were in close proximity to the tank and fell victims to the blazing oil and flying pieces of iron. Three or four were killed and many were badly burned. A general call was telegraphed for ambuiances and patrol wagons, and the injured were hurried to the hospitals. The dead firemen were horribly burned and their bodies badly mutilated. The bodies were hardly recognizable when brought to the morgue. Some of the injured will die.

A dozen tanks of benzine and petroleum have already been destroyed, and the fire has not yet been checked. The fire, it is thought, will not burn itself out for several days. The loss, it is estimated, will reach probably \$500,-

### Salvationists' Big Collection

Saratoga, Aug. 20.-The Saratoga branch of the Salvation Army gave a service of song yesterday in Division street and opposite the United States hotel and the Worden House. The captain of the Salvationists appealed for contributions to pay the overdue rent for their barracks. "See if you can hit the drum with nickles, dimes, quarters, half-dollars and dollar pieces," exclaimed the captain. "Hit the drum, and God bless you." One of the first to hit the drum with acontribution was William C. Whitney. He was standing on the veranda of the United States hotel, and he rolled up four \$10 bills. He weighted the donation with a silver dollar. Mr. Whitney's action was followed by others. There was a shower of bills and silver pieces. When the captain of the Salvationists counted the noney he announced that \$380.40 had hit the drum.

### Six Killed by Dynamite

Little Falls, N. Y., Aug. 20.-The Mohawk and Malone roundhouse at Herkimer was discovered to be on fire at 10:30 last night. Watchman Gilbert and John Deck, assisted by others, attempted to extinguish the flames. While they were battling with the fire a large quantity of dynamite, stored in the building, exploded, killing Gilbert and Deck and four others, who have not yet been identified. The roundhouse was wrecked and burned. It is feared that there are other bodies in the

Care of the Nails.

Ragged, unclean, badly groomed finof presence of the goods or the work ger nails are inexcusable. They are correctly classed with the unnecessary beauty ills.

With five or ten minutes of careful attention every morning any woman should be able to keep her finger nails pretty, pink and dainty. The housewife will have difficulties to contend with because her duties in the home are likely to roughen the hands and cause the nails to become harsh and brittle. But the possibilities for a fine, clean, well kept pair of hands are just the same for her as for the woman who is idle and who "never lifts her hand" to do a thing about the house. The only difference is that the little home body must groom her finger tips oftener and with greater care, for the strengthen the team greatly, and some good work is constantly being torn good games may be looked for in West down by the speedy accumulations of Quincy the rest of the season. The steel mills at Monessen, after a long period of inactivity, were partly put in motion by strike-breakers gathered in some of the southern states. Two more mills in the Painter plant were also started up, and another large mill at the Clark property was also operated for the first time. There was some disorder in the streets

of Monessen during the day, but the local police never lost control of the demonstrative crowds, and no serious trouble occurred.

The reopening of the Monessen mili is believed to be the first of a series of aggressive moves on the part of the steel corporation. Preparations are known to be in progress for reopening the Star tin mills in Pittsburg, and for ncreasing the force at the Lindsay & McCutcheon mills, and it is thought to be only a matter of time before the strongholds of the strikers, like Newcastle, McKeesport, Wheeling, Bellaire and Mingo Junction, will be invaded.

The strikers deny that any real progress has been made at either Monessen or Painter, and say that they are not to be frightened by the burning of a lot of coal and the mere operation of machinery. They say that skilled men cannot be secured outside of their ranks and that none of their men are deserting, despite claims to the contrary.

The managers of the Painter mills, which now has four mills on, elaim that part of their two new crews is made up of old employes who have come back to work. At the Clark mill, where low workmen. everything except a small 8-inch m'll is now being operated, it is asserted that more skilled men are offering their services than can be accommodated. Fifty more were taken on there yesterday, bringing the total force up to 600. It is explained that there were 200 men at work in the Painter mills and that 50 of them were skilled.

The great fight in Pittsburg district is for mastery at the Duquesne mills of the Carnegie company. Both sides are working secretly, the Amalgamated association to extend its organization and strength among the workers, and the steel company to block any plan to get the men out. Neither side has shown its strength yet, and it is impossible to get any line on the ultimate

Assistant Secretary Tighe returned from the west yesterday and was closeted for several hours with President Shaffer. Discussing his report, Mr. Shaffer said: "All that Mr. Tighe told me was in the papers last week, and there is nothing aside from this The Chicago mill men who remained at work are no longer members of the organization. They are not entitled to a trial, and will have none. They are at liberty to act as they see fit now, but if they go out they will do so on their own responsibility. - We will do nothing about the matter from this

"On the whole the strike is going on very well. We are getting out more men every day, and will continue to do so. The fight is hardly begun yet. There will be plenty of trouble for the trust before long if they keep on in their present course. There has been no effort on anyone's part toward peace, and there will be none on our part again. "As to the situation at Duquesne, all

strike ordered in that mill, as yet. I said last week that when we were ready that mill would be attended to.' The men of the Pennsylvania works

of the National Tube company in Pittsburg joined the strikers last night, and it is expected that the force in the Frankstown plant will follow them. About 600 men left the Pennsylvania works, and it is almost certain that all of the remaining 600 will join the movement and completely tie the property up. There are about 600 men in the Frankstown property, and the total tests. number of men added to the army of strikers by the movement will be about

1800. When the strikers filed out of the Pennsylvania works they made no explanation to the officials, but to the newspaper men who met them outside they said that they had quit rather than work non-union made skelp. It was understood earlier in the day that the National Tube company had announced an advance in wages, and it was thought that it would hold the men. There was an incipient strike yeswhich is an independent property. The anen objected to furnishing material to the United States Steel corporation, but the Amalgamated association ordered the men to resume work. This action

made by independent companies before the strike began will be respected.

STRONGHOLDS OF THE UNION

Have Not Yet Been Moved Upon by Trust Officials-Strikers Say They Have Situation Well In Hand-Complete Tieup of National Tube Plants

Pittsburg, Aug. 21.-Following the rapid moves of Monday on either side of the great steel strike, there was a fight so far, with small victories and seems to be settling down into a hard, determined struggle, on which neither side will acknowledge defeat while there is hope left.

Speculation as to the length of time to which the struggle will be prolonged and the extent of its spread is idle. Joseph Bishop, the Ohio arbitrator was at Pittsburg yesterday, but both sides promptly repudiated the sugges tion that another move for peace was being considered. The steel managers succeeded in starting the last idle mill at the Clark plant, and are evidently planning a series of extensions at every point where there is a chance of success under existing circumstances.

The steel managers are also arranging for more men for the Painter and Monessen mills, but have given no indication of the time they will move on Mc-Keesport, Wheeling, Newcastle and Bellaire, the strongholds of the strik-

The strikers meet the movement to reopen the mills with non-union men with claims that it will be simply impossible to secure a sufficient number of skilled men to operate them. Their men, they claim, are standing firm, and must be consulted before the mills run. They say they have the situation well in hand, and, despite the alleged danger of the strike getting top-heavy, continue their work of organization with a view of crippling more plants belonging to the corporation. They claim that that there is no danger of the Joliet men going back to work, whatever Chicago does. They are still fighting for a foothold in the Carnegie properties, but so far have not shown their hand.

Claims as to the advantage at the Duquesne mills are still highly conflicting, but the managers declare with mated association has given up. show-down of hands alone will show the real strength of either side.

The tieing up of the Pennsylvania and Continental tube plants of the National Tube company in Pittsburg, commenced Monday night, was completed yesterday. Counting both plants about 1800 men went out, and both the properties are shut down.

Until a few days ago the men in these establishments were not organized, but they have been brought under union to work by the Carnegie company and the Keystone Rolling mill, both nonunion plants. This caused the strike. The closing of these two plants is

very much pleased with the situation. They claim that the Lower Union Carnegie mill in Pittsburg is badly crippled, that the effort to start Monessen has proved a failure and that the Lindsay & McCutcheon mill did no work yesterday. They also promise to act at Duquesne in proper time. They charge that the borough officials at Monessen are openly against the strik- hand. ers, and constantly infringe on their rights. They say that if the men are not fairly treated they will seek protection for them through proper legal

[Special Correspondence.] LAWTON, O. T., Aug. 19.-The great free land distribution, or Uncle Sam's big lottery, as some people are inclined to call it, is over, and the excitement attending it is subsiding. show and everybody ought to be satisfied. Where 165,000 registered applicants were after 13,000 claims it is but natural that there should be thousands of disappointed persons. And many of these are more or less inclined to find fault. Some of them assume a highly noral attitude and rail loudly against the government's conducting a lottery, while most of them would not hesitate to take chances on the various wheel and card games which prevail here. It is probable that not one in ten of the thousands who came here had any other thought than that of taking a long shot at the few big land prizes which they hoped to get by drawing early numbers, thus enabling them to have first choice of claims, and those who lost ought not to complain. The people who came here staking their all n the hope of getting a quarter section of land upon which they expected to make their home, and failed to draw a number below 13,000, are entitled to sympathy, but they have no reason to omplain of the method of conducting the allotment. Had the same plan been pursued as at former allotments, they would have stood less show of getting a claim than now, for the "sooners" and "boomers" would have rushed pellmell across the border and by sheer

force gobbled up the whole tract. Already there are 41 entries for the to distribute 13,000 quarter sections to It was the nurpose of the governmen State championship to be played on that number of needy home seekers in the Wollaston links next week. The list does not close until ple, who come with the honest purpose of making homes and tilling the lands.

Under this allotment hundreds of women were enabled to secure desirable tracts of land, a thing which would have been impossible if the "sooners" and "boomers" had had their own way. At the drawing places there were booths for women, and many of them drew early numbers and got good claims. No married woman or any under age, however, could register, the purpose being that only one claim should go to any one family. But there were a few notable exceptions in ratches and jewelry valued at over \$100; case allowing married women to register. For instance, one woman came to the booth wheeling an invalid's chair. I have the honor to acknowledge the receipt of your letter of Aug. 19, 1901, in which you request me to obtain for you certain information with reference to certain alleged "agreement or agreements made between the constituent companies and individuals who organized the United States Steel corporation." You ask me to afford you all the information that I may "possess or can obtain," and you specifically refer to an alleged "trust or syndicate agreement," which you state the president of the United States Steel corporation, C. Such is the story book lion tamer and I may as well say at once that out side of story books he has small existence. There is scarcely any truth in this theory of hate for hate and conquest by fear. It is no more fear that makes a lion walk on a ball than it is pour from a dozen hills right into this | fear that makes a horse pull a wagon It is habit. The lion is perfectly will Thomas Fitzpatrick lost his life in ing to walk on the ball, and he has the flood on the meadows south of North | reached that mind, not by cruel treatment, but by force of his trainer's paemployed by O. Of course, a wild beast tamer should have a quick eye and delicate sense of hearing, so that he may be warned of a sudden spring at him or a rush from behind, and it is important that he be a sober man, for alcohol breaks the nerve or gives a false courage worse than folly, but the quality on which he must chiefly rely and which alone can make him a great tamer-not a second rate bungler-is a genuine fondness for his animals.

This does not mean that the animals will necessarily be fond of the tamer; some will be fond of him, some will be indifferent to him, some will fear and hate him. Nor will the trainer's fondness protect him from fang and, claw We see that there is danger always, ac cident often, but without the fondnes there would be greater danger and more frequent accident. What but this fondness would easiest part), but in the dens, in the treacherous runaway, in the strange night hours, in the early morning romp, when no one is looking, when there is no reason for being with them

I do not purpose to present in detail the methods of taming wild beasts, rather what happens after they are bound over under heavy bonds. A tamed: but I may say that a lion novement has been started to close up tamer always begins by spending weeks or months in gaining a new animal's confidence.

Day after day he will stand for a long time outside the cage, merely looking at the lion, talking to him, impressing upon the beast a general familiarity with his voice and person. And each time, as he goes away, he is careful to toss a piece of meat as a pleasant memento of his visit.

Later he ventures inside the bars, carrying some simple weapon-a whip, a rod, perhaps a broom, which is more formidable than might be supposed through the jab of its sharp bristles One tamer used a common chair with much success against unbroken lions. If the creature came at him, there were chair came to represent boundless power to that ignorant lion. He feared it and hated it, as was seen on one occasion when the tamer left it in the cage and the lion promptly tore it into splinters.

Days may pass before the lion will let his tamer do more than merely well; the tamer stays there. He waits hour after hour, week after week, until a time comes when the lion will let him move nearer, will permit the touch of his hand, will come forward for a piece of meat, and at last treat him like a friend, so that finally he may sit there quite at ease and even read his newspaper, as one man did.

Lastly begins the practice of tricks. The lion must spring to a pedestal and be fed, he must jump from one pedestal to another and be fed, must keep a certain pose and be fed. A bit of meat is always the final argument, and the tamer wins (if he wins at all, for he sometimes fails) by patience and kind-

"There is no use getting angry with not explain, is a question which I do here two weeks ago. Dr. Knapp and a lion," said a well known tamer to me, "and there is no use in carrying a revolver. Lipton Has Great Faith In Shamrock II

OUTCOME WILL SATISFY HIM

Because of His Confidence In Fairness of American Sportsmanship-De-Machine, but Not as a Boat

New York, Aug. 22.—The Shamrock II, flying Sir Thomas Lipton's private signal at her tall pole masthead and the blue ensign of the Royal Ulster Yacht club at her stern, is all ready to take held by Boralma 11-2 seconds. her first trial spin in American waters. At 6:25 last evening, when the Teucannon that served for years on board welcome from the Ocean Yacht club, salute in honor of the Shamrock's

Sir Thomas and his party landed at 8 o'clock, and were driven to the Waldorf-Astoria for dinner. This morning he took up his quarters on the steam yacht Erin, now anchored off Stapleton. Included in the party of Sir Thomas were George L. Watson, designer of the Shamrock; Charles Russell, who will represent the Royal Ulster Yacht club on the American cup defender; J. B. Hilliard, a Clyde yachtsman, whom, next to Mr. Jamieson, Sir Thomas considers the best amateur yachtsman of the United Kingdom; C. O'Malley, John Westwood and W. M. Duncan.

Sir Thomas comes to America for his econd attempt to lift the cup, cheerful and resolute. He had this to say to he newspaper correspondents:

"I am delighted to be again in America, and should be ungrateful if I did not say that I am pleased with the reception that has already been given ie. I think I can do better this time, for I have in Shamrock II a boat at least nine minutes faster over a 30-mile course than the Shamrock I, and the old boat, during the trials on the other side, was certainly 5 to 10 minutes faster than when she raced in America in 1899. At any rate, we expect to make a good Columbia.

"I am hoping for a good breeze during the races, for certainly the Shamrock II is something better than a light-weather boat. Whatever the outcome I shall be satisfied that the better boat has won, for I have a good opinion of American sportsmanship, and the fairness of lection of my attempt to lift the cup two over made all the going, and won by years ago is altogether a pleasant one, and I hope to cement the friendship then so happily begun."

The only thing that Sir Thomas has away. o criticize in American yachting is the rule of measuring.

"The English method," he said, "is much to be preferred. It results in more beautiful, healthful and comforttends to produce racing machines only. I have talked agree with me in this." Thomas and the members of his party. it is not likely that Shamrock II will engage the Independence. Sir Thomas feels that his challenge applies only to the defender selected by the New York Yacht club, and that it would not be well for him to sail other matches. Designer Watson, who accompanies Sir Thomas, when asked if he were satisfied with the Shamrock II, said: "I am not satisfied with her as a boat, but as a racing machine I hope she will give experiment in fast boats propelled by the wind, it is perhaps interesting. We hope to be successful."

BUCKSPORT'S BIG FIRE Now Believed to Have Been Started by a Woman For Revenge

Bucksport, Me., Aug. 22.-Rather light in connection with the incendiary fire which started in Delano's saloon on Monday, and came near being a disastrous conflagration. It was at first supposed that the fire was started by the hoodlums, who, during the excitement, looted the place and an adjacent store, and stole a large quantity of

Evidence is coming to light which practically substantiates the theory that the fire was not started by the hieves, but by a woman who was half crazed by futile efforts to induce the authorities to close up the place, which has been running over three years without a single search. The husband and son of the suspected woman have been

TO SERVE ON INQUIRY COURT

Question Raised by Schley Must Be Left to the Court Itself to Settle-Name In Dispute Had Been Accepted as Perfectly Satisfactory

Washington, Aug. 22 .- The navy department yesterday afternoon gave out the correspondence with Admiral Schley, relative to opinions said to have been expressed by Admiral Howison, a member of the court of inquirry. The first letter is from Admiral Schley, under date of Aug. 19. It savs: I have the honor to enclose herewith

a newspaper clipping, in which Rear Admiral Howison, who has been se lected to fill the vacancy caused by the relief of Rear Admiral L. A. Kimberley from the court of inquiry, is represented to have expressed certain opinions. If this statement, taken from the Boston Record, be true, it would, in the judgment of my counsel, disqualify him for serving in this capacity.

I respectfully request that a copy of his letter with this enclosure be subwitted to Rear Admiral Howison for his consideration; and I would further request that I may be favored with a copy of his answer.

I have entertained high personal re gard for Rear Admiral Howison throughout a long professional service so that I feel sure that if the statements expressed in the enclosure are true, Rear Admiral Howison would not be willing to serve as a judge under such circumstances. The closing letter of the acting sec

In reply to your letter of the 19th instant, inclosing a newspaper clipping and requesting the department to send it to Rear Admiral Howison, together with a copy of your letter, you are informed that the appointment of Rear Admiral Howison as a third member of the court of inquiry was accomplished only after taking great pains to insure absolute impartiality in the officer selected. NON-UNION MEN LANDED

In Establishments of the Steel Corporation

STRIKERS DID NOT RESIST

Labor Leaders Beginning to Discuss Will Punish Disorder to the Limit

Pittsburg, Aug. 23.-Aside from the partial equipment of the Star plant of the American Tin Plate company, and the preparation for its immediate resumption of business, there were no special developments in the strike situation in this city yesterday. No further trouble occurred at the Pennsylania Tube works, and at all other strike points quiet reigns.

The Amalgamated people point to the conduct of their members in restraining from violence when they see nonunionists being marched into the mills to take their places. The incident at the Star plant yesterday is given: san example of especial significance, and to ise an Amalgamated officer's expres sion, shows that the men have been edu cated to the knowledge that their strongest weapon in such cases is silence and submission until it is demonstrated that the mills cannot b operated successfully without the aid of skilled men, now on strike.

The steel men, on the other hand, are highly pleased with their success in manning the Star plant, and say that if the men they secure are not mo-lested it will be but a short time until all of their mills will be in full operation and doing good work.

The Painter mill has 250 men at work,

and the management expects to be run

ning full-handed by next week. Two mills are being operated at the Lindsay & McCutcheon plant. No sign of a break in the Carnegie Upper and Lower Union plants has made its apparance. McKeesport is still completely tied up, but an attempt may be made to start the Demmler Tin works at once with men secured from outside points. The strikers are still vigilant as pickets, but are keeping quiet and making no threats. At Irondale, the Tin Plant company gained another victory yesterday by the successful start of one set of rolls. There are said to be enough men in the plant to man one mill one turn, and the company officials say, now that the break has been made, that they will get the men back.

At Amalgamated headquarters in this city yesterday the time was devoted almost entirely to routine business, and nothing of unusual importance occurred. President Shaffer says that no movement has as yet been made by either side looking to arbitration or mediation. No hint has come from the steel people on the subject, and none has gone out from the workers. There sibility of arbitration. The name of Governor W. A. Stone is mentioned as offices in this direction.

Seven foreigners, arrested for disturbing the peace at the Pennsylvania Tube plant, were given a hearing by Magistrate McGarvey yesterday and severely reprimanded. All were discharged but one, who was fined for having a dangerous weapon in his possession when arrested. The magistrate gave them Customs Wakeman reports that addia stern warning against rioting, and tional irregularities in the apportionsaid:

A stop was made on Smithfield street for some reason or other and four of the negroes alighted. Before they could get back the vehicle started, and the men ha dto walk across the bridge. Probably twenty men followed them over out on the structure, and when about midway across made an assault on the four men. The Feeling at Joliet

Joliet, Ills., Aug. 23.-Reports that steel mills here are to resume Monday are absolutely without official foundation, either as regards the company or the Amalgamated association. There is a strong sentiment among some of the strikers in favor of a return to work under some honorable plan, but the will stand by the strike order, at least until it shall be known that South Chi cage will not go out.

LITTLEFIELD'S VIEWS On the Supreme Court Decision In the

Insular Cases Denver, Aug. 23 .- A sensation was caused at yesterday's session of the

American Bar association by the ad-Possibility of Arbitration-Justice dress of Congressman Littlefield of McGarvey Gives Notice That He Maine, on "The Insular Cases." Mr. Littlefield's address drew forth loud and long-continued applause.

CHARLES E. LITTLEFIELD.

Mr. Littlefield declared that the insular cases, considered in the manner in which the results were reached, the incongruity of the results, and the variety of inconsistente views expressed by the different members of the court, "are without a parallel in our judicial history." He considered the cases which had been passed upon, and said that in the unsettled condition of the court it was hardly worth while to speculate as to the result of those cases.

His conclusion as to Porto Rico's status is, briefly: "So far as the operation of the constitution was concerned, this territory was to all legal intents and purposes a part of the United States. It matters not how the shows experience and a thorough constitution reached the ferritory, so knowledge of their ship. far as this case was concerned, so long as it was there."

Mr. Littlefield next discussed the 13th amendment to the constitution, as it had been construed by the supreme yesterday, twice around the Seawancourt in Porto Rico and the Philippines. He quoted the amendment and gave time the old boat won by 2 minutes and a history of the same. Then, he said, referring to slavery as it existed in the United States: "The negro cannot be ures do not represent the decisiveness Douglas or a Booker T. Mosquitoes Had a Feast Hoboken, N. J., Aug. 23.—Benjamin Benjamin, an aeronaut, fell from his balloon while making an ascension here is, however, a tendency among many of yesterday. Failure of the parachute the labor leaders to discuss the pos- to work caused the accident. Benjamin fell in the Hackensack meadows and landed in mud and water, sinking an arbitrator or conciliator, and it is up to his neck. A boatman rescued said he will be asked to tender his good him. His injuries arose not only from the shock of the fall, but from the on slaught of myriads of mosquitoes which attacked him as he was stuck in the mud, and whose stings made his features unre ognizable.

Tampa, Aug. 23.-The Resistencia leaders, ordered to leave and presumed to have left here Tuesday night, appeared about their usual haunts yesterday. The taxpayers, whose property has not been jumped in value by the Assessors, will find a source of satisfaction in the tax rate which is now an average one among Massachusetts cities and towns. It is sixty cents less than last year, and \$1.60 less than in 1899, and the lowest since 1896 when it was \$17.40. The tax rate of Quincy has never been excessively high, having touched \$18 per \$1,000 but four years in the 109 years of her history. And what is better, the tax rate of 1903 By FRANK F. Water Sports the Attraction This

Afternoon.

The field sports on the first day of the Houghs Neck carnival occupied all the afternoon and the field near Bell s reet was so crowded that it was almost impossible for the majority to witness the events. How much better it would be on these occasions if all stood back so everybody could have a chance to see.

Catching the greased pig was not the great sport that was anticipated, as the little fellow was not very lively, and he had no show at all.

There was much sport however, in many of the other events the pie-eating contest, the doughnut eating contest, and climbing the greased pole, and some of the races were close.

The illumination of the cottages wa plainly visible from Squantum and the opposite shores and it gave the appearance of many grand clusters of irridesent lights.

The cars continued to carry people own to the illumination until after 10 o'clock and then the "early birds began to make home traffic interesting for the conductor.

SIN, FOLLY AND SHAME,

Declared to Be Ours For Our Moral Deafness to Reproaches of Those to Whom We Have Broken Promises-Word Pictures of Coming Evil

Charles E. Norton of Harvard unininistration at the annual dinner of the Sanderson academy, yesterday afternoon. During the address he said: "Child and lover of America as I am, my heart burns hot with indignation, orrow and humiliation as I regard our treatment of Porto Rico, of Cuba, of the Philippines. Are we morally so deaf that we do not hear the reproaches of men to whom we have broken our promises of independence, and the bitter upbraidings of those who had learned from our teachings that liberty is worth dying for? Can we stop our ears to the cries of innocent women and children whom we have made desolate outcasts; to the groans of men whom we have shot down because they stood against us in the defense of what were once our principles, their rights and their honor? What sin, what folly, what shame is ours.

"We are all more or less responsible for the shame of broken pledges, for the are paying for the killing of men, the ourning of villages, the subjugation of eople over whom we have no right whatever. I, at least, and those who think as I do, will cease to protest that a greater wrong is done to us Americans than to the Filipinos themselves by these degrading and criminal ostilities.

"For three years past we have been acting as if we were no longer Amerfighting and to turn from the darkness of the old world to the hope of the new; once more to set our faces to the morning and to show mankind a nation at once powerful and self controlled; powerful without aggressive ambition, a nation invincible in the panapoly of justice, a nation that has waxed fat; and yet does not lightly esteem the rocks of its salvation."

Hon, D. H. Chamberlain of Brookline, ex-governor of North Carolina, denounced war in general. Summing up feller wot don't want ter grow up ter the speaker said: "The fruit of the sword is blood and wrath and destruction; the fruit of rapine is hatred; the fruit of oppression is weakness and danger. When Everett arose to speak, the hall, which was a large one, was only passably well filled, and even the comparatively small number present began to grow smaller as one by one people slipped away. Mr. Wendell began to think that Brockton must be a singularly cold hearted place when suddenly he noticed people coming in by twos and threes and silently taking seats wherever they could find them. Soon the hall was full, with standing room only, but still they came till the aisles and walls were lined with interested listeners.

Cigars Are Rights and Lefts.

"It is not always because a cigar is badly made that the wrapper curls up and works off," said a tobacco dealer. pany. The capital is \$50,000,000, an "It is often because a right handed increase of \$5,000,000 over the joint man is smoking a left handed cigar. Sounds strange, hey? The Fishing Otter. The otter used by Scottish poachers been removed and the stores which she ments known. In some waters is is far more effective than a net. It may be described as a water kite, which serves to take out over the water a line bearing 50 or more flies. The otter itself is yer, has been convicted of an attempt a floating piece of board leaded along to bribe the jurorrs in a law suit, and one edge to keep it upright. The poachhe was sentenced to three days in jail, er walks along the side of loch or river, to pay a fine of \$100 and stand dis- letting out the fly decorated line as he barred. This is the highest penalty goes, the otter board gradually working out toward the center. An enormous area of water is fished at one time and numbers of fish are killed.

An Awakener.

A preacher, raising his eyes from his desk in the midst of his sermon, was paralyzed with amazement to see his rude son in the gallery pelting the hearers in the pews below with horse chestnuts. But while the good man was preparing a frown of reproof the young hopeful cried out: "You 'tend to your preaching, daddy.

I'll keep 'em awake." A Light Repast. Hungry Horace-Kind lady, can't ye

The Candid Suburbanite. "I suppose people around here raise their own vegetables?"

"Some do; others merely plant them."

It may be that you haven't more trouble than others, but that you have THE MODEL REFRIGERATOR What the Iceman Says About Ways

of the Good Housekeeper, In the good housekeeper's refrigerator you'll find the milk and cream and butter covered tight so they won't take in dumped around the ice. You won't find such stuff that smell up a house, to say nothing of a refrigerator. Such things will be stowed away in a clean cupboard down cellar, with doors of wire netting.

You won't get a mouthful of sewer gas either when you open the lid. In some houses-finely arranged houses, toothey have one of the latest improve ments-letting the refrigerator drain into the sewer pipe. It may be conven ient enough, but food flavored with sewer gas is not wholesome.

In a model house the refrigerato stands in a small, light room by the back door. It is near enough to the kitchen to be handy. There is a green curtain on the back door window, to pull down when a hot sun glares in or the refrigerator. There is a heavy screen door that locks, and in hot weather there's a fine, cool air coming in all night. The house is safe enough for an inside door locks, and it is kept shut when the witchen grows uncom fortably hot.

It is a mistake to set a refrigerator down cellar. It is easier for the ice man and harder for the woman who does the work. The dampness swells the wood till the door or lid won't shut. There are cellar odors, no matter how clean it is kept.

In this model house a short bit of hose is kept hitched to the faucet for watering the lawn. The ice is washed off there, and the water has dripped from it fairly well before it gets to the back door. There's a clean, strong mat at the foot of the steps.

An iceman gets scolded unmercifully

for bringing dirt into a house. He can't help it in places where he has to wait five minutes for a dipper of water to wash off the ice or go and get it himself, and he can't wipe his feet on a piazza floor.

He has a hundred people waiting for him on a hot thorning, and it makes him tired to open a lid and find he has got to lift out half a dozen muskmelons, a pan of milk, a chicken and a custard, all sitting around a chunk of ice to bigger than your fist.

As soon as the ice is put in it is tuckand grain by measure. John buys ed about with a little blanket made of old flannel. This model refrigerator is kept spot-

lessly clean. Once a week the shelves a motto or a list of his goods on his and racks are washed in hot suds, vertical signboard. NEW NOTIONS IN DRESS.

Two Original Ideas, One Parisian, the Other From Vienna. Two original notions are noted by The New Idea Woman's Magazin One of New York's most aristocratic young ladies has from Paris a most lovely shirt waist and new stock. The waist is handmade, of the finest quality of white dimity, and is embroidered in small polka dots of red silk. The stock is very Parisian and is made of dark red corded silk, with a tiny bow of the same in front. The turnover collar is exceedingly new. It is made

JEWELED STOCK-THUMB RING PURSE is closely studded with small garnets to correspond in color with the embroidered dots of the waist. This stock may be copied in stones of any color provided they do not form a contrast to the colors in the waist.

Jeweled rings to be worn over the glove on the thumb of the left hand, from which is suspended a small fillgree purse attached to a jeweled chain, have only just been imported, but will be one of the principal fads of the coming winter season. The ring is made to fit the thumb slightly and should not be worn on any other finger. These are from Vienna, the center of fine leather goods and many jewelry novelties.

A STORY OF THE EAST.

At one corner of a dark, narrow street in the old quarter of Belgrade, a section of the city which is at one and the same time a bazaar, a Mohammedan paradise and a resort of criminals, does this cursed ship belong?" there is a small cafe kept by an Italian, Mme. Peregrini.

Suddenly Mme. Peregrini placed a hand upon the young man's shoulder and bending her head to his ear, said

"You are unhappy, Mr. Bukarest. What is the matter?"

replied.

"Because you cannot marry the fine lady with whom you are in love?"

Naome Bukarest shrugged his shoulders. "I have an uncle in Constantinople; he is a merchant there. I am going to see him. Can you tell me the cheapest way of getting there?"

"You have hit upon a lucky time," answered the woman. "There is a lady here who has noticed you on several occasions; she is deeply interested in you. Her father is a captain and no doubt will take you on his vessel. Come with me.'

The hostess led the handsome young Israelite into a small adjoining room, whose sole piece of furniture consisted of a Turkish divan. Upon this divan was stretched a pretty young woman in an odd costume, partly oriental, partly Hungarian. She received the stranger with a coquettish smile and listened refractory" attentively to Mme. The green sward about him was decked with flowers, a grove of orange and lemon trees stretched down toward the sea, whose waves were silvered in the moonlight, and the sweet breath of the night, laden with heavy fragrance, soothed and comforted him.

Suddenly one of the myths of the Talmud recurred to him

"When God created the two celestial lights and assigned them their places in the heavens, the moon approached him and said:

"'O Lord, it isn't well that two of thy servants should be of the same rank. Make me, I pray thee, larger and more brilliant than the sun.'

> The weakness of many of our relimake this mistake. Entire consecration is embraced in it, but it also specifies definite duties of devotion and of service. This phase of it has been of untold blessing even to many who had long been Christians before they became Christian Endeavorers. The definite consecration to daily prayer and to daily Bible reading has made them more faithful in these duties than ever It is most fitting that the first defi-

nite clause in the pledge should be consecration to prayer and to daily prayer, "I will make it the rule of my life to pray every day." Devotion should be the first business of the day, and the day should be closed as it is begunwith prayer to God. Nor should communion with God, which is prayer, be limited to the extremes of the day, but should characterize us at all times. This was Paul's attitude.toward pray-When he had gone she threw herself er, and he recommended it to the Thes-"Pray without ceasing." Daily prayer is Scriptural. It is well, and, unconsciously almost, he taught by the customs of Judaism, from which Christianity sprang. Daily the sacrifices were offered to God: there were daily hours for prayer in the temple, and three times a daymorning, noon and night-the devout Jew prayed unto God, with his face toward Jerusalem, as we see illustrated in Daniel in Babylon. Christ practiced and taught daily prayer. "Give us this day our daily bread" could only be intended to be a daily prayer for daily bread, and if we should pray daily for physical food how much more important that we should pray daily for spiritual food, for God's presence and support amid, the temptations and trials of the day, with gratitude and thanksgiving for past mercies of the same character.

NO MATERIAL CHANGE

In the General Situation of the Steel Strike

LABOR LEADERS GATHER

Promise That a Crisis Will Be Forced Within a Week-Magnates Prepared to Spend Much Time and Money to Fight Amalgamated Association

Pittsburg, Aug. 24.-A conference of labor leaders at the office of the Amalgamated association yesterday was the leading feature of the strike during the day. The officials of the organization all seemed pleased with the way things were moving, and one of them said, somewhat mysteriously:

"In another six days you will see a lecided change in the strike that will tell with greater effect on the trust and aid in hurrying the final outcome of this struggle."

Just what this change is to be was not said, but it was inferred strongly that the coming event hinged upon the conference that was taking place.

Two sessions were held by the conferees behind closed doors. After adournment of the first session none of the participants would give out any information of the proceedings further than to say that the leaders had been called together for the purpose of having the situation thoroughly explained to them, and to have some action taken looking to the aid of the strikers morally and financially by all of the organizations represented.

There were present at the conference beside the Amalgamated officials, President Mitchell of the National Mine Workers of America; J. W. Jenks, member of the industrial commission: Grand Master Sargent of the Locomotive Firemen: Secretary Easley of the National Civic Federation, and General Secretary White of the United Garment Workers.

The strikers make the claim that very little actual work has been done by the combine in any of its plants since the strike began, and that what product has been turned out has been of an inferior character. Notwithstanding this the steel officials declare themselves as well pleased with the condition of affairs, and say all the mills started are working satisfactorily and turning ou good product.

The postponement of the attempt to start the Demmler plant of the American Tin Plate company until next week. the officials say, was for the purpose of putting the plant in perfect order before the men started to work. They say plenty of men will be on hand when the time comes to operate the plant.

Attention was called to a former statement made by the officials of the corporation that while delays would necessarily occur in operating the idle plants, that it would not deter the officials from proceeding along the same lines, and that they were prepared to spend all the time and money necessary to fight the union and make all of the plants non union in the end. When President Shaffer was seen at

his home last night he said in reference to the day's meeting that it was not a preconcerted one, but just happened. President Mitchell, he said, called to see him, on his way home from the eastern coal fields, and soon after his arrival William J. Bryan will continue to live the other men made their appearance. During the meeting, however, the whole strike situation was discussed, but nothing of importance was accomplished. An interesting rumor, reported from New York, is that circular letters have been sent to all the presidents of labor unions by the Amalgamated association, asking what each will or can do to assist the steel workers in their strike. In one of the replies received, P. M. Arthur, head of the Brotherhood of Locomotive Engineers, it is alleged, said that his organization held contracts with the various railroads; that they also were bound to move the United States mail, and that the organization could make no distinction between the United States Steel corporation and individual shippers.

Long Lockout Raised

New Britain, Conn., Aug. 24.-By a compromise arranged with the North & Judd company, the 250 molders who have been out of that company's foundry since July 1 will return to work Sept. 3. Two months ago the molders refused to sign a wage schedule for a year, and the company thereupon locked out the men. During their idleness they have had union support.

Steward Sapelli Will Have to Explain Matters to Grand Jury

New York, Aug. 24.-Ernesto Sapelli, the steward on the steamship La Gas- Flagler-Kenan Nuptials In cogne, who was arrested last Sunday on a charge of attempting to bribe United States Immigration Inspector Junker, was yesterday held in \$2500 bail by United States Commissioner

Alexander for the federal grand jury. Sapelli is charged with having attempted to bribe Inspector Junker to permit the landing of immigrants without their having first gone through the immigration inspection at Ellis island. After the hearing yesterday Sapelii asked permission to make a statement, and, in the presence of the immigration officials and a representative of the United States district attorney's office. he made a declaration which it is believed will result in the arrest of the principals in the case. The general belief of the government officers is that Sapelli was a dupe employed by others who got the money paid by immigrants illegally landed at this port.

Normal Test of Warships

Washington, Aug. 24.-The navy department has ordered that hereafter what are known as progressive speed trials shall be made by the vessels of the North Atlantic squadron when they conse out of dock after each lay-up for repairs. This action is taken to enable navy officials to get a better idea of the capabilities of the ships than is afforded by their official speed trials, which latter are usually made under forced draught at high speed, and thus do not disclose the ship under Lormal conditions.

Troops to Suppress Strikers

Buenos Ayres, Aug. 24.-Three thousand laborers engaged in constructing a branch of the Southern railway have gone on strike, alleging that their wages are in arrears. Most of them are armed, and they have assumed a menacing attitude. The government has ordered troops to the scene.

Foreigners Getting Anxious

FORMER WIFE OF MAGNATE

Divorced Because of Her Insanity-Said to Have Lost Mental Balance That She Was Childless

Charlotte, N. C., Aug. 24.-Henry M. Flagler, the millionaire, was married him. The people of this city are greattoday to Miss Mary L. Kenan. The ceremony was performed at Kenans ville, the home place of Miss Kenan. A special train carried Mr. Flagler and party from Wilmington to Magnolia this morning, from which place they took carriages for Kenansville. The ceremony was witnessed by a very small and select party.

Miss Kenan is of an old aristocratic southern family, and one of North Carolina's most popular daughters. She is and killed. Pawtucket, R. I., Aug. 24.-Aduater Precourt, aged 14, was driving a tipcart for a contractor, and he backed the horse and cart close to an excavation 12 feet deep, intended for a cesspool. The horse backed the cart over the edge of the excavation. The cart pulled the horse backward into the hole, and the boy was crushed under the cart decided that death was due to mis-

Work For Woollen Mills

Lawrence, Mass., Aug. 24.-The officials of the Washington mills yesterday received a message from Treasurer Wood of the American Woolen company directing them to immediately have wool supplies taken to the Prospect and Globe mills, and to start the mills at once. All the old force will be employed as far as possible. The same grade of goods will be made as heretofore.

Followed Other Unions

Fall River, Mass., Aug. 24.-The operatives of this city last night formally completed all arrangements for resistance to the proposed wage cutdown, notwithstanding the fact that the issue is dead. The loomfixers unanimously voted to strike in case of a cutdown, but their action was merely a matter of form, following that of the other four textile unions in the city.

Track Record Lowered

Springfield, Mass., Aug. 24.-Johnnie Nelson easily defeated Jimmy Moran in a 20-mile paced race at the Coliseum here last night. Nelson lowered the track record of 32:37 to 32:09 3-5. The Swede was a lap to the good when the chain of Moran's pacing machine broke. He then gained two more laps, and easily rode away from Moran after the

latter had changed pace. Laid In Bathtub and Turned on Gas Worcester, Mass., Aug. 24.--Leroy Cook, foreman at the American Steel shut the bathroom door and windows and then turned on the gas. His family was away at Brant Rock for the

New Police Station.

The \$4,500 which it is proposed to expend on the old engine house on School street to transform it into a police station, should equip the building in good shape for the police. It is proposed to abolish the present double doors and to have but one entrance, which will be through the Chief's office. In the basement will be installed a heating apparatus. For the present, the first floor will furnish ample accommodations. AGAIN LABOR DAY.

There Will Be a Grand Illumination at Houghs Neck.

Houghs Neck will have another grand illumination this season and Labor Day will be the date. The committee say it will be one of the oldfashioned kind, which were always successful.

The committee includes: W. D. Packard, president; Charles J. Jacobs, vice president; George F. Brockton Wall, secretary; William C. Eichorn, treasurer. William J. Jacobs, Arthur W. Dunham, George F. Wall, Prof. Kaplan, Edward S. Stroup, William C. Eichorn, William Agnew, Neil Murphy, Mr. McGrath, Louis Roth, W. J. Stephens, Frank Packard, John

O'Toole, Henry Keesley, W. Dwyer. A goodly sum is already guaranteed so that a good time is assured. The plans will be more fully mapped out at a meeting to be held tomorrow.

The valuation of Hyde Park is about one-half that of Quincy, the assessors of 1901 reporting a total of \$10,805,040. a gain of \$193,300 in real estate and \$57,490 in personal estate. The tax Boston rate is \$17.80, the same as last year.

TODAY'S COURT.

The court found pr bable charge to believe Charles B. Locke guilty of larceny, and he was neld in \$1500 for the grand jury. Charles Lawless was arraigned for drunk at

Quincy and case continued. There was a hearing in the illegal transporation case of Patsy Napoli, who was overhauled n the Houghs Neck road last Saturday. City solicitor Sears appeared for the government and J. W. McAnarney, Esq., for the defense. The court continued the case.

Tremont Theatre.

E. Kirke LaShele's season at the Tremont Theatre will open on Monday evening next, when he will present the youngest star, in point of service, who also is the oldest actor-again in term of service-on the American stage. This double distinction belongs to the veteran J. H. Stoddart, who, after 65 years in "stock" and 'support' now comes for the first time as a star to Boston. For the first vehicle of his stellar ambition, Mr. Stoddart has selected a Scottish play by Augustus Thomas and James W. Mc Arthur entitled "The Bonnie Brier Bush." As the title indicates, the piece is founded upon the Dorchester. charming stories written by the Rev. Dr. John Watson, the well known Liverpool noncon- Boston. formist preacher, under his pseudonym of "Ian MacLaren." In transferring the story to the bury. stage the theme has been quite closely followed; a few characters in the book are missing from Plain. the play, but in their stead others from some of the author's other stories have been used. For example, Kate Garnegie, who is of minor importance in the story of "Beside The Bonnie Brier Bush," is made a prominent character in Roxbury. the play, and Lord Donald Hay is made the over of Lachlan Campbell's daughter, Flora. But though it all stands out most prominently ford. the transformation of the religious-crazed Campbell to a loving, sensible father. The production of " The Bonnie Brier Bush" will be a sumptous one.

Castle Square Theatre. A most interesting announcement is made by

the management of the Castle Square Theatre regarding the attraction at this play house for the coming week. The selection made is the modern play in three acts, by Leo Trevor, Brother Officers," which proved immensely popular with Boston audiences when it was Steinberg of Worcester. played at the Hollis Street Theatre only a few seasons ago. It was universally commended broughout an extended tour of the company presenting it in all the big American cities and was aptly pronounced to be "a veritable drama of good artistic quality, dealing with elementary principles and making a direct appeal not only to the heart but to common sense." Admiral Schley has addressed a letter to Acting Secretary of the Navy clip. Hackett, in reply to Mr. Hackett's of ject was merely to obtain a statement give utterance to the sentiments with which he was credited, and that in no garded as challenging Howison's fitness to serve on the court, although such fitness might be challenged later, in due form, after the court meets. Schley's request was designed, he says, to elicit from Howison a denial or affirmation so that, if he should say he had expressed the sentiments ascribed to him and assumed the responsibility for them, he might withdraw before the court convenes.

Schley points out that, while it is true that the selection of Howison was entirely satisfactory to Schley and his counsel at the time the appointment was made, the alleged interview, the authenticity of which they wish to have determined, was brought to their attention after the appointment of Howison had been announced. It is said that Schley has also pointed out in his letter that Howison has not disclated the views attributed to him, for his general denial of having publicly expressed opinions was made prior to the publication in question.

Rumors are abroad that charges will be made in behalf of Admiral Schley that someone in the navy department has mutilated the records; that letters have disappeared and that pages out of letter-press copybooks are also missing. Owing to stringent orders against the discussion of the Schley case, it is impossible to get accurate statements or this point.

The navy department is arranging to summon before the Schley court of inquiry witnesses from Cuba, including at Cienfuegos. The comptroller has decided that such witnesses can be given mileage and witness fees. General Shafter may be called as a witness for Admiral Schley, to testify as to his knowledge of the purpose of Cervera's fleet to escape from Santiago harbor on July 3, 1898. It is stated that Shafter was informed of Cervera's plans the day before the Spanish fleet came out, and that he communicated this information to Sampson, who, nevertheless, departed for Siboney a short time be fore Cervera left Santiago harbor.

General Russell A. Alger may be summoned as a witness. His relations to General Shafter, who is anti-Sampson in feeling, may make his testimony of sensational interest.

Captain Lemly will give practically his entire attention to the Schley case from this time on, leaving the details of the judge advocate general's office to those who have handled them in his ab-

Turfmen Looking With Interest Toward the Futurity.

FINE FIELD OF TWO-YEAR-OLDS.

W. C. Whitney and John Madden Have the Best Youngsters Eligible For the Great Contest-Blue Girl and Nasturtium's Chances.

Turf followers are looking forward turity, America's richest race, which will occur Aug. 31, the first day of the Coney Island Jockey club's autumnal session at Sheepshead Bay. The famous New York course has been the scene of many stirring speed tests, but this year's Futurity will bring out a field of 2-year-olds that should stir the blood of every hardened veteran in the stands. The stake will be worth be- Dr. Polemus H. Swift, Methodist, Chitween \$45,000 and \$50,000, figured on cago. a basis of 15 starters, the usual number. The winner's share will be between \$35,000 and \$40,000.

Many new sires are represented in the Futurity. The get of a large numentirely, and various of those whose progeny is eligible have fewer representations than ever before. He was sick most of the year, but is rapidly rounding into fine condition. Because he won the Foxhall Stakes, worth nearly \$15,000, at Brighton Beach, New York, he will have to shoulder a penalty of 12 pounds. This will make his weight 134 pounds.

Nasturtium's weight, unless he wins a race worth \$5,000 at Saratoga in the interim, will be 129 pounds.

Soon after Mr. Whitney purchased Nasturtium from A. L. Aste for \$50,000 the horse caught a slight cold, and he has not since been seen in public. Goldsmith is a "maiden" and as such is entitled to an allowance of 12 pounds. This weight gives the horse a grand chance to win.

Blue Girl, the best filly of the season, will have to shoulder 131 pounds. She has won several valuable stakes and is York. compelled to pick up 12 pounds extra. Heavy weight has not been a hindrance to her success heretofore, as she has won and defeated colts easily with 126 pounds up.

Incident of Grover Cleveland's First In Kentucky - Major McDowell's Joke-Greeley's Passage at Arms With a College President.

[Copyright, 1901, by Champ Clark.] An ex-representative from Maryland on one occasion entertained the cloak-

room with this remarkable bit of history. He said: "When Grover Cleveland was nomi-

nated in 1884, ex-Senator Arthur P. Gorman was chairman of the national Democratic committee. Soon after the nomination Daniel Manning wrote to Gorman to come to Albany. He went, and Manning took him over to the gubernatorial mansion and introduced him to Mr. Cleveland. During the conversation Gorman said:

" 'Governor, I came down to consult you as to the conduct of the campaign.' "Cleveland replied: 'I don't know a continental thing about a campaign! You run it to suit yourself:' which Gorman, taking Cleveland at his word, proceeded to do. Now be it remembered that Cleveland had a habit of spending a good deal of time incubating a document and then springing it suddenly upon an unsuspecting and astounded public. Toward the end of the campaign Manning telegraphed York's capital. Manning met him at the depot and told him that Cleveland ed the glass roof. had prepared an address to the people which, if published, would knock his presidential fat into the fire and play the deuce generally, that he had endeavored to dissuade him from his suicidal course without avail and that he had sent for Gorman as a last resort to 000 per annum at home. But the difsee if he could devise some plan to cir- ference in living expenses, the necescumvent Grover and prevent his political undoing. Gorman listened, wondered, said little, but, after the fashion of the Irishman's owl, 'kept up a deuce of a thinking.' They drove to the governor's mansion. It was a clear, crisp, frosty day, and a bright fire was burning in the open grate.

One of the most frequent requests Presidential Campaign-Senator Gor- made by members is for "unanimous man's Summary Disposal of an Ad- consent to extend remarks in The Recdress to the Public-Starting a Row cord," which is hardly ever refused. Recently the senate made a feeble effort to curtail this privilege. While individually I make little use of it. I sometimes doubt whether its abolition would prove profitable. As it is, a member may, and frequently does, content himself with delivering the showy parts of his speech and printing the more tedious but substantial parts. This process certainly saves time, even if it increases the bulk of The Record, and, as it costs a pot of money per hour to run congress, it saves money. Another thing-if members are not permitted to print, they will speak more. However that may be, one day Judge

Culberson was making some remarks, and the hammer fell upon him in medias res. He said: "Mr. Speaker, I ask unanimous"-

The speaker, supposing he was making the usual request, didn't wait for him to finish, but rattled off the stereotyped formula, "The gentleman from Texas asks unanimous consent to extend his remarks in The Record."

"Mr. Speaker, Mr. Speaker," shouted Culberson, "you got that wrong! I didn't desire to extend my remarks. What I want is leave to withdraw all I have said!"

This was such an unheard of performance that it knocked the speaker Gorman to hasten to Albany on busi- all of a heap, and it was several secness of most serious import. It is easy enough to say and is frequently true that many congressmen and senators would not make \$5. sary and legitimate outlay in campaigning and other incidental costs more than eat up the surplus.

So that a common performance is for members to fall to talking of the unprofitableness of the whole business, voicing in many ways old King Solomon's undying wail, "Vanity of vani-"After passing the compliments of ties; all is vanity." One morning some members were indulging in lugubrious talk about the smallness of congressional salaries, etc. Culberson listened I publish it I desire to know what you awhile and then cheered them up by saying, "Yes, boys, the pay ain't very big, but you must remember that it is Gorman a large roll of manuscript in pow'ful reg'lar;" which cured them of ennui, temporarily at least.

It is not a difficult matter to read between the lines and recognize the fine hand of A. G. Spalding in the preliminary discussions now going on in the baseball world regarding the settlement of the controversy existing between the two great baseball associations of the country.

While Spalding is with his bride at Point Loma, Cal., his friends and lieutenants are at work, and nobody need be surprised to hear that the diplomatic A. G. has suddenly returned to the east and that positive negotiations are on between the leading men of the two organizations looking toward a cessation of hostilities and the sensible dividing up of star players and desirable circuits. Realizing all this, for when Jim Hart and Ban Johnson are

Then it may be decided to hold off the session until the end of the championship season for the Nationals' finish in the west and the Americans' in the east, so it would be difficult for all of the players to get together before the middle of September. So the meeting of the players may be postponed until about the first or second week in Octo-

But after the middle of July the real timber begins to crack and forge to the front. Then the weaklings find the pace to fast for them and fall back out of it. New York's spurt this year frightened nobody, while the critic who openly ignores the pennant possibilities of the Phillies at this time is foolish. The chances of the Pittsburg and St. Louis teams will depend largely upon what kind of a showing the western hustlers make on their next tour of the east. If they fall down, as so many of their predecessors have done in the past, nobody need be surprised to see the final struggle between the Brooklyn and Philadelphia teams. As the eastern teams wind up the season in the west there comes another pretty problem to be figured out. If Brooklyn and Philadelphia start west on that final series close together, look out for the champions, for they are likely to play a better game away from home than the Quakers.

I had a letter from Conway W. Sams of Baltimore the other day, and it indicates that McGraw has not abandoned hope of winning the American pennant. Sams is probably closer to "Mugsey" than anybody else, and Mc-Graw would rather have advice from the Oriole judge and sportsman than from Mark Hanna.

McGraw believes that his "iron man," McGinnity, will come around soon, and when he does he hopes to have his Orioles forge rapidly to the front. With McGinnity in shape none of the American pitchers can hope to stand up

against him.

Griffiths has been in harness for over a score of years, and so has Nichols and the original "rail splitter," Young. Young has done as good work this year as he ever did in his life, and Nichols is not far behind. Nichols, who is still called the "Kid," was the hero in an interesting bit of baseball history not many years ago. In 1890 he pitched for Boston in a game against New York, Rusie twirling for the Manhattanites. Not a run was made for a dozen innings, and in the thirteenth Tiernan sent the ball over the center field fence, winning the game for New York. This has always been considered the greatest game ever played on Manhattan Island.

Recently Nichols was the hero of a ten inning game in New York, while Mathewson this time twirled in place of Rusie. Mathewson weakened in the tenth inning, and Boston won the game. Nichols had wiped out that old defeat after many years.

According to baseball maxims, pitch. ers of that sort ought to have been troubled with dead arms years ago. It simply illustrates what a careful life will do for a baseball player. Nichols never had a glass arm, and if other players were as careful of their physical condition they would be just as fortunate.

The veteran Duffy has had his troubles in Milwaukee, but disappointments have not affected his individual work. Duffy played in center field for 47 consecutive games without an error. Duffy has had the third base hoodoo hovering over his team all the year. It is singular how few really first class third basemen we have in the country. GEORGE E. STACKHOUSE.

Low spirited, tired, hungry and with worn-out shoes the young adventure seekers, Johnson and Anderson, whose departure was noted in the Ledger, have returned. TRIED TO CROSS CHANNEL

But Collapsed When Within Six Miles of His Objective Point-Became Blind and Would Have Gone Down If Allowed to Remain In Water

Dover, Eng., Aug. 26.-Mr. Holbein, who on Saturday, the anniversary of Captain Webb's swim from Dover to freely all the rights granted by the con-Calais, started from Cape Gris-Nez (between Boulogne-Sur-Mer and Calais) in an attempt to swim to Dover, narrowly escaped drowning. He covered the course to a point within six miles of Dover, and then collapsed, after having been in the water 12 hours and 46 min-

The tug which accompanied him took him from the water and brought him to Dover at 5 o'clock Sunday morning. He was carried to a hotel in a semi-conscious, precarious state, and subsequently, on the advice of his medical attendants, was removed to a hospital, where he lay for some time in a serious condition. It was found that his eyesight had been badly affected by the salt water.

Last night, however, he had recovered, and he announced his intention to renew the attempt. His exploit was very remarkable, considering the the roughness of the sea, and has established a record.

Holbein wore a white cap that covered his head and partially protected his face, and also a mask from brow to nose, in order to protect his eyes. He found it impossible to take solid food without swallowing sea water, and he Brasee's Old Stand, therefore subsisted mainly on raw eggs, as he was able to suck these while lying on his back. He also took hot

milk from a feeding bottle. The sea was heavy, and there was a nasty swell. His attendants became seasick. He swam with a powerful stroke, alternately on his back and on his breast, making a good pace. The first six miles from Cape Griz-Nez were covered in 2 hours and 25 minutes. At sundown he found great difficulty in keeping a straight course. Much of the time he swam with his eyes closed, owing to irritating effects of the salt water.

Instructions to Holbein were shoute through a megaphone, and powerful acetelyne lamps were lighted to guide him. In the middle of the channel the wind was fresh and the water very rough. At the end of the sixth hour he was swimming well, but he began to complain of an injury to his left hip, sustained on the rocks at Cape Gris-Nez, but not mentioned before.

At this time he was about six miles off the British coast, and Captain Lambert was of the opinion that he might make Dover on the next tide. He continued to swim well, mainly on his back. After 11 o'clock he was once lost Fu, and are expected to arrive here on to view for five minutes, a big wave having swept over him. He kept going steadily, but during the 10th and 11th hours a westerly tide drifted him much out of his course, and it was evident that the heavy seas were having

a bad effect. During the 12th hour his stroke weakened considerably. He was swimming with breast low in the water, and head much down. He was making almost no progress, and seemed almost unable to grasp the directions given him. Twice he turned completely round, making for the French shore. At 4:20 a. m., a council was held on the tug, and it was decided to take him out of the water. He was turning like a top, and hopelessly blind. If he had been left longer he must have gone

down. Allowing for a zig-zag course, it is estimated that he swam 26 miles. His next attempt he promises to make next

Resembled Tropical Storm

Boston, Aug. 26.-The heavens fairly Saturday night, and let out enough rain to do credit to a tropical storm. The water did an immense amount of surface damage, while the sharp lightning flashes followed each other so rapidly that for an hour or more the sky was fairly vivid with electricity, and thunder pealed in a deafening roar. In this city and the suburbs thousands of cellars on streets on lower levels were flooded, as the streets were knee-deep in rain water, which the overtaxed sewers were unable to carry off. The storm was the worst this summer.

Marvelous Speed In Telegraphy London, Aug. 26 .- The new Hungarian system of telegraphy has been a marvellous success. The system has been installed between Budapest and Fiume, a distance of 375 miles, and is in practical working order at a speed of 40,000 words an hour. The messages are written in Roman characters, and need no translation. The system is an ingenious combination of the telegraph, the telephone and photograph, the messages being written on sensitized paper by ray light and developed and fixed by an automatic process.

Riot In Public Park Indianapolis, Aug. 26.—Another riot broke out last night in a crowd of 500 people at Fairview park. Four negroes were badly injured and one, named Harris, had his right arm broken. The trouble was caused by a gang of white toughs. Several negroes were set upon and beaten. Police stopped the trouble. Four members of the gang were arrested.

> Amalgamated Officials Willing to Make Concessions to Pave the Way For Reopening of Direct Negotiations With the Steel Corporation

> Pittsburg, Aug. 26.-Some remarkable changes in the strike-ridden mills of the United States Steel corporation are promised for this week. It is stated on good authority that before the end of the week those of the plants that have been operating on single turn will be run with full force, and for the usual three full turns each day.

Men enough have been secured for this purpose, the officials say, in spite of the claims of the strikers that the company could not get enough men to operate their plants, and the managers opened over this immediate section late of the various mills say they will be ready with all the skilled men required to start up the machinery and turn out by an unknown steamer in Vineyard

a heavy tonnage. Outside of the Star Tin Plate plant | Captain Lowe and his crew of six men yesterday there was a large number of strikers on picket duty. They were boat. The schooner was bound from quiet and orderly, but had their eyes and ears open for any signs of new comers. The peculiar feature of the strike about the Star plant is the good feeling displayed between the strikers | the collision. and the manager of the plant. When Superintendent Piper left the mill yesterday he met the strikers and laughed good-naturedly at them. He said to the anxious pickets: "I had more fun in getting those last men into the plant han at a game of checkers."

There is no change in the situation regarding the tube mills. The mills were all quiet yesterday, and the former employes remained away from the plants. It is understood that the officials of the National Tube company have practically determined not to start these plants for the present. In furtherance of the "peace" pro-

gram, which is said to have been in the course of preparation for several days, J. W. Higgins yesterday, for he lost his it was given out by one on the inside and one who should know, that the Amalgamated executives have consented to have certain propositions saved except the store books and cash made to the officials of the United States Steel corporation, through members of the conciliatory committee of the National Civic Federation. These propositions, if accepted, are expected to bring about a settlement of the great strike.

Those interested in the matter are in waiting for word to proceed with the ing of an air hose on a freight train on program, as outlined at the conference of the Amagamated executives and the conciliatory committee of the Civic Fed- brakes, and seven cars left the iron, eration, last Friday. The propositions rolled down an embankment of about 30 carry certain, concessions by the Amal- feet, and were demolished. Six of the gamated officials, which, it is hoped, derailed cars were loaded with live will pave the way for the reopening of stock. None of the train hands was direct negotiations between the asso- injured, and all of the live stock esciation and the company. They include the terms under which President Shaffer and his advisers stand willing to settle. These terms and the mode of their presentation are carefullyguarded secrets.

While the conferences were discussing peace plans, the Amalgamated men were shown the impracticability of sympathetic strikes by the miners and other organized men affiliated with the American Federation of Labor. It has been reported that the congating the Federal Steel company consay. The surrender of numerous other | tracts, and told President Shaffer, with unmistakeable emphasis. Of this, Saturday night on a charge of assaulthowever, Secretary Williams said that during the conference he had heard no adverse criticism by the Civic Federation conferees on the attitude of President Shaffer in this matter of contracts.

It was stated last night that when the Lower Union mills of the Carnegie company, in Lawrenceville, were Plainfield, N. J., from apoplexy. He they were short about 60 of the skilled ready to start up the officials discovered men who had been working there up to of becoming dependent upon others is Saturday night. As a result two of the thought to have been the reason for roughing mills were idle, the 12-inch the sulcide by hanging of Davis Groves, mill is crippled, the plate mill was only a wealthy farmer, living at North operated about half the number of heats Rehobeth. Up to Thursday he never Henry Coyer fell from the roof of Parker's park pavilion, at Littleton, N. ed that the laboring men in this plant him of partial use of his hands. and the nine-inch mill is still out, and experienced a day's illness. On that H. He landed on his feet. No bones had become discontented over the sitwere broken, but death followed a uation, and had announced that they would no longer remain idle, but would go back and do all in their power to assist in operating the mills. The skilled men, it is said, quit work much against their will, and only because they were members of the Amalgamated association, and had to obey the orders issued to them. Officials believe The plant of the Illinois Sugar Re-fining company, located at Pekin, Ills., All those who remain at work in the mills are understood to be receiving a negro, was yesterday burned at the manufacturing, and the growing crop full pay, whether the plant is operated full or not.

BOSTON TO NEW YORK Peter McNally Will Undertake to Swim the Entire Distance

Boston, Aug. 26 .- To swim from Boston to New York is the feat that Peter S. McNally will attempt, making the start next Sunday, the entire distance to be covered within 30 days. Mr. Mc-Nally has made many long swims, but this will be his greatest attempt, and for daring will equal his attempt to cross the English channel. He will enter the water off the Charlestown bridge about 1 o'clock, and begin his long journey. He expects to make

Boston Light on his first leg. A steam yacht, thoroughly equipped and provisioned, will accompany him on his tedious trip, and during the journey he will be personally attended by two tried friends and trusty swimmers in a small boat, who will be at hand to render any needed assistance if necessary, and to cater to his wants.

Mr. McNally hopes to accomplish the entire distance and arrive at the battery in New York before noon on Monday, Sept. 30. The actual distance is 282 3-4 nautical miles, or about 347 statute or land miles. The swimming course, however, will be very little less than 400 miles.

Two Runs of Dorchesters in Ninth Did Not Count.

Score at End of the Eighth Was a Tie.

A Weekly Established in 1837, which has the Largest Circulation in Norfolk County, and the Quincys Winning.

A crowd variously estimated from previous to publication to guarantee insertion 4,000 to 8,000 assembled at the West Quincy playground on Saturday to witness the much advertised ball game between the Dorchesters and West Gibbons, cf., Quincys. It was the second of a series Clancy, 2b., of three games, the first being won by the Dorchesters 5 to 1.

The audience was not confined wholly to Quincy people there being hundreds of fans from Dorchester including many of the fair sex, who were as enthusiastic as the men in applauding the good play of the visitors.

The safe hits were very equally divided between the two teams, and so Miles, cf., were the errors. Aside from two doubles on each side, however, all the hits were for one base. The most costly errors were the wild pitches and passed balls, each side having one of the former and three of the later. The Dorchesters made all their runs in the first three innings before the West Quincys got started; 2 in the first and 4 in the third. TWO CARS FOR 1000

Alert for Business

The street railway company ran two and three cars on its trips from Quincy to accommodate the crowds that

desired to attend the Dorchester-West Quincy game, which was attended by upwards of 5,000 people. At the head of Hall place the company has a long turnout. When the ball game was over, lowever, there was not a car in wait out, cancelling the last two runs of the ing for the thousand or more people who desired to ride. After a wait of Dorchester, and the score stood 6 to 6. fifteen minutes, two cars came from East Milton, and about 150 crowded into each of them or hung on as best they could, and twenty minutes later two cars for East Milton came along, which did not return for 15 to 20 minutes. By this time, most of the crowd had dispersed, some walking to Quincy Centre, rather than wait with the uncertainty of getting a ride. And then rain began to fall before some reached home.

The company received perhaps 100 fares on each of the two cars for Quincy at 6.30, where it might have taken 1,000 fares to Quincy or East Milton, had it had cars in waiting. From a business standpoint the company lost \$20 to \$30 in fares, but what is worse, disgusted the people who will be apt to stay away from ball games at West Quincy, and cause a further loss. There was no excuse for such wretched accommodations as the superintendent should have known that crowds had been taken to the game and would want to start for home about six

Fire at City Hall.

Twice this summer has City Hall een on fire, and yet the building still remains. A third fire may finish it The first fire was several weeks ago. Then crossed wires started a blaze in the police station which was promptly xtinguished by Capt. Hanson.

The second fire was on Sunday morn ing, and this was quite a serious one which looked upon the arrival of the fire apparatus as though it might be disastrous. Comparatively few people knew until late in the morning that there had been a fire of any kind.

Usually an alarm from Box 26 at any hour is enough to bring out a crowd of several hundred, but for some reason the alarm from this box at 5.30 Sunday morning did not, and at no time was there more than fifty persons present. The fire started in the City Council chamber under the desk of Clerk Spear. It worked along between the floors toward the rear of the building a two weeks' vacation in New Hamp-

and then up in the wall toward the shire. roof. Mr. Spear's desk was entirely consumed, and the desk of President Bryant was so badly burned that it is roduction in New York a few weeks ago at- beyond repair. The fire did not burn through into the offices on the first floor, but the fire men were obliged to ip off the plastering in order to get at the blaze.

There was apparatus enough on hand, and several lines of hose were laid but little water was used however, the chemicals doing the work avenue after a pleasant outing at Blue

SAMPSON'S PROMOTION

The Basis of the Now Famous Naval Controversy

SCHLEY FELT AGGRIEVED

Junior's Command-Captain For-For All Concerned in the Battle

Kansas City, Aug. 26.—Ca; tain James McQueen Forsyth, U. S. N., who had charge of the naval station at Key West during the Spanish-American war, spent yesterday in Kansas City, on his way from San Francisco to his home at Phiadelphia. To a Times reporter Captain Forsyth talked of the Schley Sampson controversy, and that paper today quotes him as saying:

"While we have been instructed by the navy department not to discuss the merits of the case, everyone knows that the navy looks upon the controversy as an unfortunate affair. We believe there was plenty of glory for all concerned. The fact that a junior officer was placed in command above his seniors is responsible for the whole business. Sampson was a captain and the 17th ranking officer of the navy. No one ever thought of him as the successor to Admiral Sicard, and I don't be lieve he ever thought of it himself, but he was familiar to the people of Washington and they decided to place him in command.

"Of course the officers who outranked him did not like it. It is not to be expected that they would. But Washington said Sampson, and that settled the matter. Schley was among the officers outranking Sampson, and he was thrown directly under the junior's command. He naturally felt the promotion more than any other.

"The battle of Santiago was one of the most brilliant ever fought. Regardless of who was responsible for such effective execution there was This time for 255 miles was made in the glory enough for both Sampson and Schley. The controversy only serves to dim the brilliancy of the victory, and it is greatly to be deplored. That anyone should question the bravery of either of the men is particularly unfortunate and wholly unjustified."

Captain Forsyth, who will be retired on Sept. 25, has been associated with Admirals Schley and Sampson at different times during his long life in the navy. When he left Key West h took command of the battleship Indiana. Later he was chief of staff to Admiral Watson, in charge of the Asiatic station, and for the past several months was second in command at the Mare Island navy yard at San main a few days before proceeding to Philadelphia.

Church Was Wrecked

New York, Aug. 26.-Jersey City does not seem the worse by the effects of the storm that passed over it Saturday The street and water department called out all of its available forces at daylight yesterday, and the streets had all been cleared before night. At St. Mary's Roman Catholic church, which was wrecked, the pastor would allow no work to be done, and the removal of debris did not begin until today. Father Ter Woert says the question of repairing or rebuilding the church will be settled after the extent of the damage has been fully ascertained.

The Earthquake.

To the average resident of the temperate zones an earthquake is a rare and terrible event, creating more consternation than any other visitation of nature. In the tropics, however, particularly in Central America, it is wonderful how easily the residents become accustomed to these shocks, which do not come, however, wholly without warning.

You are sitting on a piazza on a hot afternoon chatting with your friends when suddenly the sky seems to grow hazy and the crows stop cawing. There is a general rush, and, though you may not help feeling uneasy.

The old natives say, "We're going to have a little shake," and then the house begins to rock, the tumblers fall off the table, you feel deathly sick at the stomach, and the thing is all over. The sky clears, the crows begin their noisy screams, and things are soon put right again.

Suspect Chased Through Canada by Officers Was Not Blondin

Boston, Aug. 27 .-- Chief Wade of the fact that the man captured by his oflicers in the Matane woods, after a chase of four weeks, proved not to be the much-wanted Blondin.

A dispatch received yesterday from Inspectors Letteney and Proctor states that the man was the exact counterpart of Blondin, except that he had no India ink marks on his arm. It was also stated that the officers would start for home at once.

With regard to the great chase, Chief Wade said: "As every indication pointed to the fact that this man was Blondin, there was nothing else for us to do but keep after him until he was captured. While there was any doubt were bound to keep after him. Now that we know that he is not Blondin promising clew we get hold of. It has not been any junket for the men who were at work on the case."

Houghs Neck Improvement Association Will Become Incorporated.

The executive committee met last night in the Sportsman's Grill and reports were made and approved, and on balancing the accounts it was found that there was a surplus of about \$90 then in the hands of the treasurer.

This speaks pretty well and is a gross disappointment to those pessimists who predicted a failure of the 97 two days' carnival, and who did not 92 contribute a cent to the cause, but Cottage City for a brief visit. 86 rather did all that they could to pre-92 vent its success. Pittsburg, Aug. 28 .- Practically the nly significant event in the strike yesterday was the positive stand taken by the American Tin Plate company in reference to its course in the future. An official statement from this company denies that there are any negotiations on foot looking to a settlement of the strike, and authorizes the statement that mills put into operation during the all men going to work now will be retained in their positions.

This statement will have its effect because of the fact that the tin plate trade has always been considered as among the strongholds of the Amalgamated association, and the defi appears to have been brought about by the asociation declaring a strike against the Tin Plate company, after the scale for he year had been signed.

Notwithstanding the fact that the Amalgamated people claim justification on the ground that their constitution provides for such procedure, the officials of the Tin Plate company consider that henceforth they are determined to of information that led to the unearthcut loose from union labor entirely.

The association officials treat the breat with indifference, their only reply being that the company cannot earry out its plans because nearly all of the skilled tin workers of the country are members of the association, and the plants cannot be run without them. The corporation, however, has started several of their plants in a way, and claim to have all the men necessary within reach to operate them in full, as soon as the machinery is in proper shape. SAMPSON ENGAGES COUNSEL

Rests With the Court Itself-Officers of the Brooklyn at Time of Santiago Fight Will Testify For Schley

Washington, Aug. 27.-It is distinctly asserted by officials of the navy department from the Schley court of inquiry that no notice of withdrawal has been received from Admiral Howison, but so much secrecy and mystery attends all such announcements as to give rise to all sorts of speculative conjectures.

REAR ADMIRAL HOWISON.

It is assumed in some quarters that the Schley adherents do not really desire to have Howison taken off the court, but rather to go as far as they can without accomplishing that result in the direction of convincing the country in advance that the tribunal is packed and secure a certain discount in the popular mind from any of its findings that might

It is understood that Admiral Samp sen is to be represented before the Schley court of inquiry by counsel. practice law. Some time ago Admiral Schley, in sending his list of witnesses to the de partment, included a request for all the officers of the Brooklyn. The department replied that a number of the offi cers of the Brooklyn would be on the list prepared by the department and asked him to have specifically named the Brooklyn's officers he desired. The admiral responded yesterday through Colonel Parker of his counsel. He gave the names of the principal officers of Rutherfordton, N. Bradford Favors Himself

Danvers, Mass., Aug. 28.—The town hall was well filled last night by Danvers men who desired to hear the views of Gamaliel Bradford of Boston, who is a candidate for the nomination for governor. His remarks were devoted prinpcially to an effort to show why neither Mr. Hamlin nor Mr. Gaston should be nominated for governor, with a statement that his own platform was popular government. He charged that Mr. Hamlin's platform was purely on national issues, and that it would be inexpedient to nominate Mr. Gaston because of his connection with the Boston Elevated Railway company.

For many a long year war has been waged against tight lacing, and at last Dame Fashion has veered to the same side; hence the new corset.

It is perfectly true that the straight corset increases the size of the waist, but it also decreases the size below the waist and produces a slender, graceful and naturally proportioned figure without exerting any of the pressure that prevailed in the days when small waists were fashionable. It is, of course, absolutely necessary

that straight corsets should really be cut to follow the lines of the figure accurately and give support only where it is needed.

Suspenders attached to the corsets do not pull the figure forward, but keep the corset in place and prevent it slipping up or becoming unfastened, which it is rather apt to do, a proof that it is really easy fitting and comfortable. A good deal of nonsense has also

SHAFFER IS NOT WORRIED

Says Mills That Have Started Are Doing but Little Effective Work-Steel Men Say That Strike Can Only Be Settled by Men Going Back

Pittsburg, Aug. 29.-The steel corporation continued making gains in this district, and yesterday added enough men to its force at the Star plant to insure the working of two mills double turn, night and day, from now on. The management claims that the entire plant will be on full time before

claim cannot be made good. In pursuance of its announced plan to run all of its plants absolutely nonunion, the American TinPlate company has commenced advertising for "68permanent jobs, but in every case the and the applicant must declare himself start either of its Monongahela or United States. Demmler plants, but announces that

both will be started soon. When asked what he thought of the Tin Plate company's avowed intention of breaking away from the union entirely, President Shaffer of the Amalramated association said: "Where will they get the men to run their plants? If we thought the men could be secured the threat might frighten us. Until we are assured they are forthcoming we

will keep our nerve." The latest official delaration from steel sources is that the strike can now be settled only by the men going back to the mills. The position the officials ake, it is said, is that the strike is ever so far as their dealing with the strikers as a body is concerned. They want workmen for their idle mills, and men who want work can have it for the asking at wages paid before the shut-down. They may be union men or not, but the

Notwithstanding the well-defined position taken by the steel corporation as to a settlement, another arbitration scheme was launched last evening by Simon Burns, president of the Window lected from among such men as Archoisop Ireland, Bishop Potter, Seth Low, M. The fact that the corporation is adding to its force daily does not worry Shaffer, because he believes them to be either unskilled or poor workmen.

The steel people have nothing to say, but point to the mills at work and the product turned out. Actions, they say, speak louder than words.

221, at its meeting last night, declared a strike in the Olympia, Granby, Richland and Capital City mills, until the authorities shall rescind their action foreing operatives to leave the union. The union's strength will be tested when the mills open for work. Conservative estimates place the number of strikers at 900 to 1000. It is expected that this number will be considerably augmented during the next week. The mill officials have begun the swearing out of writs to eject the striking tenants from the dwellings which are owned by the two weeks at a time.

Lincoln, Neb. 29 .- Justice of the supreme court, Samuel J. Sedgwick; regents of the university, Carl Jernst and H. L. Goold. Republicans of Nebraska nominated the above ticket and adopted a platform in harmony with party policies. The action of Governor Savage in paroling from the penitentiary former State Treasurer Bartley furnished the only real excitement of the convention. Finally the committee on platform reported against the parole, and demanded the return of the ex-treasurer to the penitentiary, and was sustained by the convention. Governor Savage, late last evening, cancelled the parole of the ex-treasurer, surrendered him to the sheriff of the county, and ordered

his return to prison.

In opening her interview with the comnissioner, she said she had called on him for an account of his stewardship, and asked if he did not think New York was an awful wicked place. The comnissioner replied in the negative, and Mrs. Nation repeated the question as requested her to stop, saying he would not discuss the matter with her. She continued, however, to ply the commissioner with questions concerning drinking places, all of which he refused to answer. Mrs. Nation said she had come to New York to do the city some "You don't know what you are talk-

## OBJECTED TO TRUSTEES

Widow Cody Rejects a Fund of \$2500 Raised in Her Behalf

Arlington, Mass., Aug. 29.-The money subscribed by Arlington people a few weeks ago for the benefit of the family of Police Officer Garrett J. Cody, who was shot and killed July 2, has been returned to the donors, having been rejected by Mrs. Cody on account of the conditions named in the gift. The amount subscribed for the fund was \$2500, and by the terms of the subscription the fund was to be held, invested and expended by three trustees to be appointed by the selectmen. The three men appointed as trustees were Warren W. Rawson, Henry Hornblower

and James A. Bagley, Jr. In reply to a letter in relation to the fund, written by one of the trustees to Mrs. Cody, her brother, Rev. W. J. Mc-Carthy, wrote in her behalf: "If the with public thanks for the generosity of the citizens concerned. If the subscribers do not desire to place the gift as it is in her hands, she would respectfully request the appointed trustees to return the same with her thanks

to the respective donors." The trustees were of the opinion that they had no right to pay this money directly to Mrs. Cody at this time, and checks for the amounts of the gifts were returned to the donors yesterday afternoon. The entire amount of money was raised within a few days after Officer Cody was shot, and a number of citizens were interested in circulating the subscription papers. Cody was killed while trying to arrest a negro, and public sympathy was aroused for

his widow and five small children. Balloon Accident and Fatality

### Good Afternoon.

Now that the Council chamber at City Hall must be replastered in part would seem as though the opportune ment. time had come to add to the office room at small expense. Three good offices could be secured on either the north or the south side of the chamber, by running a plastered partition the back, and it would leave the Council chamber plenty large enough for all uses. The new offices would be well good accommodations for the Sewer Commissioners, City Engineer and School Committee, or more desirable offices for the Mayor, the Assessors, the Board of Health, or the Com-

morning for the third round of match on Wednesday as will be seen: play for the amateur golf championship of Massachusetts at the Montclair links. On Wednesday morning six of the nine to qualify were defeated and tried later for the consolation cup these were Messrs. Atherton, Farrington, Chipman, White and R. B. Porter of the Wollaston club and Erstwell of the Merrymount elub. In the afternoon the other three-Messrs. Morrill and H. W. Porter of the Wollaston club and Anderson of the Merrymount clubwere forced entirely out of the race.

The winners of the second round for the championship cup were Gilbert, Davis, Thorp, Richards, Wellington, Myers, Reid and Manning, who play the third round today.

The surprise of the day was the defeat of Lockwood, who was picked for the championship, in the first round. It was by the close score of 1 up with Cracknell who excelled in short approaches and putting. The medal play of each was 81.

Cory, the donor of the cup, who was No. 3 in the qualifying round also fell before Wellington of Oakley.

## BURSTING OF A BOILER

Responsible For at Least Eleven Deaths on Steamboat

NO WARNING OF DISASTER

Passengers Who Escaped Scalding Steam and Boiling Water Were Struck and Badly lnjured by Flying Portions of Splintered Cabin

Philadelphia, Aug. 29.-While the steamboat City of Trenton of the Wilnington Steamboat company was on ner way from this city to Trenton yesterday afternoon, her port boiler exoloded, killing eleven persons and injuring over a score of others. Some passengers are missing.

more of her passengers and crew may be found when the water is pumped out. The City of Trenton made daily trips between Philadelphia and Trenton, stopping at points on the way. She left the company's wharf at 1:45 yesvew little freight.

boiler burst. Before any of the passengers or employes had an opportunity of eeking places of safety another exploon occurred, and this time the port boiler was rent in twain. Scalding steam and water poured into the cabin and sections of the woodwork of the boat were torn away by the force of the explosion. Those of the passengers who were not injured by the scalding steam and boiling water were struck by the flying portions of the splintered abin. Legs and arms were broken nd faces and bodies were parboiled. the screams of the injured could be eard on shore and the cries of those who leaped and were blown into the iver were heartrending.

Fortunately the water was not more han four feet deep, and many of the victims of the disaster were able to wade ashore. Some, however, who were too seriously injured to help themselves were rescued by members of the boat rendered all the assistance possible to the injured, and Captain Worrell was the last man to leave the boat. All of the seriously injured were hastily conveyed to the hospital at the house of correction at Holmesburg, about three miles below Torresdale.

Word was sent to Philadelphia for the police boats and the emergency corps f doctors. The two police boats rendered effective service in extinguishing adian minister of public works, has re- the flames, and in earing for the in jected the offer made by an American Jured. Mur phy, along with an oiler named Bryson. had just left the boiler room when the explosion occurred, and both are positive that the boiler did not carry the limit of steam allowed by law.

Late last night, Horace Wilson, vic president and manager of the Wilmington Steamboat company, issued the following statement:

"As near as we can ascertain at this time, the accident to the steamer City Marietta, Ga., Aug. 29.-A trestle near of Trenton was due to the explosion of Allijay gave way last night, as a freight her port boiler, setting fire to the vestrain was passing over it. It is stated that a cable message to Mr Quincy regarding the gubernatorial situation, sent as the result of a conference of the leaders, brought the re sponse that he would sail for America unmediately, and that he would arrive in Boston by Saturday of this week. It is further stated that Gaston will make no announcement until Mr. Quincy has been seen, and it is definitely understood that he is willing to accept the nomination. It is expected that in the event of Gaston's withdrawal, Hamlin will gracefully follow suit.

## COUNSEL FOR SAMPSON

Schley's Friends Think It Indicative of Weakness.

ACTION IS PROPER, HOWEVER

Because of the Fact That Admiral's the injured, still in the hospital, will Mental and Physical Condition Has Been Failing For Some Time-"To Clear One Will Convict the Other"

Washington, Aug. 30.-Ever since it became known that Admiral Sampson would be a witness in the court of inquiry and that he had probably engaged an attorney to represent him, the the explosion occurred. The water was Schley partisans have laid great stress upon the latter fact as indicative of a weak case, or something worse.

One of the Schley newspapers, in explosion, but none was found. An atspeaking of the powers of the court of tempt was made at high tide yesterday inquiry, says that "it may go to the afternoon to float the vessel, but it was length" of permitting persons in secondary interest the privilege of employing counsel before the court. This plainly alludes to Sampson. But the tigation is to be conducted at once. phrase "to go to the length" finds no warrant in the traditions of courts of inquiry. Unlike a courtmartial, the judge advocate in the forthcoming trial will not be a presecuting attorney, but out the legal bearings of the case, supposedly quite as much on one side as on the other.

For the accused to be represented by counsel is rather unusual, and is as significant as for one of the witnesses, whose relation to the case is as close as Admiral Sampson's, to do the same thing. The court not only has full camp grounds last night the first of a power to admit or to exclude any attorneys that may present themselves, but the precept itself explicitly suggests considerable latitude when it just recommenced is part of a regular said: "The court may any time grant to others interested and entitled thereto like privilege." These privileges refer to the right to be present, either in person or by counsel, to cross-examine witnesses and to have access to the departmental office.

## Good Afternoon,

It would not be surprising if the Massachusetts Democrats united this ear on ex-Mayor Josiah Quincy of Bostom for Governor. Undoubtedly he s the strongest candidate the party could nominate. The prospects are not however very good for his election this year. The late ex-Governor Russell was three times a candidate before he was elected, and Mr. Quincy might be successful on the third trial.

This has been believed to have been the case so long that few have taken the trouble to prove it otherwise. It is now determined, h says, to have new men placed in posi tions that will give them a chance to learn the skilled work, and many of the men who hold menial positions in the union mills are to be taught skilled work with which they are in a measure familiar through long association with the workings of the mills. It is confidently asserted that before many months pass it will be possible to produce many new men and plenty to man all plants that are now idle, and which union men have refused to take hold of.

accomplish this Reports from all the mills of the corporation show that steady gains are be ing made in the force of non-union men. The strikers claim to have induced six non-union men to desert the Star mills yesterday. On the other hand Superintendent Piper of the Star plant announced that he is nearly ready to start up the other mills in the plant, and the men now waiting for the improvements to be completed are in the mill. workers' strike would affect the opening of the window glass plants this fall. a prominent manufacturer says the reason given for this is absurd. The building trades, he says, have not been affected by the strike in the least, as was claimed. The structural steel mills have not been stopped at any time and buildings have been carried up without interruption. If there is a delay in starting the glass factory fires, they say it will be for other causes.

The American Tin Plate company has announced that it will start the Demmler mills of the company on Monday of next week. Police protection has been asked for from Mayor Black of McKeesport.

Officials of the Amalgamated associa tion will not discuss the report of injunctions being served against their members at Canal Dover, O., until the hear officially from their district officers.
